

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PUBLIC DOCUMENTS
OF THE
STATE OF CONNECTICUT
VOLUME IV PART I

1905

Printed by Order of the General Assembly

HARTFORD

1906

NOTE.

Commencing with the documents for the year 1900, a Document Number has been assigned to each State departmental report.

This number is determined by the chronological order of the first printed independent issue of such report and will in future be retained by it, thus showing the relative chronological place it occupies in the printed reports of the State.

A list of these reports, with the date of first printed issue and the document number of each, appears on the following page.

Asahel W. Mitchell.

Comptroller.

AUGUST 1, 1906.

LIBRARY NOTE.

In order that each department report of the State of Connecticut for a series of years may be quickly located in the bound volumes of Public Documents, the Comptroller has also given each report a Binding Number by which its position in the bound volumes is permanently established, thus enabling each report to be found in the same position and volume from year to year.

That these several reports may be placed in the libraries of our several exchanges as soon as convenient after publication, he has provided that the State Librarian shall be supplied with two hundred sets bound in volumes of convenient size, each volume to be bound and labeled in harmony with the regular set and sent out as soon as possible after the printing of the reports belonging therein. This arrangement began with the reports for 1902.

GEO. S. GODARD,
State Librarian.

Connecticut State Library,
August 1, 1906.

REPORT

OF

THE BOARD OF EDUCATION

TO THE GOVERNOR

This volume contains statistics in the usual form and order, together with critical notes explaining the significance and limitations of the figures.

As in former years, three reports will be found herein

- 1 the report of the secretary
- 2 the reports of the normal schools
- 3 the report of the Connecticut public library committee

ATTENDANCE AND LABOR

The attendance of scholars, whether measured by the number on the registers or by the average annual attendance, increases steadily, as will be seen by the following table:—

Year	Registration			Average attendance		
	number	no increase	per cent	number	no increase	per cent
1900-1	155,572	344	0.02	115,264	3,700	3.31
1901-2	161,545	5,966	3.83	118,056	2,782	2.11
1902-3	159,935	1,610*	1.00*	119,231	1,175	1.00
1903-4	163,141	3,206	2.00	123,317	4,086	3.42
1904-5	168,779	5,638	3.44	129,257	5,940	4.81

The following summary indicates the activities of the agents who enforce the laws relating to attendance and labor:—

Attendance

cases investigated	.	.	.	.	.	.	6,042
families visited	.	.	.	.	.	.	2,044
schools visited	.	.	.	.	.	.	3,290
notices to parents	.	.	.	.	.	.	10,597
number absent illegally	.	.	.	.	.	.	3,025

* Decrease.

Child labor

establishments	
visited	1,023
inspected	851

In a few towns local officers will not prosecute parents or employers for plain violations of law.

NORMAL SCHOOLS

The practice and training which must prepare teachers for their important work has received careful attention. The maintenance of practice as distinguished from observation schools has continued to be an important part of the educational system of three of the normal schools. The practice school at South Manchester—the original school of the kind in this country—is of pre-eminent service to the schools of the state.

Through the normal schools the ranks of the profession should find not only a fresh source of supply but also a wider outlook and a more liberal idea of education. Two years is not sufficient time for training in essentials required for efficient teaching in common schools and for acquiring skill by practice and observation. If the course be longer probably fewer will attend the schools, which can accommodate twice as many as are now enrolled. The period of study may be prolonged by having the schools in session more weeks in the year. There are many students willing to give two years of uninterrupted work but unable to give parts of three years.

This board also realizes that the education of a teacher is not finished when the normal school course is finished. To provide additional opportunities summer schools have been occasionally held. Most of the instruction was a repetition of normal school courses. The present demand is for opportunities of a higher character,—especially information in certain subjects important in elementary schools, particularly history, literature, and natural science. Unless such opportunities be offered and accepted the teaching body of the state cannot improve.

Danbury The contractors began work upon the normal school building at Danbury in April 1904; this board accepted the completed structure in May 1905. Furniture was installed

in the summer of 1905; sessions of the school were held in the building in September 1905.

New Britain An appropriation of \$5,500.00 was made to repair the normal school buildings at New Britain. When the Prospect Street building was erected the appropriation was not sufficient to complete the structure; the roof as planned by the architects was omitted and a flat roof substituted.

This appropriation enabled this board to construct the roof originally planned and now the building is architecturally dignified and worthy of the state.

New Haven The sum of \$1,500.00 was appropriated by the legislature of 1905 for the purpose of constructing a coal bin and for other repairs at the state normal school at New Haven.

\$600.00 was expended for repairs, including the furnishing of a lunch room for the students. It was found that the coal bin instead of costing \$900.00 as estimated would cost at least \$1,800.00, and the work was not undertaken.

HIGH SCHOOLS

The following table exhibits the number of pupils attending non-local high schools and the amounts paid by the state for the eight years during which the law providing for such education has been in operation.

Year	No of towns paying high school tuition fee	No of scholars attending non-local high schools	No of high schools approved	Paid by state	
				Tuition	Conveyance
1897-8	32	136	27	\$2,315.96	
1898-9	40	214	24	3,584.09	
1899-1900	55	408	26	7,059.85	
1900-1901	61	489	31	8,591.72	
1901-1902	64	580	37	12,563.47	
1902-1903	69	649	42	15,312.85	
1903-1904	76	813	52	19,403.94	\$8,341.27
1904-1905	83	918	46	21,936.67	9,226.69

A few towns refuse to pay the whole or any part of the high school tuition fee.

EVENING SCHOOLS

On page 119 will be found statistics of evening schools. The number of evening schools was thirty-one, a slight in-

crease over the previous year. These schools receive from the state \$2.25 for each scholar in average attendance. In addition to the state grant amounting to \$8,955.13, the towns contributed \$24,922.21.

These schools exist mainly to teach immigrants the English language. Not more than four may properly be called continuation schools in which children over fourteen have opportunity to regularly continue common school subjects.

SUPERVISION

Under section 3 of the supervision act passed in 1903 five districts have been in existence during the year. The expense for supervision in these towns was \$7,320.00 and of this sum the state paid \$3,210.00.

The law prescribes no useful test of qualification for supervisors appointed under section 3. Supervisors ought to be trained and experienced teachers and acquainted with the technical duties of supervision.

This board has appointed supervising agents for twelve towns under section 5 of the act of 1903. The amount paid in salaries to these agents was \$2,780.00. Of this sum \$2,085.00 was paid by the state and \$695.00 by the towns.

In every town to which supervising agents have been assigned the improvement in buildings, attendance and teaching is marked. The agents have organized the schools, introduced orderly plans of work and have frequently inspected and examined each school. They have made reports to this board monthly and their activities have been the subject of frequent conference with the secretary.

Examinations have been held to determine qualifications of supervisors and a few certificates issued.

LEGISLATION OF 1905

In considering the condition and progress of public education current legislation is worthy of note.

Thirty-two bills and resolutions were introduced and referred to the committee on education at the legislative session of 1905; twenty-four were public acts and eight were resolutions. Thirteen were unfavorably reported and rejected. Ten were favorably reported; seven passed and three were rejected.

Several bills pertaining to education and schools were re-

ferred to other committees and do not appear under school legislation.

Average attendance act Amendments intended to give efficiency to the average attendance law were proposed. The amendments provided that teachers be approved by the state board of education. The object was to ensure good teaching for the children on whose behalf the grant was made. The amendments were favorably reported by the committee but failed to meet the approval of the legislature.

Free text books An act upon which considerable popular interest centered provided that all towns furnish free text books. The bill as amended and finally passed provided that all towns not supplying free text books vote upon the question at the annual town meeting in 1905.

Under this act 118 towns voted, 73 in the affirmative and 42 in the negative. In three the vote was tied, thus giving a negative result.

The aggregate number of ballots in the affirmative was 17,525, in the negative 13,191.

The result is that in the next school year 124 towns will furnish free text books and supplies and 56 towns will not.

Attendance A very important act provides that upon due investigation agents of the state board of education may notify parents to send their illiterate children to school after the children have reached the age of fourteen. This practically extends the operation of the compulsory attendance law to illiterates over fourteen.

DEFICIENCIES

An appropriation to supply deficiencies for education purposes for the fiscal term 1903-1905 was made by the legislature under the following heads,—

Danbury normal school	\$20,000.00
tuition of children in high schools	12,000.00
evening schools	6,000.00
pay and expenses of special agents to enforce the laws relating to the employment of children and laws relating to attendance at school	5,000.00
	\$43,000.00

The Danbury normal school opened in September 1904 and an appropriation was required for maintenance during its first school year.

The number of children attending non-local high schools increased from 813 to 918 and the sum appropriated in 1903 was insufficient to meet the payments required by law.

The large registration for evening schools made a larger appropriation necessary; the per capita payment is fixed by law.

The addition to our population by immigrants from all quarters of the world augmented the number of children of school age. From every direction came requests for assistance in compelling the newcomers to attend school or to observe the laws relating to labor. To meet these reasonable requests the services of additional agents were required.

EYE TESTS

The important inquiry connected with the eyesight of children as provided in section 2251 of the general statutes was conducted and concluded in the year under review. The detailed results are so voluminous that they are not printed in this volume. There is practical unanimity of opinion that the investigation calls attention to many defects of eyesight otherwise unobserved that proper remedies are in many cases applied and that the act has produced valuable results.

The following is a summary of the returns:

Enrollment in the schools	Number children tested	Number notices of defects sent to parents
143 983	133 144	17 338

TRADE SCHOOLS

The report of the committee appointed to consider the matter of trade schools will be found on page 155 and is deserving of especial attention.

AVERAGE ATTENDANCE GRANT

The summaries on pp 147-153 show that

- 1 58 towns were eligible to the grant i e had grand list of \$500,000 or less
- 2 36 towns applied for and received the grant
- 3 The law works automatically in directing the larger grants to the needy schools
- 4 The total expenditure for schools by these 36 towns was \$99,406: to the sum the state contribution was \$55,895 or

56%. In 25 towns the state grants exceeded one half the total expenses for schools.

5 Teachers' wages amounted to \$81,606: 61%—\$50,034,— was paid by the state.

6 Though making such large contributions to the education of children the state exercises no control over the distribution of the funds, has no influence in the selection of teachers and has no supervision of the teaching.

7 Comparing the year under review with the year before the law became operative (1902) 20 towns diminished taxation for schools and actually paid less for schools because state aid was obtained.

8 Every town paid larger wages to teachers. The whole of the increment came from the state treasury. The larger wages did not materially augment the number of trained and qualified teachers. The law was not so administered as to make better schools by substituting better teachers and improving the teaching. This larger grant has not yet reached the children for whom it was designed

The foregoing is evidence that raising wages does not raise the qualifications of teachers, and the law has not fulfilled its educational purpose. Manifestly legislation is needed to

- 1 prevent the employment of unqualified teachers
- 2 admit supervision by the state which supplies the funds

GEORGE M CARRINGTON
WILLIAM G SUMNER

WILLIAM H PALMER

REPORT OF THE SECRETARY

To the Board of Education of the State of Connecticut

Your secretary respectfully submits his twenty-first annual report.

This report covers the period from July 14 1904, to July 14 1905.

The report is arranged under the following heads :

- 1 Towns in order of
 - ii population 1900
 - iii grand list 1904
 - iv enumeration grant 1905
 - v enumeration 1904
 - vi cost per child enumerated
 - vii average attendance
 - viii cost per child in average attendance
 - ix enrollment
 - x number teachers employed
- 2 General statistics
- 3 Financial statement
 - i receipts
 - ii expenditures
- 4 Scholars
 - i enumeration
 - ii enrollment
 - iii attendance and labor
 - (a) reports of agents
 - (b) statistical tables
 - (c) prosecutions
- 5 Teachers
 - i supervisors
 - ii reports of supervisors
 - iii teachers' meetings
 - iv state examinations
- 6 Schools
 - i school year
 - ii diagram
 - iii normal schools
 - (a) attendance
- (b) entering classes
 - (c) graduates
 - (d) teachers
 - (e) towns represented
 - (f) expenses
 - (g) reports of principals
 - 1 New Britain
 - 2 Willimantic
 - 3 New Haven
 - 4 Danbury
 - iv high schools
 - (a) statistics
 - (b) state grant for
 - 1 tuition fee
 - 2 conveyance
 - v evening schools
 - (a) statistics
 - vi kindergartens
 - (a) statistics
 - vii schools at temporary homes
 - (a) reports of visitors
 - viii special subjects
 - (a) drawing
 - (b) singing
 - (c) domestic science
 - ix arbor and bird day
 - x private schools
- 7 Schoolhouses and libraries
 - i statistics
- 8 Town management
- 9 Free text-books
- 10 Conveyance of children
- 11 School documents issued 1904-5

- | | |
|-----------------------------|--------------------------|
| 12 Science cabinets | 15 Free public libraries |
| 13 Average attendance grant | i committee |
| 14 Trade schools | ii statistics |

The Appendix contains :

- | | |
|---------------------------------|--------------------------------|
| 1 Statistical tables 1904-1905 | 2 State teachers' examinations |
| i receipts | i scheme of state examinations |
| ii expenses | ii questions used at |
| iii scholars | |
| iv teachers | |
| v schools | |
| vi schoolhouses and libraries | |
| vii enumeration of 1904 | |
| viii amounts paid for libraries | |

The arrangement of this report follows in the main the lines of the last and other annual reports.

The usual analysis of educational statistics of the current and previous years is preceded by eight tables which summarize a part of the general statistics. (Appendix, pages 164 to 216.)

The first of these tables is an index giving the rank of towns in the following tables. By this introductory table comparison of the towns in respect of resources, attendance, and cost of schools may be easily made. It will be seen that some towns having a small valuation and population take high rank in expenditure.

From these tables can be ascertained the towns eligible to the average attendance grant authorized by the law of 1903.

TABLE I

Alphabetical list of towns

showing rank as exhibited in tables ii-ix, pages 22 to 30

A table showing the towns of the state, arranged by the number of days in a school year, will be found on page 89.

GENERAL STATISTICS

The following statistics are of general interest:

Population of Connecticut, 1900	908,355
Number of children between four and sixteen years of age, October, 1904	215,217
Number of pupils enrolled in the common schools	168,779
Increase	5,638
Percentage of increase	3.44
Enrolled per capita of population	18.58
Ratio of enrollment to enumeration	79.53
Average daily attendance	129,257
Increase	5,940
Percentage of increase	4.81
Number of schools	1,518
departments	4,292
Average number of days schools were kept	188.73
Number of schoolhouses	1,594
Value of all public school property	\$13,470,108.60
Value per capita of population	14.83
Value per capita of average attendance	104.21
Teachers, number men, winter,	325
women, winter	4,269
total,	4,594
men, summer	319
women, summer	4,278
total,	4,597
Percentage of male teachers	6.7
Average monthly wages of teachers	
men	108.97
increase	2.34
women	46.67
increase	.89
Revenue from	
permanent funds	\$144,191.24
state taxes *	410,983.17
local taxes	3,029,477.30
other sources	215,714.07
Total *	† \$3,800,365.78
Percentage of revenue derived from	
permanent funds	3.79
state taxes	10.81
local taxes	79.72
other sources	5.68
Expenditure for	
new buildings	\$340,554.47
libraries and apparatus	23,780.31
running expenses, including salaries of teachers and superintendents	2,744,454.74
other expenses	670,942.42
Total	\$3,779,731.94
Expenditure per capita of population for running expenses	3.02
Daily cost of schooling per pupil	
for running expenses	11.2 cents
for all purposes,	15.5 cents
Amount of permanent invested funds	\$3,059,925.60

* For items of this amount see page —.

ANALYSIS OF STATISTICS

In the following pages the statistics for 1904-1905 are analyzed and compared as in former reports with the returns for the previous year.

FINANCIAL STATEMENT

Summary of statistics, 1904-1905

School fund	
Income distributed	\$109,579.27
Dividend per child	50.91 cents
Grants from state treasury	
Enumeration grant	374,658.98
High school grant tuition fees	21,886.67
Transportation	9,066.28
Supervision	5,371.24
Total *	\$410,983.17
Receipts	
By towns and districts for tuition fees	37,216.49
Town deposit fund income	26,323.23
Local funds income	8,288.74
Town tax for schools	2,288,054.34
Increase for the year	35,486.32
District tax for the schools	741,423.00
Increase for the year	99,568.58
Voluntary contributions	40,835.94
From other sources	137,661.64
Received for public schools from all sources	3,800,365.78
Increase for the year	27,316.10
Expenditures	
For teachers' wages	2,320,682.72
Increase for the year	91,055.30
For fuel and incidentals	358,522.44
Increase for the year	32,858.14
For repairs of school buildings	192,837.76
Decrease for the year	16,620.62
For libraries and apparatus	23,780.31
Increase for the year	772.55
For new schoolhouses	340,554.47
Decrease for the year	149,968.42
By towns for high school tuition	36,115.73
By towns for high school transportation	17,341.19
By towns for supervision	65,249.58
For other school purposes	424,647.74
Increase for the year	17,766.03
Total for public schools	3,779,731.94
Decrease for the year	15,527.77
Estimated value of school property in state	13,470,108.60
School district indebtedness of state	2,753,224.81
Cost of new school houses completed during the year	539,851.88
Number of districts that raised a tax during year	101

* Average attendance grant not included.

RECEIPTS

The total sum received from all sources by the 168 towns of the state for public schools was \$3,800,365.78 as compared with \$3,773,049.68 in the year 1903-1904.

The principal sources of income are

- (a) permanent investments
- (b) taxes
- (c) voluntary contributions

PERMANENT INVESTMENTS

Permanent investments include

- (a) school fund
- (b) town deposit fund
- (c) local funds

School fund — On the 30th of September, 1905, the principal of the school fund was invested as follows —

TABLE XI

Bonds and mortgages	\$1,691,596.47
Real estate	178,255.46
Bank stock	115,212.61
Cash	37,437.69
Total	\$2,022,502.23

The interest on this fund was \$109,579.27, which was distributed to schools under the provisions of section 2257 of the general statutes.

Of the \$2.25 per scholar divided and distributed to the towns under the above section the income of the school fund supplied 51 cents.

Local funds — The principal of local funds is returned as \$282,451.03 and the income as \$8,288.74.

Town deposit fund — The amount deposited with the towns in 1837 was \$763,661.83; the amount now returned is \$754,972.34, and the interest for the year is given as \$26,323.23.

The waste of this fund has gone so far that in most towns the alleged interest is no longer a contribution to the support of schools. When the fund exists in a town order no tax is laid to meet the interest and the school resources are increased on paper only.

The amount of all permanent invested funds is \$3,054,541.34 and the income \$144,191.24.

In the following table is given the income of the school fund and the apparent income of the town deposit fund and local funds since 1876:

TABLE XII

Year	School fund	*Per cent	Town deposit fund	Local funds
1876	\$135,189.00	8.6	\$46,534.97	\$15,614.79
1877	137,261.00	9.1	47,665.00	12,562.54
1878	138,475.00	9.1	44,538.92	12,754.62

1890	119,430.75	5.9	35,068.83	7,589.45
1891	120,930.75	6.0	35,584.95	7,839.16
1892	123,039.75	5.4	35,255.93	8,344.70
1893	125,856.75	5.8	33,873.69	8,815.39
1894	127,092.75	5.0	33,702.01	9,280.49
1895	127,941.75	5.2	33,593.36	7,615.93
1896	130,832.25	5.2	33,288.80	7,639.22
1897	112,523.08	4.1	31,795.23	6,915.07
1898	122,427.91	4.3	31,908.41	7,020.46
1899	113,722.79	3.7	30,685.21	7,306.06
1900	122,939.77	4.1	29,702.10	7,397.26
1901	121,231.52	3.9	30,828.76	5,053.99
1902	110,524.21	3.2	29,151.96	6,424.32
1903	106,838.22	3.0	28,086.35	5,930.70
1904	109,252.86	3.0	28,617.22	7,163.93
1905	109,579.27	2.9	28,399.28	7,221.91
1906			26,323.23	8,288.74

If we subtract from the income of town deposit fund not less than \$20,000 and from the income of local funds not less than \$5,000, the annual income will be approximately recorded.

TAXATION

State tax—From the state treasury there was paid to the towns \$2.25 for each enumerated person. The number enumerated was 215,217, and the grant amounted to \$374,658.98, an increase of \$4,630.34 over the year 1903-1904.

There was also paid to towns for high school tuition \$21,886.67, for high school transportation \$9,066.28, and for supervision \$5,371.24. The average attendance grant was \$34,767.29. The sum paid from the state treasury to the towns was \$445,750.46.

The property upon which state taxes are incident and the specific income therefrom for the year 1904-1905 are shown

* Per cent which the income of school fund constitutes of the total receipts for schools.

by the following statement from the report of the state treasurer:

School fund interest transferred,	\$109,579.27
Avails of courts,	66,643.05
Charter fees,	48,814.00
Commissioners of pharmacy,	246.00
Commissioners of shell-fisheries,	9,349.45
Comptroller (statutes sold),	404.00
Corporation capital fee,	24,169.00
Express companies, tax on,	13,121.47
Fees from executive secretary,	417.25
Fees from secretary's office,	14,908.23
Inheritance tax,	284,117.07
Insurance commissioner, receipts of,	130,318.04
Interest account,	36,071.08
Investments, tax on,	139,375.35
Itinerant venders' license fees,	400.00
Military commutation tax,	152,537.80
Miscellaneous receipts,	15,523.40
Mutual fire insurance companies, tax on,	4,944.65
Mutual life insurance companies, tax on,	330,357.16
National aid to state homes, D. V. S.,	44,715.00
Non-resident stock tax,	140,035.51
Railroads, steam, tax on,	1,204,936.48
Railroads, street, tax on,	237,908.23
Rolling stock companies, tax on,	107.74
Salaries of the bank commissioners,	6,712.92
Salary of the building and loan commissioner,	1,108.83
Salary inspector-general of gas and gas meters,	1.00
Salaries of the railroad commissioners,	12,608.22
Savings banks, tax on,	469,611.55
State librarian (atlases sold),	65.78
State police, receipts of,	5,407.29
Telegraph and telephone companies, tax on,	30,464.49
	\$3,534,973.31

Of this amount \$455,750.46, or 12.66 per cent, was paid for educational purposes.

Town tax — In the year under review the amount raised by town tax for school purposes in the one hundred sixty-eight towns of the state was \$2,288,054.30. This sum is 60.2 per cent of the total revenue for schools.

District tax — In addition to the foregoing town tax 101 districts raised \$741,423.00. There are 859 districts in the state, including the city districts of Middletown and New Haven.

Comparative table — Since 1875 the amounts received from taxation, together with the per cent which each constitutes of the total receipts for school purposes, are exhibited in the following table:

REPORT OF THE SECRETARY

Manchester	24,796.43		
Middletown	15.85		
Morris	2.00	Total	\$40,835.94

TUITION FEES

The amount received by towns from tuition fees was \$37,216.49. A part of this sum was received by towns from the state treasury and appears under expenses paid by towns to other towns for high school tuition. In several towns children living in one district must pay tuition to another district in the same town, while the town contributes money to both.

MISCELLANEOUS

From miscellaneous sources were received \$137,661.64.

The amounts grouped under this head since 1890 are as follows :

TABLE XVI

Report for year		Report for year	
1890	\$76,836.27	1898	\$114,512.19
1891	74,535.51	1899	237,498.30
1892	68,238.94	1900	71,283.84
1893	164,834.71	1901	164,964.70
1894	86,133.91	1902	72,272.66
1895	174,004.48	1903	171,672.00
1896	163,339.08	1904	169,471.03
1897	96,881.38	1905	156,918.58
		1906	137,661.64

This sum includes (1) unexpended balances in district treasuries at close of year, (2) proceeds of sales of text-books, and (3) sales of school property.

In Hartford and Manchester the state corporation tax is distributed to schools and is reported under this head. In Hartford this tax amounted to \$39,249.66.

SUMMARY

The following is a summary of receipts under the several heads, with the per cent which each bears to the total sum raised for school purposes:

TABLE XVII

		Per cent of total revenue
From permanent investments —		
school fund	\$109,579.27	2.88
town deposit fund	26,323.23	.69
local funds	8,288.74	.22
From taxation —		
town tax	2,288,054.30	60.21
district tax	741,423.00	19.51
state tax	40,835.94	1.08
From voluntary contributions	40,835.94	1.08
tuitions	37,216.49	.98
other sources	137,661.64	3.62
Total	\$3,800,365.78*	

* Average attendance grant not included.

EXPENDITURES

The amount expended by the towns and districts in the year under review was \$3,779,731.94, which is \$15,527.77 less than was expended in the previous year.

School expenses are classed as follows:

- | | |
|--|----------------------------|
| 1 Administration | 4 Payments on indebtedness |
| 2 Maintenance or running ex-
penses | 5 Interest |
| 3 Permanent improvements, sites,
buildings, repairs | 6 Libraries and apparatus |

ADMINISTRATION

The amount expended under this head was \$65,249.58. This represents the cost of superintendence and such other official activities as are authorized or enjoined by law.

TABLE XVIII

Report of	Per cent. of total cost of schools		Report of	Per cent. of total cost of schools	
1891	1.6	\$33,174.58	1899	1.7	\$51,722.35
1892	1.5	32,386.91	1900	1.6	52,001.37
1893	1.5	34,716.32	1901	1.7	53,714.52
1894	1.5	35,283.92	1902	1.7	54,050.48
1895	1.5	39,215.29	1903	1.5	52,239.57
1896	1.7	44,950.59	1904	1.5	53,446.55
1897	1.7	46,814.91	1905	1.6	61,243.91
1898	1.7	51,138.74	1906	1.7	65,249.58

The foregoing ought to be increased by the amounts expended for supervision and included under teachers' wages.

MAINTENANCE

Maintenance comprises teachers' wages, fuel, and incidentals.

The amount used for these purposes in the year we are considering was \$2,679,205.16, which was 70.9 per cent of the total expense for schools. From this may be subtracted the amounts in table xviii which are properly included under administration.

The average cost of schooling a child, excluding all outlay except that classed under this head, is 11 cents a day.

PERMANENT IMPROVEMENTS

Under this head are included sites, new schoolhouses, and repairs.

For these purposes was paid \$533,392.23, made up of \$340,554.47 for new fabrics and sites, and \$192,837.76 for repairs.

Of the whole expenditure for schools, new buildings constituted 9.9 per cent, and repairs 5.1 per cent.

The number of new buildings completed in each year and the annual expenditure since 1891 is as follows:

* TABLE XIX

Report of	No of buildings	Cost
1891	10	\$261,423.06
1892	20	307,830.92
1893	6	216,580.96
1894	12	248,232.19
1895	20	464,107.01
1896	12	308,058.21
1897	12	200,871.11
1898	17	400,511.84
1899	19	357,834.27
1900	5	459,522.49
1901	15	414,078.32
1902	9	367,447.56
1903	13	283,475.00
1904	14	389,911.86
1905	11	490,522.89
1906	29	340,554.47
Totals	224	\$5,510,962.16

* This table gives the expenditure or outlay in school year 1904-1905 and not the actual cost of the buildings when completed.

LIBRARIES AND APPARATUS

This item includes the state grant of \$6,800.00.

TABLE XX

	Number of libraries			Number of libraries	
1891	364	\$16,443.14	1899	743	\$24,984.11
1892	383	15,121.33	1900	771	20,302.53
1893	398	15,426.86	1901	785	26,270.83
1894	461	15,180.65	1902	837	26,209.25
1895	484	18,824.55	1903	833	33,533.75
1896	564	20,402.28	1904	822	24,775.30
1897	663	22,342.82	1905	914	23,007.76
1898	688	24,855.79	1906	914	23,780.31

The state grant paid to the towns and districts will be found on pages 134-138.

INTEREST

There was paid in the year 1904-1905 about \$95,083.77 for interest charges.

This is included in the amount designated below as "other objects."

SUMMARY

A summary of expenditures is as follows:

RECEIPTS AND EXPENDITURES

41

TABLE XXI

Administration			\$65,249.58
Running expenses—			
teachers' wages	\$2,320,682.72	}	2,679,205.16
fuel and incidentals	358,522.44		
Permanent improvements—			
sites and buildings	340,554.47	}	533,392.23
repairs	192,837.76		
Library and apparatus			23,780.31
Payments on indebtedness			†166,297.92
Interest			† 95,083.77
Other objects			383,020.89
Total			\$3,779,731.94

The ratio which each of these several items of expenditure bears to the total expenditure is exhibited in the following table:

Administration	1.73
Running expenses—	
teachers' wages, etc.	70.88
Permanent improvements	14.11
Library and apparatus	0.63
Interest	2.52
Other objects	10.13

COMPARATIVE TABLE RECEIPTS AND EXPENSES

The following table compares the receipts and expenses for schools for thirty years, 1875-1905, and gives the average cost of schooling children:

TABLE XXII

Year	Receipts	Expenses	Cost for each child enumerated	Cost for each child registered	Cost for each child in attendance
1875	\$1,592,858.11	1,552,583.85	\$11.81	\$14.17	\$23.22
1876	1,566,565.06	1,529,181.52	11.54	13.10	22.13

INDEBTEDNESS

The towns and districts have availed themselves freely of the power of borrowing. To July 14th, 1905, the indebtedness incurred was \$3,772,357.84. This does not include considerable sums which are included in general town indebtedness.

The sums reported under this head since 1892 are as follows:

TABLE XXIV

Report of year	Indebtedness	Report of year	Indebtedness
1892 . . .	\$1,755,530.32	1900 . . .	\$3,180,459.95
1893 . . .	1,873,645.86	1901 . . .	3,110,209.73

1887	*1.0	*1.3	1900	1.4	.3
1888	2.6	2.6	1901	3.3	1.5
1889	1.6	9.4	1902	2.4	9.8
1890	1.5	7.0	1903	1.0	*0.8
1891	.8	2.0	1904	3.4	0.7
1892	.7	3.1	1905	4.8	*0.4

The increase in average attendance has been 77.9 per cent, and in expenses 174.7 per cent.

The per cent of increase in population, 1880-1900, was 45.8. The per cent of increase in average attendance was 51.6, and the per cent of increase in enumeration was 41.9.

The per cent of increase of average attendance exceeds the per cent of increase of enumeration of the population and is evidence that the attendance laws are enforced.

* Decrease

ENUMERATION, REGISTRATION, AND ATTENDANCE

Summary of statistics, 1904-1905.

Number of children between four and sixteen years of age enumerated in October, 1904	215,217
Increase for the year	2,203
Number of enumerated children in schools other than public schools	30,862
Increase for the year	758
Number of school children between four and six years of age in no school, reported by school visitors,	28,175
Decrease for the year	3,740
Number of school children between four and six years of age in no school, as shown by enumeration of October, 1904	33,612
Increase for the year	40
Registration of scholars in winter	153,632
Increase for the year	5,458
in summer	147,857
Increase for the year	4,109
over sixteen years of age	5,299
Decrease for the year	346
Registration of different scholars in public schools	168,779
Increase for the year	5,636
Percentage of registration to enumeration October, 1904	78.42
Percentage of enumerated children registered in public and private schools	92.76
Percentage of enumerated children registered in winter	71.38
Increase for the year	1.82
Percentage of enumerated children registered in summer	60.70
Increase for the year	1.29
Average attendance in public schools in winter	130,602
Increase for the year	5,815
in summer	127,913
Increase for the year	6,065
Percentage of registered children in average attendance in winter	85.00
Increase for the year	.79
Percentage of registered children in average attendance in summer	86.51
Increase for the year	1.75
Percentage of average attendance in winter to enumeration, October, 1904	60.68
Increase for the year	2.10
Percentage of average attendance in summer to enumeration, October, 1904	59.43
Increase for the year	2.23
Number of districts in which the average attendance for the year ending July 14, 1905, was eight or less	61

ENUMERATION

The following table gives the October count of persons between 4 and 16 years of age for nineteen years beginning with 1886, and the annual increase for the same years:

TABLE XXVII

Year	Enumeration	Increase
1886	153,260	1,094
1887	154,932	1,672
1888	157,243	2,311
1889	159,241	1,998
1890	161,241	2,000
1891	164,053	2,812
1892	167,809	3,756
1893	169,457	1,648
1894	170,589	1,132
1895	174,529	3,940
1896	179,263	4,734
1897	184,336	5,073
1898	189,717	5,381
1899	194,800	5,083
1900	199,026	4,226
1901	203,992	4,966
1902	209,006	5,014
1903	213,014	4,008
1904	215,217	2,203

Average annual increase, 3,318

The following comparative table shows the annual increase in enumeration, enrollment, and attendance for the fifteen years beginning 1891 :

TABLE XXVIII

Report of Year	Increase in enumeration	Increase in enrollment	Increase in attendance
1891	2,000	2,400	647
1892	2,812	2,066	583
1893	3,756	2,266	1,368
1894	1,648	2,812	5,231
1895	1,132	2,833	4,727

ATTENDANCE

REPORTS OF AGENTS

Attention is directed to the annual reports of the compelling agents, Mr William S Simmons and Mr C N Hall, which contain much valuable information.

MR CHARLES D HINE

Secretary of the State board of education
Hartford Conn

Sir During the year Mr. Charles H. Walker has rendered valuable assistance in attendance work as given below

SCHOOL WORK

Number of towns visited		37
Number of schools visited		378
Number of families visited		234
Number of cases investigated		391
Number absent under legal excuses: —		
Mental or physical disability	22	
Lack of clothing	5	
At work	15	
		42
Number at work illegally		10
Number absent illegally		239
Number sent to school		238
Prosecutions of parents		15
Sent to Connecticut school for boys		1
Sent to industrial school for girls		2
Number of teachers reporting attendance		504
Number of letters to 187 teachers for delayed reports		376
Number of letters and notices to parents where children were reported absent 10 per cent or more of the time without legal excuse		3,627
Correspondence, number of letters written		916

FACTORY WORK

Number of towns visited		25
Number of visits to establishments		197
Number of children under 14 years of age employed		3
Number of children discharged		3
Number between 14 and 16 years of age employed		806
Number of boys employed		449
Number of girls employed		357
Number having town clerk's certificate of age		296
Number having teacher's certificate of age		493
Number having agent's certificate of age		7
Number without certificate of age		10
Number of establishments without list of certificates of age		13

Below will be found a tabulated statement of my work for the year

SCHOOL WORK

Number of towns visited		28
Number of schools visited		243
Number of families visited		175
Number of cases investigated		247
Number absent under legal excuses: —		
Mental or physical disability	29	
Lack of clothing	13	
At work	12	
		54
Number at work illegally		5
Number absent illegally		128
Number sent to school		127
Prosecutions of parents		2
Prosecutions of employers		4

FACTORY WORK

Number of towns visited		24
Number of visits to establishments		210
Number of children under 14 years of age employed		1
Number of children discharged		1
Number between 14 and 16 years of age employed		1,561
Number of boys employed		902
Number of girls employed		659
Number having town clerk's certificate of age		385
Number having teacher's certificate of age		891
Number having agent's certificate of age		41
Number without certificate of age		44
Number of establishments without list of certificates of age		34

The following table shows the number of children, 14 to 16 years of age, employed in the various industries, with the average weekly wages:

Industries	Boys	Girls	Average wages
Cotton	477	345	\$4.98
Hardware	235	110	5.15
Woolen	228	185	4.90
Thread	150	152	5.30
Silk	82	124	4.60
Miscellaneous	179	100	4.88

W S SIMMONS

Mr CHARLES D HINE

Secretary of the State board of education

Sir The report of my work for the school year of 1904-5 is herewith respectfully submitted:—

ATTENDANCE

Towns visited	49	
Families visited	715	
Visits to schools	1,038	
Cases of absence investigated		3,420
Legally absent:—		
Cause—Disability		834
Lack of clothing		65
Legally at work		321
Receiving home instruction		8
Found to have moved away		439
Found in some other school		285
Found to be under legal age		71
Illegally absent from school		1,397
Sent to school		1,393
Letters and notices sent out	3,499	
Cases investigated by letter		1,035
Cases receiving printed notice		1,890
Personally investigated as above		3,420
Total cases receiving attention		6,345
Prosecutions of parents		11
Sent to industrial school for boys		5
Sent to industrial school for girls		1
Sent to temporary home		2
Bound out by probate court		2

FACTORIES

Towns visited	24	
Establishments visited	167	
Children illegally employed		8
Children discharged		8
Children employed between 14 and 16		486
Boys		284
Girls		202

During the year Mr David B Mansfield of Harwinton has rendered valuable assistance in the above work, as tabulated below:

Families visited	219	
Schools visited	140	
Cases of absence investigated		777
Found to be illegally absent		336
Legally at work		56
Cases of disability		218
Cases of lack of clothing		21
Found to be under legal age		23
Found to have moved away		107
Found in other schools		11
Receiving home instruction		4
In private school		1
Visits to factories		17

The year covered by this report has shown a gratifying increase in the number of parents who seem to desire to comply with the attendance law and who have, without solicitation, notified the agent whenever it was found to be unavoidably necessary to keep their children from school. Such letters, coming from a wide territory, are of value as indicating an increasing sense of moral responsibility on the part of parents and a wider knowledge of the scope and intent of the law.

But parental negligence continues to be the greatest of all causes of irregular school attendance; cases ascribed to this cause comprising about 95 per cent of all cases investigated.

The parents who wilfully keep children from school without legal excuse, are comparatively few; but the parents who passively permit their children to be absent from school without good cause, or any cause, are many. Such cases do not usually demand prosecution, personal work with the parents, enlightenment, and a full knowledge of the consequences being the needed and best methods; but the parent or guardian who refuses to send his child to school through spite or obstinacy, or in order to benefit by the child's work, should be made to feel the corrective influence of the law.

VISITS TO SCHOOLS

It becomes more and more evident that the visit to the school is a necessary and valuable factor in the work. Schools have been found in which, at the first visit, it was discovered that the pupils and their parents regarded the monthly attendance reports, the teacher's threat of a visit from the agent, and the existence of the agent as pure fiction, invented to secure good attendance but with no backing of reality. A visit dispels this illusion and almost invariably results in improved attendance. The visit is also of much assistance to the teacher, especially if the attendance law, the value of regularity, and the inability of the teacher to grant or accept excuses other than those recognized by the law are fully explained to the school.

CASES INVESTIGATED

This includes all cases of absence from school investigated by visits to families or during visits to schools. It does not include cases investigated by letter; these number 1,035 separate cases additional to the 3,420 tabulated above. Each case noted has involved inspection of a register, the recording of a name and of the extent of absence, inquiry into the cause, and often a visit to the family.

LETTERS AND NOTICES

These fill an important place in the work. As stated above, 1,035 cases have been investigated by letter, and in addition to these 1,890 cases of irregularity have been attended to by the regular printed notice of non-attendance. Eighty-five per cent of the notices sent out produced results in better attendance, as shown by subsequent monthly reports and special reports. Some parents have seemed to feel hurt at the receipt of a notice or letter, and in some cases have sought to make the teacher feel the weight of their displeasure. This is the most inconsistent attitude possible; for if the absence was legal the parent could have no good objection to stating the cause, and if illegal, the parent was clearly in the wrong and had no right to complain.

If every parent would send to the teacher a written statement of the cause in each case of absence, matters would be simplified and much investigation avoided.

REPORTS FROM TEACHERS

These should be sent in promptly on the last Friday of each calendar month, and should state causes of absence with as great a degree of accuracy as possible. Attention is again called to the importance of special reports at the beginning of irregularity. Any illegal or unexplained absence occurring previous to the last week of the month should be made the subject of a special report; many cases of irregularity which would otherwise cover a period of two or three weeks may thus be checked at once; and prevention of irregularity is of far more value than is punishment after it has occurred.

COUNTY HOME WARDS

During the year three of these children have been found in unfit homes. It seems to be impossible for the managers of temporary homes always to know just what conditions prevail in the families to which children are sent, but the record of school attendance is in every case an infallible guide; whenever the child is deprived of schooling other conditions are also found to be unfit and the child is improperly placed; wherever the school attendance is regular the home conditions are found to be satisfactory. The state owes to these children proper care, training, and education; the home in which these essentials are neglected is no fit place for the helpless and dependent child.

Institutions for the care and reformation of children are created by statute and supported by the state; these are created and maintained for a specific purpose, and that purpose can only be attained by prompt commitment to these institutions whenever such commitment can be of benefit to the child. To suspend judgment on or admonish persistent truants, or neglectful, intemperate or cruel parents is seldom of any practical value, and too often results only in allowing evil conditions to exist until they become unbearable and reform becomes impossible.

TEACHERS' SALARIES

In order that the work of the agent in securing regularity of attendance may be of the fullest value it is essential that communities furnish adequate schools, but this is not always done. In some towns, still under the old district system, it is the practice to hire a teacher at very low wages and require her to furnish the fuel and incidentals for the school. This often results in giving the teacher very little indeed for her work, while the school room is quite likely to be imperfectly heated and the school suffers a lack of such supplies as can be classed under the head of incidentals.

A teacher who receives a total of \$6.50 or \$7 a week and must pay her board and buy fuel and incidentals out of that sum can hardly be expected to bring much training or enthusiasm to her work.

Regularity of attendance is not easily secured in districts where such indifference to school interests and such injustice to teachers prevails.

SUPERVISION OF SCHOOLS

The agent, more than any other person, has constantly before him a bird's-eye view of the various school systems in his territory, and is peculiarly well situated to note and compare the merits and deficiencies of all. To such an impartial observer the need most evident is the need of skilled supervision of schools.

Supervision insures competent teachers, the best methods, system, and a definite purpose; the absence of supervision almost always means educational inefficiency, shiftlessness, and waste.

Many towns appoint superintendents, but many other towns do not, and will not, until compelled to do so by statute law; meanwhile these towns go on year after year expending in the aggregate large sums of public money on schools without adequate results. And not only is public money wasted, but, which is of far more consequence, the years of childhood, which should be rich in the acquirement of knowledge and training, are also wasted, never to be regained.

EMPLOYMENT

In the territory covered by this report there has been less child labor than in former years; the number of employed children between the ages of 14 and 16 have been 455, as against 554 in the year previous in the same establishments. While this decrease may have been accidental, and subject to reversal in some succeeding year, it is not probable that it was so, for there is noticeable a growing disinclination on the part of employers in many industries to employ children under 16 years of age. In a few industries where children can be most profitably used this tendency is not shown. In a few instances children under 14 were found working during the summer vacations and were discharged, as such employment is clearly without the letter of the law.

The employment of children of legal age but without the certificate which the statute requires is an infraction of law, but by no means of so serious a nature as is the employment of children under the age of 14; but the former practice, if general and persistent, must inevitably result in the latter, and would soon render futile any effort to limit the working age.

The employment in manufacturing establishments of children over 14 and under 16 is legal, but is not a matter in which any individual, corporation, or state can take much pride, based as it is on laziness, greed, and disregard of social welfare. In an ideal social condition all under the age of 16 would be denied such employment and would be in school during school sessions and free to rest, grow, and develop during vacations.

If during one century confining labor outside of school were absolutely prohibited to all under the age of 16 that century would mark a tremendous advance in the quality of the human race. Legislation enacted in 1903 and amended in 1905 renders it possible for town school officials and for the state board of education to insist upon the continued school attendance of children over 14 years of age, until a satisfactory grade of scholarship is attained or, failing such attainment, until the age of 16 is reached. The towns of Bristol, Plymouth, and Torrington, all progressively and efficiently managed in school matters, were early to take advantage of this law and to enforce its provisions with beneficial results.

The ultimate effect of this legislation will be, not so much to curb the employment of children, as to secure greater regularity of school attendance at all ages up to 16.

AVERAGE AGE OF EMPLOYMENT

Using August 1st, 1905, as a census date, the average age of employed children has been worked out with the following result:

	Years	Months
Average age, all children employed	15	4
" " boys	15	1
" " girls	15	6

IN GENERAL

If every man and woman in our country possessed even the ordinary high school education of the present day, our country would be immeasurably richer, stronger, and better than it is; and such an education should be within the reach of every child in the state. The material value to a nation of universal, compulsory education and the dangers of popular ignorance have been clearly and startlingly demonstrated to the world during the progress of the struggle be-

tween Japan and Russia. In view of our rapid rise to a position of world importance and most of all because of the immigration which brings to our land millions who must be assimilated and made of us or become sources of grave danger, universal and compulsory education becomes a sacred duty and the first duty of every state.

It is as clearly the duty of the state to curb and eradicate ignorance and illiteracy as it is to curb and eradicate epidemics of yellow fever and smallpox; and ignorance and illiteracy are much more dangerous in a republic than any epidemic of disease can be. The statement of President Roosevelt that the chief assets of a nation are its children is true only as those children are rightly trained and educated; for the most serious form of race suicide is that which brings children into the world to grow up untrained, ignorant, and intellectually helpless. Regularity of school attendance is a means to a certain end; the end sought being universal popular education and training. But regularity of attendance is in itself an end of no slight importance. Regularity of school attendance, rigidly insisted upon and secured, inevitably trains the child in the habits of regularity and promptness, the habit of respect for and obedience to law, the habit of attention to duty. These are largely matters of habit, and can be cultivated or neglected, and it is a fact that the child's future value as a citizen is greatly affected by the regularity of his school attendance, impressed upon him as a matter of duty to society and the law.

C N HALL

New MILFORD September 1905

SUMMARY

From the tables printed in annual reports the following summary is compiled :

TABLE XXXI — SUMMARY FOR TEN YEARS

YEAR	number of cases of absence investigated	number of families visited	number of visits to schools	number of letters and notices to parents	RECOGNIZED EXCUSES			number absent illegally	number at work illegally	number sent to school	PROSECUTIONS		number of truants	number sent to Conn school for boys	number sent to industrial school for girls	number sent to temporary homes

REPORT OF THE SECRETARY

SUMMARY OF TABLE

CAUSE OF PROSECUTION	Parent or guardian	Children	Employer
Failure to cause child to attend.....	48		
Truancy.....		20	
Illegal employment.....			4
Total.....			72

The following gives number of prosecutions in each year since 1897 :

	Parents' failure to cause child to attend	Neglect	Truancy	Incorrigible	Illegal employment	False certificates	Total
1897-8	31	15	17	..	1	..	64
1898-9	57	1	12	..	1	3	74
1899-1900	97	13	27	1	2	..	140
1900-1	75	17	30	..	7	..	129
1901-2	41	9	21	.	7	..	78
1902-3	40	2	19	..	3	..	64
1903-4	70	4	13	2	1	..	90
1904-5	48	2	17	1	4	..	72

TEACHERS

Summary of statistics, 1904-1905

Number of teachers in winter — male, 325; female, 4,269; total	4,594
Decrease —, 22; increase — female, 111; total increase	89
Number of teachers in summer — male, 319; female, 4,278; total	4,597
Decrease — male, 17; increase — female, 97; increase	80
Number of teachers continued in same school	4,379
Increase for the year	98
Number of teachers who never taught before	379
Average wages per month for male teachers	\$108.97
Increase for the year	2.34
Average wages per month for female teachers	46.67
Increase for the year	.89
Number of teachers whose wages was \$20 or less per month — male, 3; female, 13; total	16
Number of teachers whose wages was from \$20 to \$25 per month — male, 6; female, 99; total	105
Number of teachers who had attended some normal school	2,193
Number of teachers' meetings held during the year	77
Number of state certificates granted	244
Number of state certificates renewed	873
Number of state certificates in force	1,117
Number of superintendents giving full time to supervision	32

The following table gives number of teachers, the amounts paid annually for wages, and facts relating to teachers' examinations and teachers' meetings:

SUPERVISION

I

The following towns or districts have superintendents who devote all their time to the usual duties of supervision:

	Name of Superintendent
Ansonia	E C Andrews
Avon	J B McLean
Beacon Falls	D C Allen
Bethlehem	D C Allen
Bridgeport	C W Deane
Burlington	J B McLean
Canton	Edward D McCollon
Danbury (Center district)	Gilman C Fisher
East Granby	John B McLean
East Hartford	George W Dickson
Essex	A H Campbell
Fairfield	William A Wheatley
Glastonbury	A H Campbell
Granby	J B McLean
Hartford	T S Weaver
Hartford (South district)	Charles H Keyes
" (Brown district)	Charles L Ames
" (Arsenal district)	B Norman Strong

	Name of Superintendent
Hartford (North Middle district) . . .	W F Gordy
" (West Middle district) . . .	W I Twitchell
Huntington . . .	W D Hood
Manchester (South Manchester district) .	F A Verplanck
Meriden . . .	A B Mather
Middletown (City district) . . .	W B Ferguson
Naugatuck . . .	F W Eaton
New Britain . . .	G A Stuart
New Haven . . .	F H Beede
New London . . .	C B Jennings
Norfolk . . .	Wm H Millington
Norwich (Central district) . . .	N L Bishop
Orange (West Haven district) . . .	E C Stiles
Prospect . . .	Frank O Jones
Rocky Hill . . .	D C Allen
Saybrook . . .	W B Ferguson
Somers . . .	D C Allen
Southington . . .	Anna D Pollard
Stamford . . .	E C Willard
Suffield . . .	Daniel Howard
Waterbury . . .	B W Tinker
West Hartford . . .	W H Hall
Westport . . .	George H Tracy
Winchester . . .	Wm H Millington
Windsor . . .	Wm H Hall
Windsor Locks . . .	Daniel Howard
Wokcott . . .	Frank O Jones

II

The following towns or districts employ supervising principals, who, in most cases, combine teaching with supervision:

Derby . . .	John W Peck
Milford . . .	H I Mathewson
Norwich (West Chelsea District) . . .	J B Stanton
Torrington . . .	E H Forbes
Wallingford (Central district) . . .	W O Cartwright

III

The following acting visitors unite with supervision some other business or profession:

Bristol . . .	C L Wooding
Simsbury . . .	J B McLean

Ten towns have formed districts under section 3 chapter 195 of the public acts of 1903. The amount paid by the state to each town is given below.

Superintendents under section 3:—

Essex	\$200.00
Glastonbury	250.00
Huntington	480.00
Stratford	320.00
Norfolk	200.00
Winchester	400.00
Suffield	315.00
Windsor Locks	245.00
West Hartford	400.00
Windsor	400.00
	\$3,210.00

Under section 5 of the same act the state board of education has appointed agents to act as supervisors in the towns listed below. The amount paid by the state to each town is also given.

Agents under section 5:—

Avon	\$180.00
Beacon Falls	150.00
Bethlehem	105.00
Burlington	300.00
East Granby	120.00
Granby	210.00
Newington	150.00
Prospect	150.00
Rocky Hill	120.00
Saybrook	225.00
Somers	225.00
Wolcott	150.00
	2,085.00
	\$5,295.00

Reports of agents appointed to act as supervisors under section 5 of chapter 195 of the laws of 1903 are given:

Mr D C Allen	pages 69-73
Mr Frank O Jones	" 73-77
Mr W B Ferguson	" 77-80
Mr J B McLean	" 80-85

REPORT OF MR D C ALLEN

To Mr CHARLES D HINE

Secretary of the State board of education

Sir The following is a report of my work as an agent of the state board of education for the year 1904-1905.

My work as an agent has been that of a superintendent of schools and a compelling agent to enforce the school attendance and labor laws. The schools in five towns were assigned to me. They were Somers, Bethlehem, Beacon Falls, Rocky Hill, and Newington.

PLAN OF WORK

My plan of supervision has been the same as that of last year; visits to schools, reports from the teachers of work and school attendance, tests of children's work, teachers' meetings, investigation of irregular attendance, and attendance to school repairs and supplies.

SCHOOL BOARD MEETINGS

The most rapid progress in school supervision has been made in the towns where the school boards have met with me in regular school board meetings. These meetings have been held in four of my five towns. At these meetings I have presented plans for improving the school systems. Evidence of the progress and of the school conditions has also been shown. The meetings have been a means for establishing a pleasant working spirit between the members of the school boards and myself which in turn has been communicated to those townspeople who were interested in the subject of schools.

TEACHERS

For a number of the schools I have been unable to secure trained teachers because boarding places could not be secured in the vicinity of the schools. Residents of the neighborhood were hired to fill these vacancies. I am pleased to say, however, that in one or two cases these untrained teachers have shown ability in utilizing the suggestions given for the improvement of their schools. In such cases due encouragement has been given for retaining these teachers. In these towns, where it is practicable, these conditions will lead to the carrying of the children to the center. This will come when the people see that their schools are not up to the standard. At the present time many communities are satisfied if there is "no trouble" in the school. The question of time and energy well spent does not enter into the general estimation of a good school.

SCHOOL ATTENDANCE

The school attendance work of Canton, South Windsor, and Bloomfield was assigned to me this last year in addition to my supervision work. With few exceptions local officers have worked with me in enforcing the attendance and labor laws relating to school attendance. The enumeration lists and the school registration were carefully compared at the opening of school in September. Children of school age not in school were sent to school. By means of the monthly teachers' attendance reports sent to me, I have been able to give personal attention to cases of irregular attendance.

I have made a tabulated report of the school attendance work to you in another report. I believe that the returns from these three towns made by other officials will show an improvement this year over those of last year. In the returns of the towns where both supervision and attendance work was given to me my attendance records show a marked improvement compared with previous attendance reports.

NEWINGTON

Newington is one of the two new towns which were assigned to me this last year. This town has a grammar school in two buildings at the center, taught by three teachers. Three one room schools are scattered in different parts of the town, accessible by railroads. The two trained teachers of the teaching corps were doing good work. It has been necessary to replace the larger part of the teaching force for the coming year. A year of growth and of time well spent may be expected in the schools of Newington this year. Industry, interest, and right motives with good results should replace objectionable features of the past year.

One of the immediate necessities is provision for better school accommodations at the center of the town. The lower floor of the town hall is used for the five highest grades. The three lowest grades are taught in a separate building. This condition is detrimental to good school results. I am pleased to find that there is a desire on the part of the townspeople to provide a new building which will be comfortable and convenient.

REGISTRATION AND ATTENDANCE

SOMERS

The plan introduced last year for shortening the high school course of study from three years to one year has been carried out successfully. A class was graduated and will be admitted into the second year work at the Thompsonville high school this year.

Somers stands well in the list of towns of its size. It spends a good sum for schools and does it independently and without the aid of the average attendance grant received by many other towns. Its grand list is slightly above the required amount specified by law, which enables smaller towns to receive the additional assistance from the state.

BEACON FALLS

During the past year the schools of this town have made exceptional progress. The following newspaper article shows the attitude of the townspeople toward schools:—

"Flattering to Principal and Teacher.

"Reports from Naugatuck High school as to results of entrance examinations taken by seven pupils of the schools of this town are very flattering to Miss

Hattie Holstein, principal, and to DeWitt C Allen, superintendent, of the local schools. This was the largest and youngest class ever entering from here, the average being twelve years. All of the scholars but one, the youngest, will be able to enter this fall, and this one will take her examinations again in September. During the past year, under the supervision of Mr. Allen, the school has shown such a marked improvement over former years that the people of the town are beginning to take a more active interest in matters pertaining to school."

There is a small number of townspeople who are not yet in sympathy with the changes for the better. They are good people, and will in time co-operate with the majority.

Beacon Falls is a growing town. The registration has increased more than 26 per cent during the past two years. Last year an extra room was opened to accommodate the increased attendance. This year a kindergarten will be opened for the youngest children.

BETHLEHEM

The schools of Bethlehem are conducted under the district system. Under this system it is impossible to secure in the poorer districts necessary funds for repairing schoolhouses and providing school apparatus. A strong feeling has been aroused for town control, by which all the children would have equal school advantage. During the year money has been secured by subscription which, with assistance from the state, will provide the different districts with a partial supply of school apparatus.

The teachers of the outside schools for the coming year will be paid the same salary as is paid to the center school teacher. These teachers have smaller schools but they do not have the advantages of the center school teacher, who enjoys a larger community and better facilities.

ROCKY HILL

Rocky Hill is another new town added to my list for supervision. There is a four-room school at the center of the town. Two one-room outside schools are also maintained. I found the center school in good condition. This had received the careful attention of a member of the school board previous to my appointment. After replacing the primary teacher by a trained teacher an excellent school was in operation. At the close of the school year few better schools of the size could be found in the state.

The school board have been active and interested with me in giving careful attention to school business. Their assistance has been valuable.

REPORT OF MR F O JONES

Mr CHARLES D HINE

Secretary of the State board of education

Sir As agent of the state board of education to supervise the schools of the towns of Prospect and Wolcott, I present herewith my report for the school year 1904-5:

SUMMARY OF STATISTICS

PROSPECT

Number of schools	4
Number of teachers required	4
Number of teachers employed during the year, including four substitutes	11
Number of children between 4 and 16 years of age enumerated Oct 1, 1904	106
Number of pupils registered during the year	113
Average daily attendance	68.13
Number living in Prospect and attending high school in other towns	6

For some reason—probably because more towns each year are employing normal graduates—it is becoming more and more difficult to secure trained teachers to take country schools at moderate salaries.

While in September each of the four schools of Prospect were opened with a normal graduate in charge, two of these resigned during the fall term—one to take a better position, the other for private reasons—and it was impossible to find strong teachers to take their places. Since, without a good teacher, no school can be a success, these two schools suffered a set-back from the high standard which had been maintained in them for more than a year. While this was far from encouraging, I was able to give these schools sufficient attention to keep them from becoming absolute failures.

Better fortune attended my efforts in selecting teachers for Wolcott. This task was given me by the school committee immediately after my appointment to that town near the close of August, 1904.

There are five single-room, ungraded schools in Wolcott. Local teachers of some experience were secured for two of the schools, and graduates of normal schools for the other three. Two of these three teachers resigned, one during

the fall term, to be married, the other just before the opening of the winter term to accept a better salary in Torrington. Another normal graduate was finally found for the smaller of these schools and a teacher of several years experience for the other. These schools, therefore, were under either trained or experienced and, on the whole, capable teachers throughout the year.

The problem of securing good teachers for the small country towns is becoming a serious one. Even with the aid from the state which these towns now receive, it is impossible for them to pay sufficient salaries to attract trained teachers to schools in lonesome localities, far from the railroads and trolleys. Moreover, when trained beginners can be induced to take a country school, it is only for the experience which will fit them for places where better salaries are paid, and it is very seldom that they remain more than a year.

The superintendent in a country town, therefore, who succeeds in systematizing the schools and having certain policies carried out by the teachers, must do all this work over in detail each succeeding year. Of course he may derive encouragement if he can arouse the people of the community to a better attitude toward their schools, yet he has a large contract on hand to do this in the face of the fact that the teaching force may be expected to deteriorate from year to year, and in consequence good results from his work become less and less apparent.

One way of relieving the difficulty is to close the outlying schools and to convey the pupils to a large central school. This, however, is not always feasible, even where the inhabitants are sufficiently progressive to consider it. If more normal schools should be established, it is doubtful if they would draw a sufficient number of students to furnish the country schools with teachers unless salaries are considerably advanced.

It would seem, therefore, that it is necessary to find some means of increasing the salaries.

Where towns are already paying high rates of taxation on full valuation (a condition which exists in Prospect, for instance, the tax rate there being eighteen mills) they can hardly be expected to vote very large salaries for the teachers. The state has already made a liberal grant to towns having a valuation of less than five hundred thousand dollars, yet these towns are still unable to compete with the larger towns in securing and retaining efficient teachers. The question arises whether the state should undertake to maintain throughout its population equal opportunities for the making of citizens by granting more money to the towns under consideration. If so, this means that the larger centers must be educated to see that legislation to this end is necessary, not in the sense of giving the small towns special advantages, but to give the children of the small towns equal opportunities with those of the larger and wealthier towns.

A detailed account of the plans which I attempted to carry out and of the work done in the schools of both Prospect and Wolcott would follow so closely that given in my Prospect report for last year that it seems unnecessary to repeat it here.

The Wolcott school committee very cheerfully furnished several much needed sets of supplementary reading for the schools of that town, also a good set of wall maps for each school building.

Upon my recommendation, also, the committee of each town purchased a plan book for each teacher. In this she briefly outlined her plan of work for one week in advance, thus aiding the superintendent to keep in close touch with her work. The plan books were very helpful also in the event of a change of teachers.

The pupils of the various schools have been furnished with portfolios consisting simply of two pieces of cardboard fastened together with clips. A few samples of the pupils' work in the different subjects are placed in these portfolios and taken home once a month for the parent's inspection. This device makes it easy for both parent and superintendent quickly to observe the progress which the pupil makes from month to month. With most pupils also it is an incentive to better work.

During the year I arranged the following daily program, adapting to the needs of these schools the three-division program recommended in White's "School management":

REPORT OF THE SECRETARY

THIRD DIVISION PROGRAM

(Adapted from White's "School management.")

Time	Minutes	Primary	Intermediate,	Advanced
9.00-9.10	10	<u>Opening Exercises</u>		
9.10-9.15	5		<u>Articulation</u>	
9.15-9.40	25	<u>Reading</u>	<u>Arithmetic</u>	<u>Arithmetic</u>
9.40-10.05	25	Seat work ¹ (Rel to reading)	<u>Arithmetic</u>	<u>Lang or Gram</u>
10.05-10.30	25	Seat work (Another kind)	<u>Geography</u>	<u>Arithmetic</u>
10.30-10.45	15		RECESS	
10.45-11.10	25	<u>Number</u>	<u>Language</u>	<u>Geog or Hist</u>
11.10-11.35	25	Seat work (Rel to number)	<u>Language</u>	<u>Reading</u>
11.35-12.00	25	Dismissed	<u>Science</u> ⁴	<u>Physiology</u>
12.00-1.00	60	INTERMISSION		
1.00-1.05	5		<u>Spelling</u>	<u>Interpretation</u>
1.05-1.20	15	<u>Lang³ Nature study^{2*}</u>		<u>Prepare spelling</u>
1.20-1.45	25	Seat work (Rel to Lang)	<u>Reading</u>	<u>Geog or Hist</u>
1.45-2.10	25	Seat work (Another kind)	<u>Geography</u>	<u>Varied work</u>
2.10-2.35	25	Seat work (Change again)	<u>Varied work</u>	<u>Lang or Gram</u>
2.35-2.50	15		RECESS	
2.50-3.10	20	<u>Reading</u>	†	†
3.10-3.30	20	<u>Writing</u> ²	<u>Drawing</u> ¹	<u>Music</u> ³
3.30-3.55	25	Dismissed		<u>Reading</u>
3.55-4.00	5			<u>Spelling</u>

The subjects for study periods as well as for class exercises are indicated.

Class exercises are underlined.

Small figures at the right indicate the number of lessons a week in the subject thus marked.

History, below the advanced division, is taken as supplementary reading.

Civics is taken in the advanced division as supplementary reading.

Spelling in the primary division is taken in the period with the reading.

If conditions require still another subject to be taught in a certain division, two or three recitation periods a week may be obtained by giving written tests from time to time to another division in the place of its usual recitation.

It is urged that there be taken several times a day, one or two minutes of physical exercise with windows open.

This program is useful in schools in which several grades are represented.

With the large number of classes required for so many grades a wholly inflexible time schedule is not the most practicable. A review or a test lesson might be covered in ten minutes or less while the development of a new topic would require a longer time.

In a school having from six to nine grades represented, each one of the three divisions of this program would include two or three grades. The object in dividing the program thus is to give opportunity for a flexible schedule for the different classes within any one division, while holding strictly to the time schedule as far as any one division as a whole is concerned. For instance, suppose primary reading includes two classes, a beginning class and a second year

* Especially that leading up to geography.

† As may be provided for by the teacher.

class. Twenty-five minutes is the time allotted for both. The teacher could be governed by conditions as to whether she would give these classes an equal length of time, i. e., twelve and one-half minutes each, or whether she would give one class fifteen minutes and the other ten minutes, and the next day reverse that order; but the teacher is expected to begin the arithmetic indicated for the "intermediate" division as soon as the period of twenty-five minutes is ended.

ATTENDANCE WORK

From the tabulated report of my attendance work already presented, the following statistics are taken:

Number of cases of absence investigated	290
Number of families visited	22
Number of letters and notices to parents	72
Number of visits to schools	157
Number absent under legal excuses:	
disability	161
lack of clothing	1
at work legally	4
Number absent illegally	166
Number at work illegally	121
Number sent to school	35
	119

The work was performed this year much as it was last. I was able to correct ordinary irregularity of attendance by talking with the pupils during my supervision visits, thus arousing on the part of most of the children the proper attitude toward promptness and regularity. There are no factories in these towns. The children recorded as at work illegally were those under fourteen who were kept at home to work on the farm or to do housework. For these cases a letter or a visit to the parent was usually sufficient.

The most aggravated cases were the tardiness of the children of two families living about two miles from the schoolhouse. It was only through facing these families with immediate prosecution about once a term that I was able to induce them to cause their children to reach school with any sort of promptness.

I canvassed both towns in the fall and found in Prospect a family having four children between the ages of four and sixteen who had been overlooked by the enumerator.

This canvass was therefore of assistance to the town since the comptroller allowed the enumeration certificate to be corrected in accordance with the canvass, thus entitling the town to a larger sum from the enumeration grant.

Respectfully submitted,

FRANK O JONES

REPORT OF MR W B FERGUSON

MR CHARLES D HINE

Secretary of the State board of education

Sir The following report of the Saybrook schools for the year 1904-5 is respectfully submitted:

		STATISTICS						
Teacher	Grade	Registered	Average attendance	Cases of tardiness	Tardiness per pupil	Pupils promoted	Not promoted	Per cent promoted
F W Doane	} high sch	41	36.55	0	0	35	1	97

C Esther Cramer	i	45	34.4	12	.5	26	12	68
Mabel E Hollister	Winthrop school, ungraded	21	16.03	..	..	..	..	..

Of the eight regular teachers employed by the town of Saybrook, four were new to the schools at the beginning of the year, one other was re-engaged after an absence of several years, and two had taught only in the training school at South Manchester. And yet, notwithstanding the fact that so many of the teachers were strangers to the schools, the year has been a most successful one in every respect. It would be difficult to find a school anywhere in which a more orderly, studious, and enthusiastic spirit on the part of the pupils or a more earnest and sympathetic spirit on the part of the teachers prevailed. The work was intelligently and thoroughly done, as the percentage of pupils promoted indicates.

CHANGES IN TEACHERS

I regret that there will be as many changes in the teaching staff the coming year as there were the past year. Two teachers who received less than \$400 per year in Saybrook, and one of whom had previously taught only in the training school, have accepted positions in New Jersey that pay \$600 the first year and more each year thereafter until a large maximum is reached. Such changes, while regrettable, are inevitable, if young, able, and ambitious teachers are secured. Such teachers cannot be expected to be satisfied until they have reached "the top." First-rate talent usually demands, and sooner or later commands positions paying first-rate salaries. A country school that can secure such talent at all is fortunate. A teacher of ability, force, and professional ambition is worth far more during her earliest years of teaching than is a teacher who has only experience to recommend her. Fortunately it sometimes happens that thoroughly successful teachers are willing to remain in a country or village school on a small salary, often much smaller than they could command elsewhere, because they wish to live at home. Deep River is thus fortunate. To lose a superior teacher is always a matter of deep regret, but the loss of a good teacher is less harmful than the retention of a poor one. The vacancy caused by the resignation of the superior teacher may be successfully filled, but the poor teacher is a constant bar to progress, a positive menace to the school's intellectual, and often to its moral welfare. I therefore always advise that young teachers of uncommon ability, of high scholarship, high ideals, and ambition, of all those qualities of personality and character that insure large success, be preferred to second or third rate teachers of longer experience, that these teachers be kept as long as possible, and, when they leave, that others of similar qualifications be secured. In this way a superior school can be maintained without great cost. Of course the hiring of inexperienced teachers and the frequent changes make intelligent supervision very desirable, but fortunately Connecticut towns can now secure such supervision without great expense.

METHOD OF SUPERVISION

The method of supervision that was followed last year has been followed this year. Teachers have kept for my inspection all the written work done by their pupils in all their studies one or two days each week. By looking these over I have been able to see quickly the nature and quality of the work in all its aspects of substance and form, to note the progress made from week to week, in subject matter, method, and accuracy of work, and thus to make any needed suggestions intelligently and note the success with which they were followed. My train arrived in Saybrook sufficiently early to allow me nearly an hour for the inspection of papers before the beginning of the morning session. I have, therefore, been able to devote the greater part of the sessions to the observation of actual teaching and the examination of classes.

THE WORK OF THE YEAR

The work of the year has been along the lines indicated in the new course of study, which was nearly completed last year, but which was not published until the spring term of the year just closed, as it was thought best to test it thoroughly and to make any desirable modifications before printing. The course provides for thorough instruction in the common branches throughout the eight years of the

primary and grammar school, and considerable attention is given to nature study in the primary grades and to history in all the grades above the third. The course in history includes Grecian, Roman, English, and American history with the use of suitable books. It is thought that to confine the work entirely to American history, as is done in many schools, is exceedingly unwise. If the time be judiciously divided between the histories of important ages and countries, the pupils' intellectual horizon will be greatly enlarged, a truer estimate and appreciation of our own history will be realized, and a livelier and more abiding interest in the subject will be awakened. The course is preceded by a brief discussion of educational principles and methods as they underlie and may be exemplified in the teaching of the different subjects.

The instruction in music has been continued as last year, Miss Bertha Rockwell,* supervisor of music in the Middletown schools, going to Deep River once every two weeks to supervise the work. It is hoped that arrangements can be made to have instruction given in drawing the coming year. This was not found to be possible during the past year.

HIGH SCHOOL COURSE

The high school course has been lengthened to four years, and a second assistant has been engaged for the coming year. Laboratories will be equipped for the thorough teaching of physics and chemistry, and a full year's course will be offered in each. A fourth year of Latin and English, two years of French and German, thorough courses in history, and more extended work in botany, geology, and astronomy than could be offered heretofore, will be given. It is expected that graduates of the school will be fully prepared for college and other higher institutions of learning.

TEACHERS' MEETINGS

Teachers' meetings have been held quite regularly during the year. Roack's "The method of education" and McMurry's "The method of the recitation" have formed the basis of papers and discussions. Each teacher reported upon certain chapters of one of these books. Among the many topics discussed were the following: Fundamental principles, their application in the teaching of reading, spelling, arithmetic, language, history, geography, variety versus uniformity in methods of instruction, illustrative lessons showing processes and reaching general truths, individual and general notions, general concepts the goal of instruction, application of general notions, laws underlying processes in teaching.

THE WINTHROP SCHOOL

The Winthrop school has had during the year, and probably for the first time in its history, the services of a normal trained teacher. It is also to have such a teacher the coming year, a graduate of the Willimantic normal school. I know of no reason why the children of a country school should not be provided with just as good instruction as is given the children of the village or city school. To provide thus for the children in these schools should be the purpose and policy of every board of education having them in charge. If somewhat higher wages have to be paid trained teachers, the additional cost is as nothing in comparison to the greater value of the services received. I state this as a rule to which, of course, there are exceptions, for not every normal graduate is a conspicuous success, nor is every untrained teacher a conspicuous failure, but the probabilities of success are altogether in favor of the trained teacher.

EVIDENCES OF PROGRESS

Saybrook intends to have good schools, and is getting them. As evidence of this may be mentioned the calling away of her teachers at large salaries, thus indicating the superior ability of her teaching force, her up-to-date course of study for the primary and grammar grades, the lengthened high school course, and the enlarged laboratory facilities, the additional high school teacher, the increase in the salaries of all the teachers, and to anybody who will visit the

schools, the splendid spirit that pervades the classes, and the superior character of the work done.

Respectfully submitted

W B FERGUSON
Superintendent

REPORT OF MR J B MCLEAN

Mr CHARLES D HINE

SIMSBURY CONN 1905

Secretary of the State board of education

Sir I submit the following report of my work as supervisor of schools of the towns of Avon, Burlington, East Granby, Granby, and Simsbury:

ATTENDANCE AND METHODS OF SECURING IT

Schools, however good, cannot benefit absent pupils, and the absence of part of the children works against the advancement of those present. For this reason my early and continuous effort has been to secure the attendance of all the children who should be in school.

Twice during the year, I have made a thorough canvass of the towns under my charge, and have accounted for every child enumerated. The teachers have been furnished with blanks and instructed to report all absences of the week every Friday, together with the reasons for the same so far as they were able to procure them. Such cases as seemed to require attention, not having reasonable excuse for absence, were noticed the following week by seeing the delinquents at their schools, or by a call upon or letter to the parent or guardian. The result of this system has been encouraging. The prompt notice of unnecessary absence has tended to check carelessness in the matter. The percentage of attendance has increased in all schools when and where normal conditions have prevailed. One result of this system has been in many instances to arouse the anger of parents against the official whose duty it has been to require a reasonable obedience of the law.

I find as a rule that people are inclined to resent being told that they must send their children to school. Such as have good reason for not sending them are nearly always courteous and gracious in explaining the same. They whose reasons are patched up, questionable and insufficient are often very unreasonable when required to respect the law. Believing that the ideal conditions demand appreciation and loyal support, rather than unwilling and forced obedience, I have tried to cultivate a better understanding of and feeling toward the law and its agents, as friendly, not hostile to the highest interest of the family, community, and state. To this end I have found the personal interview the surest way to success. Letters, especially if they contain anything in the nature of a command or threat, are very apt to arouse a spirit of anger and resistance. They are often misunderstood, or half understood, and there is not the same opportunity for explanation and mutual understanding as in conversation. For this reason I have tried as far as possible to meet such as have seemed indifferent, careless, or intentionally negligent in requiring their children to attend school with regularity.

The result has been, in most instances, to establish a feeling of good will and confidence, and often one of loyal support.

I have found the failure to appreciate the opportunity offered for the education of their children confined to the few. With many this appreciation is very full and praiseworthy.

I have found parents toiling, sacrificing, denying themselves everything except the barest necessities, in order to keep their children comfortably clad and in school. I have also seen, frequently, a fortitude on the part of children, sometimes but thinly clad, facing bitter winds and storms, struggling over roads blocked with snowdrifts, that seemed almost heroic.

The prevalence of epidemic and contagious diseases during the latter part of the winter and early spring caused much sickness and necessary irregularity in attendance.

The great difficulty in properly heating and ventilating the average country schoolhouse is doubtless responsible for much sickness and consequent loss of time. Greater vigilance on the part of the health officer would often prevent the spread of contagious diseases.

GRADING, OUTLINE OF WORK, EXAMINATIONS AND PROMOTIONS

As soon as possible, after taking up work, the pupils were classified in nine grades. The absence, in a part of my territory, of anything in the nature of a systematic and comprehensive plan of work, covering the school life of the child, made this somewhat difficult and at first experimental. While some subjects had been given proper attention others had been sadly neglected.

In most of the schools the "language" was from one to three years behind the grade. It will take at least another year to balance up the work.

The following outline of work was arranged for the year:

OUTLINE OF STUDY

Reading, spelling, and writing will not be classed strictly by grades. Usually two or even three grades may be classed together for this work, except in the lower grades. These subjects are *very important*, and should have careful attention. The series of readers may be dropped with the sixth grade and supplementary readers used. I do not give a list of such, as the books I might name may not be and others equally good may be available. Use the best you can get. Make the reading supplement the other work as far as possible, viz.: geography readers in connection with geography, history readers with history, and literature and folk lore readers in connection with the English. The memorizing of choice selections for recitation, though old-fashioned, is a most excellent practice, and I earnestly advise it.

Spelling should be a daily exercise for all grades. This should usually be a written exercise rather than oral.

Writing should be a daily exercise until a good hand has been formed. Pupils who have formed a neat, legible hand may be excused from this; but the teacher should insist on care in writing all exercises.

Work for results in these subjects. Good handwriting, correct spelling, and the ability to read aloud with ease of expression are among the most valuable accomplishments.

ARITHMETIC

Grade	i	Count, read, and write numbers to 100. All combinations of numbers to 10.
Grade	ii	Read and write numbers to 1,000. All combinations to 50.
Grade	iii	Read and write numbers to 1,000,000. All combinations to 144.
Grade	iv	Notation and numeration to twelve places. Addition. Subtraction. Multiply and divide by one digit.
Grade	v	Multiply and divide by two or more digits. Simple work in decimal fractions.
Grade	vi	Decimal and common fractions. Simple work in weights and measures, memorizing tables.
Grade	vii	More difficult work in weights and measures. Compound numbers complete to percentage. Metric system.
Grade	viii	Review percentage and proportion.
Grade	ix	Powers and roots, mensuration. Complete and review.

Arrangements will be made for elementary work in algebra for pupils preparing for high school when it is required.

Teachers should give constant miscellaneous review work in higher grades, using problems not found in text-book used by pupils. Keep up the review work.

Pupils should strive for order and neatness as well as correctness in executing work.

HISTORY AND CIVICS

- | | | |
|-------|------|--|
| Grade | ii | Stories of America before occupied by Europeans. Stories of Indian life, homes, dress, ornaments, food, weapons, etc. |
| Grade | iii | Stories of discovery and exploration. |
| Grade | iv | Stories of early settlements. |
| Grade | v | Stories of Colonial life and Indian wars.
For the above grades the teacher should be the book, reading or telling the stories. Encourage questioning by pupils. What the teacher narrates one day, let the pupil narrate the next. Give the iv and v grades topics to write, making it a language as well as a history lesson.
Make it a daily exercise when possible, even if not more than five minutes are given. |
| Grade | vi | Give pupils a text-book to study, with this grade. Study Indian life and period of discovery and exploration and settlement to 1733. |
| Grade | vii | Review and study period of Colonial history to war of Revolution. |
| Grade | viii | Review and study Revolutionary war and Constitutional period to Civil war. |
| Grade | ix | Review and complete, using as many authors as are possible. |

Give eighth and ninth grades one lesson weekly in civil government. The management of topics for this subject will be given with period outlines.

GEOGRAPHY

- | | | |
|--------|-------------|---|
| Grade | ii | Stories of home geography.
Natural features of land and water.
Map of the world. |
| Grade | iii | Map of North America and United States.
Stories of different sections. |
| Grade | iv | Maps of North America and South America.
Stories as above. |
| Grade | v | Maps of Europe, Africa, and Australia.
Stories as above. A few minutes, only, daily will accomplish much. No book required, but may be used if teacher prefers. |
| Grade | vi | Frye's Elements of geography, complete, may be used, in part, as a reader. Keep up map work by occasional reviews. Tests for this grade will not require much detail in physiography. |
| Grade | vii | Frye's complete. Study from page 27 (North America) to page 99 (Races of men), and from page 158 to supplement. |
| Grades | viii and ix | Frye's complete. <i>Entire</i> .
Map drawing.
Emphasize study of New England and Connecticut. |

ENGLISH

- | | | |
|-------|---|--|
| Grade | i | Simple exercises in sentence building, reproduction of simple stories, description of pictures, etc. |
|-------|---|--|

- Grade ii Continue oral work as above.
Written work — building sentences.
Simple use of periods and capitals.
Letter writing and simple narration and description.
- Grade iii Continue written work as above, extending practice in punctuation and use of capitals.
- Grade iv Continue as above, emphasizing letter writing.
Short themes. Topics may often be taken from history or geography studies. Use of common abbreviations.
- Grade v Above work may be continued. Elementary or first book may be used if teacher desires.
For Grades vi-ix, different texts being in use in the different towns, I arrange outlines for each text in use.
- Grade vi (Burlington and Simsbury) Hyde's Lessons in English, No 1
To be completed.
- Grade iv Continue as above, emphasizing letter writing.
Short themes. Topics may often be taken from history or geography studies. Use of common abbreviations.
- Grade v Above work may be continued. Elementary or first book may be used if teacher desires.
For grades vi-ix, different texts being in use in the different towns, I arrange outline for each text in use.
- Grade vi (Burlington and Simsbury) Hyde's Lessons in English, No 1
To be completed.
(East Granby) Southworth & Goddard's First lessons in English, complete.
(Avon) Mother tongue, Book i, complete.
(Granby) Swinton's Language lessons, complete.
- Grade vii Hyde's Lessons in English, No 2, complete.
Southworth & Goddard's Composition and grammar to page 126.
Mother tongue, No ii, to page 135.
Swinton's New English grammar, Sections i and ii.
- Grade viii Hyde's Practical English grammar, complete.
Southworth & Goddard, complete.
Mother tongue, No ii, to page 319.
Swinton, complete.
- Grade ix (Simsbury and Burlington) Buehler's English grammar, complete; Southworth & Goddard, Review; Mother tongue No ii, Complete and review; Swinton, review.

All the above are to be supplemented by much practice in parsing, analysis, and composition. The latter should be kept up also by Grades vi, vii, and viii. At least one theme a week.

The theme work of Grade ix will be associated with studies in literature. Candidates for high schools will use the selections for study required by the school they plan to enter.

PHYSIOLOGY

The texts in use in the various schools will be used. Topics will be given for study with each period outline.

Grades ix, viii, vii, and vi may form one class and will have written examinations. Grades below vi may have oral work only.

In addition to this outline of the work of the year, I have given the teachers an outline of the amount of work expected to be covered by each grade, in each subject, for each half term or period of six weeks. This has enabled me to keep informed as to the work of the teachers and has made it possible to carry forward the work of representatives of the same grade in the several

schools with a degree of uniformity. At the close of these periods of six weeks I have given sets of questions, to be used for written tests, for all grades above the fifth, and in some subjects down to the first grade. After each examination I have received reports from the teachers giving the standing of all pupils in all subjects. Both daily class marks and examination marks were used in estimating rank of pupils. This system has helped me to keep watch of the progress of the individual pupil as well as of the class. Near the close of the school year tests were given covering the entire work of the year in all grades. In estimating the rank for the year, daily class marks, period test marks, and final test marks were averaged. A rank of 70 per cent was required for promotion.

But few failed to attain this standard. I have tried to be watchful lest system should interfere with the best interest of the individual pupil and changes of grade have been made during the year when it seemed advisable.

This system, requiring tests of the thoroughness of the work and a standard for promotion, seemed to arouse, at first, considerable apprehension on the part of parents, and the children, entirely unaccustomed to this kind of work, approached these examinations with not a little anxiety and excitement, not understanding that a single failure would never drop a pupil capable of doing average daily work.

This feeling is passing away as experience and more thorough preparation give confidence. The improvement in the neatness, order, and correctness of papers handed in by the pupils during the year has been very marked, and the training these tests have given in orderliness, accuracy, concentration and self-control have proven of great value.

At the close of the school year, public exercises, together with an exhibit of the school work, have been given in each town. These have been well attended and have done much in the way of interesting the public in the work of the schools.

TEACHERS' MEETINGS AND VISITING DAYS

Teachers' meetings have been held at various times, in the several towns, during the year. In all twenty-one meetings. These have been well attended and very helpful in planning the work.

More frequent meetings of this character are desirable, but the teachers located in the more remote districts find it very difficult to attend, as it necessitates a drive of ten to twelve miles, and a conveyance is not always obtainable. Many of the teachers have taken a "visiting day." I am not able to judge of the benefits derived from this practice. That I may be better able to do so, and that all may profit from the observation of each, in the future a report of these visits will be called for at the teachers' meeting following.

VISITING THE SCHOOLS

The following is a record of the number of visits made upon the schools of the several towns: Town of Avon, one hundred and one visits; town of Burlington, one hundred and twenty-six; town of East Granby, fifty-four; town of Granby, one hundred and seventeen; and town of Simsbury, one hundred and ninety-nine, a total of five hundred and seventy-seven visits. This is an average of more than three visits for every school day of the year.

The object of these visits is never to take the work of the school out of the hands of the teacher, but rather to observe the methods of the teachers, to consult with them concerning special cases of negligence in attendance, discipline, scholarship, the health and sanitary condition of the school, and to examine the written work of the pupils and compare the marking and grading of them by teachers.

OUTLOOK AND THINGS NEEDED FOR IMPROVEMENT

The school homes in many districts are not what they should be. This is particularly true of the towns that cling to the old "district system." The fact that a district tax must be assessed for even minor repairs tends usually towards the indefinite postponement of such matters. The present buildings might be made, in many instances, much more attractive. A fresh coat of paint, varnish,

and whitewash would cost little and add much to the neatness of the rooms. More frequent cleaning and disinfecting should be required by law. The equipment of many rooms is very incomplete, and the success of the teacher is handicapped by want of proper tools with which to do her work. Very few schools have any playground a part of the school property. A good playground is a very important part of the equipment of a good school. Every intelligent observer must agree that the public schools are doing a work indispensable to the commonwealth and nation.

The school is the most important institution in any community, and the school home—the schoolhouse and grounds—should be the pride of every community. While there is very much to be done, there is a growing sentiment in this direction which is most encouraging.

This increasing interest on the part of parents, more enthusiasm and skill on the part of teachers, combined with the greater liberality on the part of towns and state, should bring about a rapid and positive improvement in the schools.

Appreciating fully the loyal support of school officers in carrying out my plan of work,

Very respectfully submitted

J B McLEAN

Supervisor

TEACHERS' MEETINGS

The following table shows the number of teachers' meetings from September 1, 1904, to September 1, 1905:

Date	Place	No of speak- ers	No in at- tendance	Date	Place	No of speak- ers	No in at- tendance
Sept 23	Norfolk	1	50	7	Stratford	1	60

STATE EXAMINATIONS

The record covers the period from January 1 1905, to January 1 1906:

Number of examinations held	91
Number of different candidates	562
Number of examination papers	3,645
Number of preliminary papers	444
Number of certificates granted	244
Number of certificates renewed	873
Number of certificates in force	1,117

SCHOOLS

Summary of statistics, 1904-1905

Number of towns in the state	168
Number of districts in the state	859
Number of public schools	1,518
Decrease for the year	1
Number of departments in public schools	4,292
Increase for the year	88
Number of one-room schools	989
Number of schools of two departments	154
Number of schools of three departments	56
Number of schools of four departments	76
Number of schools of five departments	21
Number of schools of six or more departments	201

SCHOOLS.

87

Average length of public schools, in days	188.73
Decrease for the year	.35
Whole number of graded schools	508
Number of towns having high schools	69
Number of high schools	79
Number of evening schools	31
Number of normal schools	4
Number of public kindergartens	123
Number of schools at temporary homes	7

Below will be found a summary for thirty-one years (1876 to 1906 inclusive) :

TABLE XXXVII

Report of	Average length	No districts	No public schools	No of depart-ments	*No of graded schools	No one-room schools	Evening schools
1876	176.26	1,506	1,650	2,499	264	..	..

DIAGRAM

The following graphic shows changes in length of school year since 1876 :

NORMAL SCHOOLS

ATTENDANCE

The number of students in attendance at the normal schools in the year 1904-1905 was

New Britain	.	.	.	.	264
Willimantic	.	.	.	.	90
New Haven	.	.	.	.	201
Danbury	.	.	.	.	43
					598

The number in attendance in the several years beginning with the school year 1889 has been

	1889	1890	1891	1892	1893	1894	1895	1896	1897	1898	1899	1900	1901	1902	1903	1904	1905
New Britain	265	300	335	328	191	194	236	211	200	231	251	272	272	237	236	239	264
Willimantic	27	70	79	67	76	69	87	119	124	124	110	104	95	95	87	90	90
New Haven	..	..	..	..	98	209	200	173	181	182	189	221	226	226	189	190	201
Danbury	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	43
	292	370	414	395	365	472	523	503	505	537	550	597	593	558	512	519	598

ENTERING CLASSES

The entering classes in the fall of 1905 were

New Britain	.	.	.	.	116
Willimantic	.	.	.	.	47
New Haven	.	.	.	.	126
Danbury	.	.	.	.	41
					330

The entering classes in the years since 1889 were as follows:

	1889	1890	1891	1892	1893	1894	1895	1896	1897	1898	1899	1900	1901	1902	1903	1904	1905
New Britain	128	150	205	193	122	108	148	123	104	151	149	157	154	120	118	142	116
Willimantic	27	43	41	46	41	37	41	77	58	64	53	58	50	48	45	45	47
New Haven	..	..	..	..	98	133	124	109	119	110	109	146	146	123	108	124	126
Danbury	..	..	..	..	..	..	..	..	..	..	..	..	..	..	..	46	41
	155	193	246	239	261	278	313	309	281	325	311	361	350	291	271	357	330

GRADUATES

The number of graduates in 1905 was as follows:

New Britain	.	.	.	.	93
Willimantic	.	.	.	.	40
New Haven	.	.	.	.	74
					207

The number graduated in all the years since 1889 is as follows:

	1889	1890	1891	1892	1893	1894	1895	1896	1897	1898	1899	1900	1901	1902	1903	1904	1905
New Britain	80	72	66	91	87	74	70	55	63	74	75	78	88	88	85	93	93
Willimantic	..	..	22	26	18	26	23	26	33	45	47	39	31	30	30	20	40
New Haven	..	..	..	..	..	..	52	66	58	55	63	61	72	73	95	81	74
	80	72	88	117	105	100	145	147	154	174	185	178	191	191	210	194	207

WHOLE NUMBER OF GRADUATES

New Britain	.	.	.	.	.	2,253
Willimantic	.	.	.	.	.	452
New Haven	.	.	.	.	.	753

TEACHERS

The following table shows number of teachers in normal and training departments:

NORMAL SCHOOLS	TEACHERS			
	In normal school		In model and practice schools	
	Men	Women	Men	Women
New Britain	5	5	1	35
Willimantic	3	4		11
New Haven	4	3	1	30
Danbury	3	4	1	8

TOWNS REPRESENTED AT NORMAL SCHOOL

The following table shows the towns from which students have entered the normal school in the years 1883-1905, inclusive, with the number that entered from each town in each year

REPORT OF MARCUS WHITE

To the secretary state board of education

Sir The annual report of the state normal-training school at New Britain for the year 1904-1905 is herewith respectfully submitted. The attendance for the year was as follows:

Seniors	.	.	119
Juniors	.	.	142
Special students	.	.	3
Total	.	.	264

Pupils were registered from the following states:—

Connecticut	.	.	254
Colorado	.	.	1
Massachusetts	.	.	3
Maryland	.	.	1
New Hampshire	.	.	1
New Jersey	.	.	3
Vermont	.	.	1

Fifty-seven towns within the state were represented as follows:—

Avon	1	Hartford	39	Southington	10
Bristol	13	Hebron	1	South Windsor	1
Burlington	1	Manchester	8	Stafford	1
Canton	2	Meriden	8	Stamford	2
Chester	2	Middletown	19	Stonington	1
Cromwell	1	Naugatuck	1	Suffield	2
Darien	1	New Britain	38	Torrington	1
East Granby	2	New Canaan	2	Vernon	1
East Hartford	6	New Hartford	2	Wallingford	2
East Lyme	1	New Haven	2	Waterbury	10
East Windsor	6	Newington	1	Watertown	1
Ellington	4	New London	1	West Hartford	1
Enfield	13	Norwich	3	Wethersfield	3
Essex	1	Plainville	1	Wilton	1
Farmington	8	Plymouth	1	Winchester	2
Greenwich	1	Portland	4	Windsor	4
Griswold	1	Prospect	1	Windsor Locks	2
Groton	1	Simsbury	1	Wolcott	1
Guilford	3	Somers	3	Woodstock	1

The graduating class of June, 1905, numbered ninety-three. The address before the graduating class was delivered by Professor Edward L Thorndike of Columbia University, and the diplomas were presented by His Excellency Governor Henry Roberts.

LIST OF GRADUATING CLASS

19

Several important changes in the school faculty were made during the year. Miss Alice O'Grady, the head of the kindergarten department, was called early in the year to the Chicago normal school, and Miss Josephine E Pinney, of grade I, to the Courtland, New York, normal school, where she now has charge of the primary training. At the close of the year the resignations of Miss Kate McMahon, Miss Caroline T Robbins, and Mr Henry T Burr were received. Miss McMahon, who had been at the head of the kindergarten department since the resignation of Miss O'Grady, resigned to accept a position in the Teachers' college, New York City. Mr Burr was elected principal of the state normal school, Willimantic, and Miss Robbins was forced by ill health temporarily to give up teaching. By the resignation of these teachers the New Britain normal school suffered a very great loss. They were all teachers of exceptional ability, and they had served the interests of the school and the state to the utmost of their power. Special mention should be made of the services of Miss Caroline T Robbins. Miss Robbins became a teacher in the normal school in 1893, and during the years that she was connected with the school, the excellence of her instruction and the force of her character were powerful influences in the lives of the young women who came in contact with her. She carries with her the wishes of all for her speedy recovery.

The vacancies caused by these resignations were filled by the election of Miss Katherine Stoughton as teacher of grade I, Miss Eva L McConkey, formerly kindergarten director of the Massachusetts state normal school at North Adams, as director of the kindergarten department, Mr Herbert N Loomis of the New Haven normal school as head of the science department, and Mr Matthew P Adams, a graduate of Harvard University, as teacher of physics and chemistry.

INCREASED TRAINING FACILITIES

The demand made upon our model schools within recent years for the training of the normal school pupils has been altogether too great. There were not enough children to afford adequate practice for the training classes. By an arrangement with the town of New Britain the Bartlett school has now been turned over to the state board of education for use as a model school. The

Bartlett school contains seven rooms and a kindergarten, and has an enrollment of about 325 pupils. By this arrangement the training capacity of the model schools will be nearly doubled. It is too early in the year to make a report concerning the work in the school, for it was only upon September 5th, 1905, that it came under the direction of the normal school.

In accordance with the new terms of admission, nearly all the pupils who now enter the normal schools of Connecticut are high school graduates, and from most of the high schools more young ladies now go to normal schools than to college. It would seem that the time has now come when an understanding might be reached between high schools and the normal schools, as a result of which young women entering the normal schools might be better fitted to do the work demanded of them. These high school graduates are separated by four years from the work which they did in the grammar school grades, and they have forgotten much they formerly knew. By the end of the third year in the high school most of them ought to know whether they intend to go to a normal school or not, and to those who do so intend an opportunity should be given to review certain branches as a preparation for the normal school work, a privilege now given only to those who intend to enter college. But few of the teachers in the grades below the high schools are specialists, the great majority being expected to carry on the entire work of their schools. Even where special teachers are employed, the regular teachers are expected to be proficient enough to carry on the work outlined by these special teachers. The demand comes to us, not for a teacher who can teach arithmetic *or* history *or* drawing *or* singing, but a teacher who can teach arithmetic *and* history *and* drawing *and* singing, etc. Yet with many of these subjects, a knowledge of which is essential to success in teaching in the common schools, the high school graduate is less familiar than when she entered the high school. I know of no way in which the efficiency of normal school graduates can be better promoted, than by the recognition, on the part of high schools, of the important part they can play in the training of public school teachers.

Respectfully submitted
MARCUS WHITE

REPORT OF MR HENRY T BURR

September 15th 1905

To the secretary of the state board of education

Sir, The report of the Willimantic state normal school for the year ending August 31st, 1905, is herewith respectfully submitted.

Hartford	5	4	Litchfield	2	2
New Haven	3	3	Middlesex	2	2
New London	34	12	Tolland	5	5
Windham	37	8			
			Total	88	36

At the opening of the school year of 1904-5 the faculty of this school and the grade schools under its control contained eleven new members.

Henry T Burr had been chosen to succeed George P Phenix as principal. Miss Miriam S Skidmore had been elected supervisor of training.

Louis T Morse succeeded Edwin C Andrews as principal of the model school. Miss Elizabeth Cleasby had been appointed teacher of the first grade, Miss Annette Hinds of the second grade and Miss Alice M Crowell of the third grade. Miss Fannie A Bishop had been placed in charge of the kindergarten, with Miss G Vivien Brown as assistant.

Miss Elizabeth Earle and Miss Harriet Stevens had been appointed teachers at the Oaks.

Shortly after the opening of school Miss Maude E Love was appointed supervisor of drawing.

Under the circumstances the opening of the schools would have presented many difficulties were it not for the foresight and kindly interest of the retiring principal and supervisor. To them we owe a debt which we gratefully acknowledge.

No attempt has been made to change in a radical way the existing order. The teachers of the model schools have been asked to assume a somewhat larger responsibility for the students in training, and we are endeavoring to utilize the upper grades more fully for training purposes.

On June 6th the school board of the town were requested to transfer to the state board of education the control of the school at South Windham. This school is easily accessible by trolley, and would serve to illustrate some phases of school organization and teaching that cannot be shown in the fully graded schools of the first district. This request was not made until after the teachers of the South Windham school had received their appointments for the next year. This fact involved some complications which rendered it advisable that the state should withdraw its request for the time being.

It has become clear that the present contract between the state and the town does not cover the question of compensation for the services of special teachers and teachers in the outlying districts. It is very desirable that such unsettled questions should be definitely and permanently adjusted, either through a new and more comprehensive contract or by special agreement.

The class graduating in June, 1905, numbered forty. All have secured positions. Of these, sixteen are in graded schools, nine are in partly graded schools, and fifteen are in ungraded schools.

The correspondence course has, I believe, demonstrated its value. The work has been very satisfactory in quality and well sustained. The total enrollment has been eighty-three. Thirty-five have finished one or more courses. The present entering class will contain three students who were first attracted to the school through correspondence work.

The school has lost the services of Mr Harry Houston, supervisor of writing. He is succeeded by Mr George H Dickson.

Miss Alice E Phelps will replace Miss Alice M Crowell in the third grade of the model schools. Miss Harriet M Bass and Miss Nina M Pierre will replace Miss Elizabeth Earle and Miss Harriet Stevens at the Oaks. Miss Mabel Spencer is to have the upper room at the Windham school. Her predecessor, Miss Adelaide Hallen, resigned to accept a more responsible position at Warehouse Point.

Shortly before the opening of school in September, 1904, A W Fuller, engineer, and Edwin C Sweet, janitor of the normal school building, were discharged. Their places were filled by John F Keogh and John N Williams. The service and general condition of the building have been greatly improved. In May Mr Keogh was transferred to the school at Danbury. Guy H Melvin has been engaged in his place.

Respectfully submitted,

HENRY T BURR *Principal*

REPORT OF MR ARTHUR B MORRILL

To the secretary of the state board of education

Sir The report of the state normal-training school at New Haven for the year ending June 23, 1905, is herewith respectfully submitted.

The attendance for the year was as follows:—

Seniors	.	.	77
Juniors	.	.	124
Total	.	.	201

There was only one change in the corps of teachers. Mr H N Loomis, teacher of science, went to the normal school at New Britain, and Mr F F Burr, a graduate of Harvard university, took his place at New Haven.

Seventy-four pupils graduated from the school in June, making the whole number of graduates seven hundred and fifty-four.

The work of the normal school during the year has not been varied by any unusual event. The course has been carefully watched with reference to economy and profit. The time is short, and should be used to the greatest advantage for the special purpose of the school.

Certain features of the arrangement of the work have been especially fortunate. It has been possible since the school was established to carry on the work of a large school, one of the largest in New England, with a small corps of teachers, thus keeping the rate of expense per capita very low. This can be verified if the expense of the school during twelve years of its existence be examined and be compared with the number of pupils prepared by this school for work in the common schools.

The teachers in the normal department have been prepared in normal schools, and therefore each one has been capable of doing normal school work in a variety of subjects. The teacher of drawing, for example, has also done other work, thus saving a specialist. The same has been true of writing. The work in gymnastics has been done at the Anderson normal school of gymnastics, which is located not far away. This has saved the expense of a gymnasium in the state building.

Drawing is a subject that has received special attention. It has been for a long time obvious that much time has been wasted in drawing in the public schools. Much expense and attention have been devoted to various details that have been included in this part of the common school course, such as clay modelling, painting with colors, brush work with ink, crayon work, etc. Yet when pupils, after a long school course, are asked to draw with the lead pencil simple outlines for the purpose of expressing some idea, they do not show facility commensurate with the time spent on the subject. They are not as ready to draw as to write. In view of these facts, it has been the purpose of this school to plan for a more profitable course in drawing. It has been proved that it is fruitless to attempt more than there is time for in the common school course. Only a small amount of time can be afforded for such work as drawing. Like all arts, it requires much practice.

In order to carry this out in the common schools pencil work should be begun early in the school course, and practiced continuously through the grades until the end. If this singleness of purpose be adhered to, and the necessary amount of practice given for the accomplishment of at least one thing in drawing, namely, the use of the pencil in expressing ideas, then there may be some hope of making drawing worth while in elementary education. Pupils should be made to see that drawing is especially useful in expressing ideas that cannot be so economically expressed by oral or written language. This is its practical value, and is exemplified by pictorial illustration, which is so common today.

In this connection, the claim that children can be profitably trained to appreciate the æsthetic significance of the fine arts by such work as they are given to do, is contrary to facts and experience. Appreciation of good pictures can be most economically aroused and fostered by observing the best pictures. It would seem as reasonable to try to write poetry in order to learn to appreciate

the best in literature, as to try to draw or paint as the best way of learning to appreciate the fine arts.

These statements concerning drawing have been put into this report as a record of the plan for drawing in the common schools that this normal school has tried to promote.

Respectfully

ARTHUR B MORRILL

REPORT OF MR J R PERKINS

To the secretary of the state board of education

Sir The school at Danbury opened September 6th, with thirty-three pupils. This number was afterwards increased to forty-four.

The town generously offered the use of the third floor of the new high school building, with laboratory, library, and recitation room necessary. This was possible, as the high school had only three classes, the fourth not to enter for one year.

The following teachers were appointed:

Sara M Armstrong
Mathematics, geography, gymnastics
Jane Lord Burbank
English, history
Harry Houston
Penmanship
Emelene A Dunn
Drawing
Marion Tweedy
Music
Ella M Brush
Librarian

In May the school secured the services of Maria W Bishop, of the normal school at Courtland, New York, as teacher of methods. Lothrop D Higgins, of the Morgan school, Clinton, was appointed in June as teacher of science.

A library of 1,500 carefully selected books was accumulated during the year and constantly used by teachers and pupils. The students were trained in the use of books.

The school board offered the use of the public schools for observation. Every pupil visited some room at least once a week.

During the year Miss Dunn has given a course of illustrated art lectures. These were intended primarily for the pupils but were attended by many others.

On the whole, the year was successful. Without doubt the normal school at Danbury will fill a long-felt want. The citizens of the town have appreciated its value and co-operated with the state board of education.

The object of the school is to train teachers. Therefore the courses of instruction emphasize those things which would be of practical use to pupils when they become teachers. In the main the work is professional and practical rather than academic.

J R PERKINS

HIGH SCHOOLS

High schools may be divided according to the provisions of law under which they are organized into

town high schools (consolidated system)	41
town high schools (district system)	20
district high schools	18
	79

CLASSES

Classifying the schools according to the number of years in the high school course:

i

The following school has a five years' course:

Torrington

1

ii

The following schools have a four years' course:

Ansonia	Huntington	Simsbury	
Bethel	Killingly	Southington	
Branford	Litchfield	South Windsor	
Bridgeport	Manchester	Stafford	
Bristol	Meriden	Stamford	
Canton	Middletown	Stonington 3	
Cheshire	Morris	Suffield	
Colchester	Naugatuck	Thomaston	
Derby	New Britain	Vernon	
East Hartford	New Haven	Wallingford	
Enfield	Newtown	Waterbury	
Farmington	Norwalk	West Hartford	
Glastonbury	Orange	Windham	
Greenwich	Portland	Windsor	
Groton	Putnam	Windsor Locks	
Guilford	Salisbury 2	Woodbury	53
Hartford	Seymour		

iii

The following schools have a three years' course:

Danbury	Norwalk 2	Sharon
Madison	Old Saybrook	Stonington
Middlebury	Orange	Stratford
Milford	Plymouth	Watertown
New Milford	Saybrook	Westport
North Canaan		

17

iv

The following schools have a two years' course:

East Lyme	Old Lyme	South Windsor
New Hartford	Somers	Wethersfield

v

The following schools have a course of one year:

New Haven	Westville	Plymouth
-----------	-----------	----------

HIGH SCHOOL PRIVILEGES

In eighty-three towns the school visitors consented to the attendance of children at a non-local high school and received from the state the amounts found in table XLV, pages 113-114.

The towns are as follows:

Andover	Franklin	Plymouth
Ashford	Goshen	Pomfret
Avon	Granby	Preston
Barkhamsted	Griswold	Prospect
Beacon Falls	Haddam	Redding
Berlin	Hamden	Ridgefield
Bethany	Hampton	Rocky Hill
Bloomfield	Hartland	Salem
Bolton	Harwinton	Saybrook
Bozrah	Hebron	Scotland
Brookfield	Kent	Sherman
Brooklyn	Lebanon	Somers
Burlington	Ledyard	South Windsor
Chaplin	Lisbon	Sprague
Chatham	Mansfield	Sterling
Chester	Marlboro	Thompson
Colebrook	Middlefield	Tolland
Columbia	Monroe	Trumbull
Coventry	New Canaan	Voluntown
Cromwell	New Fairfield	Warren
Darien	New Hartford	Washington
Durham	Newington	Waterford
East Granby	North Branford	Watertown
East Haven	North Haven	Willington
East Windsor	Old Lyme	Wilton
Ellington	Oxford	Wolcott
Essex	Plainfield	Woodbridge
Fairfield	Plainville	

The following towns did not maintain high schools and did not pay high school tuition fee at non-local high schools:

Bethlehem	Easton	Roxbury	
Bridgewater	Killingworth	Southbury	
Canaan	Lyme	Union	
Canterbury	Montville	Westbrook	
Clinton	New London	Weston	
Cornwall	Norfolk	Winchester	
Eastford	North Stonington	Woodstock	23
East Haddam	Norwich		

The following public high schools were approved by the state board of education for the attendance of nonresident scholars for the year 1904-5:

High schools approved	Number non-local students	High schools approved	Number non-local students	High schools approved	Number non-local students
Bethel	10	Meriden	7	South Windsor	3
Branford	3	Middletown	112	Stamford	57
Bridgeport	42	Naugatuck	3	Suffield	13
Bristol	6	New Britain	58	Torrington	15
Canton	15	New Hartford	5	Vernon	41
Cheshire	13	New Haven	55	Wallingford	2
Colchester	12	New Milford	2	Waterbury	9
Danbury	16	Newtown	10	West Hartford	7
Enfield	33	Norwalk	23	Wethersfield	1
Farmington	9	Plymouth	3	Windham	81
Hartford	18	Putnam	41	Windsor	2
Huntington	4	Saybrook	12	Windsor Locks	1
Killingly	69	Seymour	2	Woodbury	1
Manchester	7	Simsbury	12		

The following endowed and incorporated academies were approved for the attendance of nonresident scholars for the year 1904-5:

Academy in	Number non-local students	Academy in	Number non-local students
Clinton	5	Norwich	50
New London (2)	21	Winsted	5
		Woodstock	2

HIGH SCHOOL BUILDINGS

In the following towns there are buildings used exclusively for high school purposes:

Bethel	Madison	Stamford
Bridgeport	Meriden	Suffield
Bristol	Middletown	Torrington
Cheshire	New Britain	Vernon
Danbury	New Haven	Waterbury
East Hartford	Putnam	Windham
Glastonbury	Southington	
Hartford	South Windsor	

REGISTRATION

The registration by classes or years is as follows:

First year	3929	Fifth year	60
Second year	2510	Graduate students	120
Third year	1807	Unclassified	53
Fourth year	1219		
Total			9698

EXPENSES

Teachers' wages	\$364,101.39
Fuel and incidentals	119,080.65
	\$483,182.04

If the high school occupies a building with other grades, the items of cost properly chargeable to each cannot be separated.

STATISTICS

Table XLIII is compiled from the returns of high school principals and school visitors.

toll bridge	1	
Number who used bicycles	1	774
Paid by state	\$9,226.69	
" " towns	9,476.17	
Total	<u>\$18,702.26</u>	

The payments by the state recorded in the foregoing table were made under the provisions of the law passed in 1903, which reads as follows :

SECTION 1 Any town in which a high school is not maintained shall pay the reasonable and necessary cost of railway or other transportation of any child who resides with his parents or guardian in said town and who, with the written consent of the school visitors or town school committee, attends a high school in another town; provided, that such high school be approved by the state board of education. Such necessary and reasonable cost of railway or other transportation shall be paid annually by the town treasurer upon the order of the chairman of the board of school visitors or town school committee.

SEC 2 Every town shall, annually, in July, receive from the treasurer of the state an amount equal to one-half of the aggregate of the sums which have actually been paid by the town for transportation under the provisions of section one of this act; provided, that not more than twenty dollars shall be paid by the state for each scholar conveyed.

SEC 3 The number and names of the children so conveyed to high schools in towns other than those in which they reside, the names of the high schools which they have attended, and the amount paid by the town for the conveyance of each child shall, on or before the first day of July in each year, be certified to the state board of education by an acting school visitor, under oath, of the town in which the children reside. On application of said board the comptroller shall draw an order on the treasurer of the state in favor of the town for the amount provided in section two of this act.

EVENING SCHOOLS

The table on page 119 shows the registration, attendance, and expense of evening schools for the school year 1904-5.

SUMMARY

The following gives a summary of statistics of evening schools for the years 1888-1905 :

TABLE XLVII — EVENING SCHOOLS																	
REPORT OF YEAR	Number of schools	RECEIPTS				EXPENSES				REGISTRATION		ATTENDANCE		TEACHERS			
		received from state	town or district treasury	other sources	total	teachers' wages	fuel and incidentals	rent	other objects	total	number under 14	number over 14	whole number	average under 14	average over 14	male	female

KINDERGARTENS

The growth of public kindergartens has been steady, as the following statement shows:

TABLE XLIX

Year	Number	Number children
1889-90	5	628
1890-91	10	1,038
1891-92	15	1,113
1892-93	27	2,765
1893-94	34	3,061
1894-95	39	3,537
1895-96	53	4,257
1896-97	63	5,201
1897-98	63	5,377
1898-99	77	6,895
1899-1900	81	6,999
1900-1901	84	7,377
1901-1902	94	7,752
1902-1903	94	7,435
1903-1904	94	8,620
1904-1905	123	9,362

Kindergartners have been unwilling to teach more than half a day, making kindergartens very expensive. The kindergarten has been displayed and exploited as a remedy for all children's evils, and kindergartners have talked as if there were mysteries in the games and occupations. The public was led to expect too much and was disappointed, while the children trained in kindergartens entered life very much like other children.

Doubtless untrained enthusiasts as well as fools are responsible for much of the criticism that the kindergarten apparently deserves. The kindergarten cannot be justly blamed for the exaggerations of its advocates nor for incompetent teachers.

The idea of arousing interest of children even if the stimulus be amusing games has been of incalculable value in modern education. Schools ought to be interesting and attractive. The kindergarten impresses this view with great power upon the minds of well trained and well balanced teachers. Whenever the kindergarten insists upon and emphasizes interest by useful and systematic work, an important and influential contribution to good teaching is established. The ability to observe with care, to speak and copy correctly, has a beneficial and lasting effect on all the later processes of education.

Again, the children form right habits from regularity in work and reasonable rules for behavior. They learn their relations to the teacher and to one another and may become more polite and kind than if they were left to their own ways or the whims of parents. This is very valuable to those, whether rich or poor, who are not brought under steady and intelligent training at home.

In fine, though the kindergarten has not worked miracles it has contributed worthily to education. There is danger that light-headed persons may attach too much value to mysteries and go too far in amusement.

KINDERGARTENS

121

KINDERGARTENS

The following table summarizes returns from kindergartens for the year 1904-5.

ARBOR AND BIRD DAY

In 1905 the governor issued the following proclamation:

"A law of the state of Connecticut provides that at this season of the year one day shall be set apart to consider the culture of the trees and the protection of the birds, and in cordial sympathy with this law I hereby appoint Friday, May the fifth, as Arbor and Bird Day.

"And I recommend to all the people of this state that they endeavor to make some fitting observance of that day, remembering that the welfare and beauty of our towns and cities require that we shall attend to the growth and preservation of our shade trees and forests.

"And I especially recommend that the teachers in the schools lead the children in the pleasant task of studying the ways of nature, that thus they may learn to take an interest in the culture of trees, to know the birds, and to find delight in these blessings which a kind Providence has given us.

HENRY ROBERTS

PRIVATE SCHOOLS

Since 1888 private schools have made returns. A summary for fourteen years is given below:

TABLE LVII

Report of year	Number of schools	Registered	Average attendance
1893	...	22,814	16,236
1894	...	23,939	16,455
1895	195	25,965	19,113
1896	180	25,678	18,986
1897	167	26,377	19,984
1898	158	27,352	21,476
1899	194	29,983	22,581
1900	177	30,083	22,154
1901	166	31,190	23,475
1902	161	31,347	23,456
1903	186	35,063	25,837
1904	166	33,686	25,282
1905	163	33,740	25,242
1906	172	35,239	25,849

The enrollment at ecclesiastical schools is 26,499, and at business colleges 2,481.

SCHOOLHOUSES AND LIBRARIES

Summary of statistics, 1904-1905

Number of schoolhouses in the state	1,594
Number of new schoolhouses built during the year	30
Number of schoolhouses reported in poor condition	108
Decrease for the year	15
Number of sittings in public schools	179,848
Number of schools having libraries	914
Number of books in school libraries	221,062
Number of districts drawing state money during the fiscal year	285
Amount of library grant paid from state treasury to districts in fiscal year ended September 30, 1904	\$6,910.00
Number of free public libraries receiving state grant of books	73
Number of public libraries	158

SCHOOL LIBRARIES

The following table shows the number of districts drawing, the amount of the annual state grants, and the amount expended by the districts:

TABLE LVIII

Report of year	No districts drawing	Amount received from state treasury	Amount expended
1866	94	\$590.00	\$635.00
1867	94	515.00	1,242.12
1868	80	865.00	1,580.71

FREE TEXT-BOOKS

The legislature of 1905 passed an act which reads as follows:

Concerning free text-books and school supplies

Every town which has not heretofore directed its school visitors, town school committee, or board of education to purchase, at the expense of the town, the text-books and other school supplies used in the public schools of said town shall, at its annual town meeting in 1905, vote by ballot to determine whether the said school officers shall purchase text-books and supplies under the provisions of section 2135 of the general statutes. At the said annual town meeting in 1905, the selectmen shall provide a ballot box plainly marked "free text-books," and in towns divided into wards or voting districts, for annual town meetings, a ballot box marked as aforesaid shall be provided at each of such wards or voting districts. Those electors who are in favor of directing the said school officers to purchase text-books and supplies under the provisions of said section 2135 shall deposit in said ballot box a ballot with the words "free text-books yes" written or printed thereon, and those who are opposed shall deposit a ballot with the words "free text-books no" written or printed thereon. The ballots cast shall be examined, sorted, and counted, and the results declared, in the manner provided by law, and if a majority of the ballots so given in have the words "free text-books yes" said school officers shall purchase such text-books and supplies under the provisions of said section 2135.

The result of the ballot in 118 towns is given below:

Town	Yes	No	Town	Yes	No	Town	Yes	No
Andover	21	18	Franklin	27	26	Plainfield	216	169

* Not kept as separate item

From this it appears that 53 towns had acted under the existing law and prior to 1905 voted to furnish free text-books. The total cost in the year was \$71,085.57 and the average cost per child registered was seventy-nine cents.

The following table summarizes the reports of school officers for six years:—

TABLE LXIII

Report of year	No of towns	Cost to towns	Cost per scholar registered
1900	32	\$38,591.84	\$0.72½
1902	38	28,196.04	.39
1903	40	43,184.56	.58
1904	44	55,624.41	.73
1905	51	75,125.69	.83
1906	53	71,085.57	.79

If all towns comply with the law, one hundred and twenty-four will furnish, and fifty-six will not supply children with text-books without charge.

CONVEYANCE OF CHILDREN

The table on page 145 gives facts relating to conveyance in year 1904-1905. This table does not include high school conveyance. [See pages 115-116.]

The "number of schools closed" refers to schools closed for the school year 1904-5, and in most cases does not include those hitherto reported as closed.

The following summaries are of interest:

1	Number of schools closed	83
2	Number of children conveyed	1,162
3	Expense	\$22,410.14

The average annual expense per scholar is \$19.28.

The following table summarizes the returns of eight years:

TABLE LXIV				
Year	Number towns	Number schools closed	Number children conveyed	Expense
1897-8	44	84	849	\$11,416.25
1898-9	49	85	773	10,752.38
1899-00	45	80	639	9,817.03
1900-01	49	59	780	12,837.57
1901-2	57	51	946	16,100.56
1902-3	60	58	1148	17,717.01
1903-4	73	114	1272	21,739.83
1904-5	65	83	1,162	22,410.14

While the law is generally administered wisely, by the closing of local schools many children are compelled to walk unreasonable distances,—are illegally and unreasonably deprived of schooling. The following law requires towns to furnish accommodation by transportation or otherwise, but it has not proved effective in the special cases of isolated and remote families where transportation is expensive.

LAW

§ 47 Every town in which a school has been discontinued shall furnish, whenever necessary, by transportation or otherwise, school accommodations so that every child over seven and under sixteen years of age can attend school as required in section 17. If any town refuses or neglects to furnish such accommodations, the parent or guardian of any child who is deprived of schooling, or any agent or officer whose duty it is to compel the observance of the laws concerning attendance at school, may, in writing, request a hearing by the town school committee, board of school visitors, or board of education, as the case may be, and said officers shall give such person a hearing within ten days after receipt of his written request therefor, and shall make a finding within ten days after said hearing.

§ 48 Any parent, guardian, or officer aggrieved by said finding may take an appeal therefrom to the board of selectmen, which shall give a public hearing in the town in which the cause of complaint arises. If it appears that any child is illegally or unreasonably deprived of schooling, said board shall require the proper school officer to make arrangements to enable the parent or guardian to comply with the provisions of section 17.

CONVEYANCE OF CHILDREN

145

TABLE LXV—CONVEYANCE OF CHILDREN

town	number schools closed	number children carried	cost for year 1904-1905	remarks
Ashford.....	4	7	\$55.20	Paid by the day. Plan satisfactory to parents
Beacon Falls.....	1	22	468.00	Satisfactory to parents, and beneficial to schools
Bozrah.....	1	1	75.50	Satisfactory to parent who was paid for conveying child to school
Branford.....	1	46	1,111.65	Satisfactory to parents and beneficial to schools
Bristol.....	8	1	176.00	Satisfactory to parents and beneficial to schools
Brooklyn.....	1	1	80.00	Satisfactory to parents and beneficial to schools
Canterbury.....	1	4	16.31	Satisfactory to parents and beneficial to schools
Cheshire.....	5	51	468.00	Satisfactory to parents and beneficial to schools
Colebrook.....	2	9	300.00	Satisfactory to parents and beneficial to schools
Columbia.....	2	13	253.60	Generally satisfactory to parents and beneficial to schools
Danbury.....	4	1	17.00	Satisfactory to parents and beneficial to schools
East Haddam.....	1	9	84.31	Parents paid. Plan was not satisfactory to parents, but was beneficial to schools
East Haven.....	30	30	542.60	Satisfactory to parents and beneficial to schools
Easton.....	10	10	85.00	Carried every school day. No dissatisfaction has been heard. Plan beneficial to
East Windsor.....	4	38	505.00	Satisfactory to parents and beneficial to schools [schools
Ellington.....	13	13	310.50	Satisfactory to parents and beneficial to schools; have better attendance and can
Enfield.....	5	78	1,091.80	Satisfactory to parents and beneficial to schools [classify children better
Fairfield.....	4	63	1,340.00	Plan satisfactory to parents for the most part. Decidedly beneficial to schools
Farmington.....	6			It might be better if town owned and built the wagons
Franklin.....	1	5	22.75	Satisfactory to parents and beneficial to schools
Griswold.....	3	21	173.00	Satisfactory to parents and beneficial to schools
Hebron.....	1	3	400.45	Apparently satisfactory to parents and beneficial to schools
Harwinton.....	3	5	80.98	Fairly satisfactory to parents. The benefit was in uniting two small schools
Huntington.....	4	45	60.00	Fairly satisfactory to parents. Doubtful benefit to schools
Killingly.....	4	32	950.00	Satisfactory to parents with one exception. Very beneficial to schools
Killingworth.....	1	4	626.25	Satisfactory to parents and beneficial to schools
Lebanon.....	3	1	10.00	Conveyed when weather is bad
Lisbon.....	1	1	9.00	Conveyed by parents. Plan satisfactory
Mansfield.....	2	12	76.00	Conveyed by parent. Plan satisfactory to parent
Marlboro.....	1	4	197.50	Probably satisfactory to parents and beneficial to schools
Meriden.....	15		90.00	Satisfactory to parents and beneficial to schools
New Britain.....	40		400.00	No complaint from parents. Beneficial to schools
New Milford.....	1		412.00	Satisfactory to parents and beneficial to schools
Norfolk.....	2	2	8.00	Satisfactory to parents
North Haven.....	1	11	28.80	Satisfactory to parents and beneficial to schools
Old Saybrook.....	75		141.00	Satisfactory to parents and beneficial to schools
Plainfield.....	8		412.09	Satisfactory to parents and beneficial to schools
Plainville.....	25		168.80	Satisfactory to parents and beneficial to schools
Plymouth.....	1	5	360.00	Satisfactory to parents and beneficial to schools
Pomfret.....	1	3	186.00	Satisfactory to parents and beneficial to schools
Prospect.....	3	3	180.00	Satisfactory to parents and beneficial to schools
Redding.....	1	5	35.00	Parents accepted what was paid them. Plan was plainly of benefit to the
Ridgefield.....	2	8	35.00	Not entirely satisfactory to all parents. Beneficial to schools
Roxbury.....	1	3	270.00	Satisfactory to parents and beneficial to schools
Scotland.....	50		30.00	Satisfactory to parents
Somers.....	1	1	1,060.60	Satisfactory to parents
Southington.....	15		36.00	Satisfactory to parents
Stafford.....	4	34	342.00	Not very satisfactory to parents. Fairly beneficial to schools
Stamford.....	20		1,478.70	Not satisfactory to parents; beneficial to schools in one or two cases. Parents do not like to expose children to long rides over the hills in wintry weather, therefore are not as strict in enforcing attendance as they should be
Sterling.....	15		70.00	The plan has been followed for several years, and has been very satisfactory to all
Stonington.....	7		352.00	Satisfactory to parents. Not beneficial to schools [concerned
Stratford.....	1	53	450.00	Satisfactory to parents and beneficial to schools
Tolland.....	3	8	928.00	Satisfactory to parents and beneficial to schools
Trumbull.....	3	3	133.75	Satisfactory to parents and beneficial to schools
Union.....	1	2	4.90	Not satisfactory to parents. Children irregular in attendance
Voluntown.....	3	3	98.00	Satisfactory to parents and beneficial to schools
Washington.....	1	9	105.30	Satisfactory to parents and beneficial to schools
Watford.....	8		207.00	Not entirely satisfactory to parents, but seemed the best plan obtainable. Bene-
Watertown.....	1	2	261.25	Satisfactory to parents and beneficial to schools
West Hartford.....	82		60.00	Satisfactory to parents
Willington.....	2	3	1,793.20	Satisfactory to parents and beneficial to schools
Winchester.....	21		62.60	Satisfactory to parents and beneficial to schools
Windham.....	2	64	334.00	Satisfactory to parents and beneficial to all
Woodbury.....	5		2,025.85	Satisfactory to parents and beneficial to schools
Wolcott.....	1	7	40.00	Satisfactory to parents and beneficial to schools
			204.00	Not satisfactory to parents, but beneficial to schools
65 towns.....	83	1162	22,410.14

36 towns	\$99,406.87	\$55,895.46	\$43,511.41	56.2	43.8

In twenty-five towns the State paid a moiety or more of the total expenses of schools. In none of these towns does the State have any voice in the management of schools.

Both the enumeration and average attendance grants must be expended for teachers' wages; table lxix shows the amounts expended for teachers' wages and the portion paid by the state.

TABLE LXIX

36 towns	\$35,767.29	\$14,267.25	\$50,034.54	\$81,606.47	\$34.70	61.3

In these towns the amounts expended for teachers' wages was \$81,606.47 of which the state contributed by average attendance and enumeration grants \$50,034.54 or 61.3%. The state did not select the teachers nor supervise the teaching.

It also appears that the state paid more than one-half the wages of the teachers in twenty-five towns while the qualifications of the teachers and the quality of the teaching were wholly subject to local control.

In table lxx are exhibited and compared the cost of schooling children two years before the law took effect and two years after; also the amounts raised by taxation in the several towns at the same periods

TABLE LXX

Weston	18.59	28.30	917.06	1,031.50
Willington	15.62	22.08	1,386.75	812.68
36 towns			\$49,409.56	\$43,511.41

From the foregoing it appears that twenty towns diminished taxation for schools. They did not raise as much for schools after as before the average attendance law became operative. The grant has therefore relieved these towns from taxation for school purposes and they contribute less to the support of schools than formerly.

Table lxxi measures roughly the change which the law has wrought

1 Every town increased the wages of teachers. The average monthly wage in 1902 was \$26.38, in 1905 \$34.70, an advance of 69%. The State contributed the whole of this increase.

2 The number of trained teachers in 1902 was 27, in 1905 48, an increase of 8%. It follows that the increase of wages was generally made to teachers of the same qualifications as before the act was passed. Merit was not considered and the teaching did not improve. The law has not fulfilled its purpose of securing better teachers by paying larger wages.

TABLE LXXI

Town	Teachers				Certificates		Teachers' wages	
	number		trained		state

							av wages	av wages
36	258	253	27	48	23	62	26.38	34.70

The increase of wages in these towns has withdrawn teachers from ineligible to eligible towns not always to the advantage of the latter. If wages continue to increase in eligible towns the other towns in the vicinity will be obliged to increase wages.

Reports do not indicate any substantial improvement in the equipment and condition of schoolhouses. Many schoolhouses are in a disgraceful condition; they are neither habitable nor respectable.

The law has not benefited the schools by increasing the number of trained and qualified teachers. Persons who have intended to attend the normal schools are allured by the wages and teach without preparation. The law has operated to diminish the number of trained teachers.

The advance in teachers' wages is distinct but as has been stated the increase is wholly paid by the state. If there were evidence that this increase was always or generally accompanied by improvement in qualifications the advance would be encouraging.

PROCEDURE

The procedure preparatory to application for the grant by the State board of education is as follows:—

I. A statement of expenses is obtained

AVERAGE ATTENDANCE BLANK 2

Average attendance grant
Town.....

1 SCHOOL YEAR

(a) School year began ended
(b) Number of weeks number of days
(c) Number of days schools actually in session

2 AVERAGE ATTENDANCE

Aggregate attendance in days
[Whole number of days that all scholars in town have actually attended school during the year]
Average attendance

3 TEACHERS' CERTIFICATES

Names of teachers	Kind of certificate (State or town)	Date of certificate
.....		
.....		

4 GRAND LIST OF TOWN

\$..... for year.....

Proceeds of four mill tax

5 RECEIPTS

Raised by tax on grand list	\$....	Received from high school tuition grant	\$....
Received from town deposit fund		" " high school conveyance grant	
" " local funds		" " supervision grant	
" " enumeration grant		" " library grant	
		" " other towns	

6 EXPENSES

Teachers' wages	\$.....	Supervision	\$.....
Fuel and incidentals		High school tuition fees	
Buildings		" " transportation	
Sites		Transportation	
Permanent improvements		School libraries	
Principal of debt		Paid to other towns	
		[not high school charges]	
Interest on debt		Other expenses	

.....secretary

2 The grand list of the town is obtained. The list on which a tax is raised to meet the school expenses for the school year covered by the grant is used. This grand list determines whether the town is eligible.

3 The statement on blank 2 must show that the town has raised and expended for schools the proceeds of a 4-mill tax. It is not essential that a 4-mill tax to cover school expenses be specifically levied. If the town has actually expended the proceeds of a 4-mill tax on its grand list the law is satisfied.

4 The average attendance must be ascertained from the registers and verified. The attendances for the year (a day is an attendance) of all children residing in the town and attending a public school are added and the sum divided by the number of days the schools have actually been in session during the year.

Children residing in one town and attending with the consent of the school visitors an approved high school in another town can be included in the average attendance.

5 The next inquiry is whether the town has actually expended for schools \$25 multiplied by the average attendance. The expenses of the town can be exhibited as suggested in 1 above [blank 2].

6 In ascertaining the amount for which application shall be made in favor of any town, the amount expended from other sources shall first be ascertained and shall include not only the amount raised for the support of schools by local taxation but also all amounts paid for such purpose from the state treasury whether for school libraries or high school tuition fee or conveyance of children to school or supervision, or generally for support of schools; and only so much shall be applied for as will be necessary in addition to the amount so expended from other sources to make the total amount expended during the year for the support of schools \$25 for each child in average attendance.

The method of keeping town accounts does not always permit a clear statement of the source of teachers' wages. If the teachers' wages for any year exceed the average attendance and enumeration grants the town has probably fulfilled the conditions.

TRADE SCHOOLS

An act approved June 3 1903 runs as follows:

Resolved by this Assembly Section 1 That the governor be and is hereby directed to appoint a commission consisting of three persons, whose duty it shall be to investigate practical means and methods of industrial and technical education.

Sec 2 Said commission shall, on or before February 1, 1906, report to the general assembly at its session to be held in 1905, and shall make such recommendations for legislation as it may deem wise.

Sec 3 No member of said commission shall receive any compensation for services as such member, but the commission may expend a sum not exceeding five hundred dollars for incidental and necessary expenses incurred in the discharge of its duties, and said sum shall be paid by the treasurer upon the order of the comptroller, with whom the commission shall file proper receipts and vouchers.

The governor appointed Mr Lewis Sperry of Hartford, Mr Max Adler of New Haven, and Mr John H Whittemore of Naugatuck as members of the commission.

The report of this commission was presented to the General assembly of 1905. By vote this report was continued to the General assembly of 1907.

REPORT

The commission appointed to consider the matter of trade schools beg leave respectfully to report that they have carefully looked into the question which they were directed to investigate.

This question is one which touches very closely the prosperity of the Commonwealth and is allied with other educational problems. At present it may fairly be said that the schools of the ordinary sort in the cities and large towns of the State are efficient, well managed, and are doing successfully the work for which they were established. In the smaller towns also considerable progress has been made toward the improvement of the schools, as is shown by the successive reports of the State board of education. There are also within the limits of the State four institutions of higher learning, Yale university, Trinity college, Wesleyan university, and the State agricultural college. Within a few years the trend of educational advance has been very distinctly toward the scientific studies. This demand has been met by establishing scientific courses in our high schools and by growth in the same direction in the colleges. More recently still there arose a demand for what is called manual training. It was felt that boys and girls were losing something by not being trained to use their hands. In earlier times this sort of training came naturally and inevitably in the simple country life of most of our fathers. The boys and girls on the farms and in the small towns of fifty years ago found in their occupations and in their games

just the sort of education which is now provided to some extent by the manual training departments and the manual training schools.

A higher technical education has also been provided for to a considerable extent by the scientific departments of the colleges and universities named above.

A technical school is that which fits highly educated men for the duties included under the general term, Engineering; some branches of which are civil engineering, mechanical engineering, electrical engineering, mining engineering, etc. The State college at Storrs provides for a special training in agriculture, and has, according to the catalogue of 1903-4, well patronized courses in wood working and in forging, as well as classes for instruction in some of the various occupations which are entered upon by young women. There is, however, in the State, no technical school of exactly the type represented by the Massachusetts institute of technology.

Manual training, as stated above, has been introduced as a department in a large number of our schools and a very fine example of a manual training school of a high class is afforded by the Boardman school in New Haven. The work of this admirable institution, indeed, tends toward that which should be done in a trade school.

This title, "Trade school," however, is applied to something which differs in purpose and in method from either the manual training school or the technical school. Both of these lap over into the work of the trade school, but they really have a different purpose. The object of a trade school is to offer to boys primarily, and to girls also if they desire to avail themselves of its privileges, the opportunity to learn a definite, specific, wage-producing trade.

Normally a boy would enter upon the work of such a school at about the time at which he now finds himself prepared for the high school. Nevertheless such an institution should provide for the needs of much older persons who have missed the chance of learning trades earlier; and also, by means of evening sessions, should enable workmen to improve themselves in skill or to learn new occupations while still engaged in daily labor.

The need for schools of this sort seems to your commission to be immediate and pressing. Connecticut's record in industrial life is one of which our citizens are justly proud. The inventive capacity of a son of Connecticut is recognized everywhere. The skill of our workmen, members of a generation about to pass off the stage, is beyond dispute. This natural adaptability and this acquired skill have been prominent factors in developing and maintaining the prosperity and good repute of our Commonwealth.

It seems to your commission that there is now grave danger lest these advantages should not be transmitted to our immediate successors. The demands made upon skilled workmen are now, perhaps, greater than ever before; but the provision for training skilled workmen in the State is practically nil. The boy of scientific tastes who has the time and money can without difficulty fit himself for the engineering professions, either in this State or elsewhere, as he may elect. The boy who wishes to learn the use of his hands as a part of his general training or as contributing to a minor issue in his life, finds his requirements met by the manual training schools. The boy whose tastes lie in the direction of business seeks for and finds positions from which he can work up to the highest standing, and he may find in most of our cities business colleges or courses in the high schools which meet his requirements. A boy who looks forward toward one of the older three of the learned professions finds that the way is made easy for him all the way to his degree in law, theology, or medicine. The farmer's boy who wishes to follow his father's profession is able to learn at a State institution, at a very moderate expense, all the latest theories and most approved methods of modern agriculture. But the boy who wishes to learn what we mean by "a trade" finds that there is small chance for him in Connecticut. There are institutions in one or two of the larger cities only; and here instruction is given leading not so directly to a trade as to a position from which one can learn a trade easily.

The apprentice system of our forefathers has practically broken down. Very many establishments do not receive apprentices at all. When an apprentice does seem to get his chance he finds too frequently that the desire of employers to make gain from the cheap, premature work of boys, and the preoccupation in their own tasks of skilled laborers who should be his teachers, cooperate to prevent any proper instruction of apprentices in any trade whatever.

Two results follow from the state of things outlined above. First, that an altogether too large proportion of our boys seek other employments than that of skilled labor at the handicrafts. Second, that boys who do find their way into the ranks of the various trades are very poorly instructed. They undertake work knowing very little about how it should be done, and from this follows dissatisfaction on the part of employers, resentment on the part of the employed, disappointment of those for whom ultimately the work was done. The aggregate of poor work now being done by the younger members of the various trades in the State of Connecticut would greatly surprise anyone who has not made an investigation of the matter.

The trade school is an attempt to remedy this state of things.

It is an attempt to offer to boys at slight expense, or no expense at all, the opportunity to become really skilled in some branch of productive labor. If the plan were entirely experimental your commission would hesitate to recommend its serious consideration by the legislature. But trade schools have been established and are in successful operation in a great many parts of our country. One of the most informing examples is the New York trade school. This splendid establishment, open day and evening, gives the best kind of training in a very large number of trades, among which may be named bricklaying, carpentering, plumbing, steam-fitting, house painting, sign painting, lathing and plastering, blacksmithing, etc. It is noticeable that this school does little or nothing in what would in Connecticut be one of the most prominent of the trades taught, that is to say, the machinist's trade. But any such school devotes its energies to the particular trades that are most called for.

In the Baron de Hirsch school, also in New York city, all the trades above mentioned are taught and there is also a substantial course in machine work. In these New York schools the trades are taught in the most practical way possible. The pupils themselves do the work of the several trades, under the direct supervision of skilled experts who have no other business except to teach the trades. It is not surprising that the progress made is more rapid and more profitable than that of the average apprentice.

The policy of the New York trade school has been not to dispose of the labor of the pupils at all except in a few cases when their work has been made use of in the construction of improvements or additions to the school, and on the whole this plan is probably wise.

The result attained is that the graduates of this school are from their graduation able to do work in the way that it ought to be done. It probably would not be claimed that a graduate of the New York trade school is the equal at once of a skilled workman of many years' experience; but he is far superior to the average youth who has had the advantages now given to apprentices, even if these advantages were open to more than a very small constituency.

One of our two national industrial rivals, Germany, as is well known, has for some time been making a special feature of trade schools. Your commission cannot speak from inspection of any of these establishments, but by common report and by the conclusion reached by those who have made special study of the German trade schools it seems likely that the rapid rise of Germany to eminence in the industrial world, together with the recognized skill of her workmen, is almost entirely due to the development and progress of these institutions for teaching young men how to work.

Unless Connecticut is willing to follow, at a very early date, along the lines thus marked out by her rivals and associates in industry, as leading to growth which will secure the maintenance and increase of skill in the handicrafts, it must be feared that we shall soon cease to enjoy our present advantages.

Your commission feel that the question submitted to them is one of the most important that can engage the consideration of those who have the welfare of Connecticut at heart. They feel that the boys and young men now entering upon their active life have a right to demand an opportunity to learn how to do the things that must be done; that these young men have a right to demand that they shall not be put at a disadvantage with the citizens of any other state, or of any other country, in this matter of earning their own living and contributing to the advancement of civilization.

A state which has done so much for school training of the older sort, within whose borders are four institutions of higher learning, whose cities have built such magnificent buildings for educational purposes and have added the manual training courses which are of so much value to all who will take them, should not stop, it seems to us, but should add this final element which has hitherto been wanting; should teach the boys, and girls also, how to do the things which must be done by somebody every day. It is of very little use to give a boy sufficient education to make him an intelligent voter unless we also give him the sort of education which will enable him to earn his living—and to earn a good living of the sort which is secured by every industrious skilled laborer in this state.

One further point touching the situation in Connecticut is worthy of mention as bearing directly upon those trades generally carried on in factories. Connecticut has to import its coal and iron from a considerable distance. We are thus placed at an economic disadvantage as compared with communities who have these necessities for manufacturing at their doors. This disadvantage can be compensated for only by superiority in the use of the coal and iron when we get them. It is the skill of the workman, the very superior technical skill of the workman, which alone can put Connecticut on the level with other states in manufacturing. This disadvantage is, of course, insuperable in the heavy work with iron. A large blast furnace or a steel plant could not be wisely located in Connecticut. But even in industries which use less quantities of iron and steel the freight bills must be considered. To meet this there must be a larger or a better output per man than can be secured elsewhere. And this larger and better output can result from nothing except the skill of the workmen, supplemented, indeed, by the business ability of the employer.

In making the following recommendations your commission

have been moved to advocate the assumption by the State of a part of the burden of the establishment and maintenance of trade schools in order that the State may justly insist that instruction shall be free to all her sons. These schools, if they are established, cannot well be placed in other than the larger centres of population. But, if the instruction is free to all the pupils from the State, boys from the country will be able, perhaps, to meet the charge for board and rent, or, more likely still, will be able to maintain themselves in a modest way by laboring a part or the whole of each day while attending the trade school in the evening. If the schools were maintained by the towns exclusively, it is fair to suppose that the advantages would be enjoyed only by the residents in the large towns, and this would probably be a calamity. This principle just enunciated does not differ essentially from that which was adopted in the building of highways which has been carried on during the last few years.

Your commission would recommend, therefore, the passage of a bill covering the following points:

(1) Whenever a town shall appropriate a sum of money for the establishment or maintenance of a trade school, the State shall contribute an equal sum for that school; provided that the course of study proposed for the school and its proposed equipment shall be approved by the State board of education, and provided that the total sum appropriated by the State shall not exceed dollars for establishment in any one year, and that the total sum appropriated for maintenance shall not exceed dollars in any one year.

(2) Such school shall give instruction in such distinct trades as may be provided for by the local school-boards with the approbation of the State board of education.

(3) Such school shall have sessions both by day and in the evening, and the instruction given shall be free to all citizens of Connecticut and to their children; it being provided that no pupil under 16 years of age shall be admitted who has not completed the studies of the eighth grade in the public schools or some equivalent course of study.

(4) All details in the management of such trade schools shall be controlled by the school-boards of the towns in which the schools are located, subject to the general authority and supervision of the State board of education.

All of which is respectfully submitted.

(Signed)

LEWIS SPERRY

MAX ADLER

JOHN H. WHITEMORE

PUBLIC LIBRARIES

PUBLIC LIBRARY COMMITTEE

The state board of education appointed the following persons to be members of the Connecticut public library committee

Nathan L Bishop	Norwich
Edwin B Gager	Derby
Caroline M Hewins	Hartford
Charles D Hine	Hartford
Storrs O Seymour	Litchfield

LAW

The law which directs the activities of the committee reads as follows

The Connecticut public library committee shall give to communities advice and assistance in the organization, establishment and administration of free public libraries, and shall extend to all free public libraries aid in selecting and cataloguing books and in library management, and may for the purposes of this act visit and inspect libraries organized under the provisions of section 250, and may suggest improvements in said libraries. Said committee is authorized to purchase and arrange books and pictures to be loaned to such public libraries, schools, associations and individuals as the committee may select.

VISITATION

In the administration of this law, the members of the committee have visited and inspected the following libraries

Ansonia	Greenwich	Somers
Berlin	(Sound Beach)	Southbury
Burlington	Hamden	(South Britain)
Chaplin	(Mt Carmel)	Southington
Chatham	Lebanon	Tolland
Cheshire	New Britain	Wallingford
Colchester 2 visits	New Hartford	(Yalesville)
Darien	North Canaan	West Hartford
Derby	North Haven	Westbrook
East Haddam	Prospect	Winchester
Eastford	Roxbury	(Winsted)
Fairfield	Scotland	Woodbury

Total, 31 different towns, 32 visits.

In addition to the foregoing, a visitor appointed by the committee has inspected the following libraries

Ansonia	Granby	Prospect 2 visits
Bloomfield	Hamden	Roxbury
Cheshire	Manchester 3 visits	Salisbury
Chester	Middlefield 3 visits	Saybrook
Colchester 4 visits	New Fairfield	Seymour
Cromwell	Newington 4 visits	Southbury 3 visits
Danbury	North Canaan	Wallingford
Darien	North Haven	(Yalesville)
Enfield	Old Saybrook 3 visits	Waterbury
Farmington	Portland	Westbrook 4 visits

Total, 29 towns, 50 visits.

ADVICE AND ASSISTANCE TO LIBRARIES

In the following towns, schools, libraries, or both, have requested the public library committee to assist in the selection and purchase of books or apparatus

Barkhamsted	Granby	Putnam
Beacon Falls	Greenwich	Redding
Bethlehem	Guilford	Rocky Hill
Bristol	Kent	Salisbury
Brookfield	Manchester	Saybrook
Brooklyn	Middlebury	Sherman
Burlington	Middlefield	Simsbury
Canterbury	Middletown	Southbury
Chatham	Montville	Sterling
Colchester	Morris	Stonington
Columbia	New Britain	Stratford
Cornwall	New Canaan	Suffield
Coventry	New Fairfield	Thompson
Darien	New Milford	Wallingford
East Haddam	Newington	Watertown
Eastford	Norwalk	West Hartford
Enfield	Oxford	Weston
Glastonbury	Plymouth	Wilton
Goshen	Pomfret	Woodbury

Total, 57 towns, 55 schools, 26 libraries.

In response to the requests enumerated above, the committee extended assistance in purchasing and selecting books to the 55 schools and 26 libraries in 57 towns as follows

Amount expended	\$1151.48
Total purchase	1393 books
	9 globes
	53 maps
	4 charts
	1 filing cabinet
	1 dictionary holder,

The following towns have received assistance in reorganizing, cataloguing, or in other special work

Bloomfield	Newington
Colchester	Old Saybrook
Cromwell	Southbury
Manchester	Westbrook
Middlefield	

Book lists were issued by the committee as follows

DOCUMENTS PRINTED

Book list series 9	January	Library notes series 6
" " "	10 February	" " " 7
(Containing Address at the dedication of the Westbrook public library Nov 17 1904 by Rev Gurdon F Bailey)		
Book list series 11	November	Library notes series 8
" " "	12 December	" " " 9
(Containing list of books on Japan and Russia)		

CLASSIFICATION OF LIBRARIES

Towns are classified as follows

CLASS I

Towns having free public libraries organized under the law of 1893 and the amendment of 1895

Andover	Goshen	Putnam
Ansonia	Granby	Roxbury
Berlin 2 libraries	Hampton	Salisbury
Bethlehem	Hebron	Saybrook
Bloomfield	Huntington	Scotland
Bridgewater	Killingly	Seymour
Bristol	Lebanon	Somers
Brooklyn	Madison	Southbury
Burlington	Manchester	Southington
Chaplin	Meriden	South Windsor
Chatham	Middlebury	Stratford
Cheshire	Middlefield	Suffield
Chester	Milford	Thomaston
Colchester	Morris	Thompson
Columbia	New Britain	Tolland
Darien	New Canaan	Union
Derby	New Fairfield	Vernon
Durham	Newington	Wallingford
Eastford	North Canaan	West Hartford
East Haddam	North Haven	Westbrook
East Hartford	Old Saybrook	Wethersfield
Ellington	Plainville	Winchester
Enfield	Plymouth	Windsor
Farmington	Portland	Woodbury
Glastonbury	Prospect	

— 74

CLASS II

Towns in which there are libraries free to all the people, but having no legal connection with the town

Ashford	Hamden	Plainfield (Moosup
Branford	*Hartford	Central Village
Coventry (§Hale do- nation and Porter library)	Hartland (East)	and Plainfield)
Danbury	Ledyard	Pomfret
Fairfield (Pequot and Fairfield Memorial)	Litchfield (Litchfield circulating library and Gilbert library Northfield)	Preston
*Farmington	*Manchester (South)	Sharon
Franklin	Montville	Stafford
*Granby	Naugatuck	Stonington
Greenwich	New London	*Thompson
Griswold (Coit and Slater libraries)	Newtown	*Vernon
Groton	Norfolk	Washington
Guilford	Norwalk (Rowayton)	Watertown
Haddam	Old Lyme	*Windham (Windham Free and Dunham Hall libraries)

— 37

* Free public library in same town

‡ Free to ministers of Coventry and surrounding towns

CLASS III

Cities, boroughs and towns having libraries owned and controlled by the public and free to all the people

Bridgeport	Norwalk (City of	Windham
Hartford	Norwalk library	(Willimantic)
New Haven	and South Nor-	— 6
New Milford	walk library)	

CLASS IV

Towns in which there are free public libraries to which town appropriates money but is not represented in the management

*Chatham	Middletown	Waterbury
(Middle Haddam)	Norwich	— 6
Derby (Neck)	Simsbury	

CLASS V

Towns in which there are libraries charging fees

*Berlin	Essex (Essex public	*Pomfret
Canaan	library, Ivoryton	Ridgefield
Cornwall (Cornwall	and Centrebrook)	Rocky Hill
and West Corn-	*Groton	Sharon
wall)	*Madison	Stamford
Coventry	*Montville	Torrington
(South Coventry)	*New Haven	Westport
Cromwell	*New Milford	Woodstock
East Lyme	*Newtown	— 23
East Windsor	*Plymouth	

CLASS VI

Towns having no libraries

Avon	Harwinton	Sherman
Barkhamsted	Kent	Sprague
Beacon Falls	Killingworth	Sterling
Bethany	Lisbon	Trumbull
Bethel	Lyme	Voluntown
Bolton	Mansfield	Warren
Bozrah	Marlboro	Waterford
Brookfield	Monroe	Weston
Canterbury	New Hartford	Willington
Canton	North Branford	Wilton
Clinton	North Stonington	Windsor Locks
Colebrook	Orange	Wolcott
East Granby	Oxford	Woodbridge
East Haven	Redding	— 43
Easton	Salem	

* Free public library in same town

LIBRARY BUILDINGS

The following libraries receiving state grant have buildings used exclusively for library purposes

Town	Name of library
Ansonia . . .	Ansonia library
Berlin . . .	Berlin free library
Berlin . . .	Peck memorial library, Kensington
Bristol . . .	Free public library
Chatham . . .	Chatham public library
Colchester . . .	Cragin memorial library
Columbia . . .	Saxton B Little free library
Derby . . .	Harcourt Wood memorial library
Durham . . .	Durham public library
East Hartford . . .	East Hartford public library
Eastford . . .	Eastford town library
Ellington . . .	Hall memorial library
Granby . . .	Frederick H Cossitt library
Hebron . . .	Hebron library association
Huntington . . .	Plumb memorial library
Killingly . . .	Bugbee memorial library
Lebanon . . .	Jonathan Trumbull library
Madison . . .	E C Scranton memorial library
Meriden . . .	Curtis memorial library
Middlefield . . .	Levi E Coe library
Milford . . .	Taylor library
New Britain . . .	New Britain institute
New Canaan . . .	New Canaan circulating library
North Canaan . . .	Douglas library
Old Saybrook . . .	Acton library
Portland . . .	Buck library
Prospect . . .	Prospect public library
Salisbury . . .	Scoville memorial library
Somers . . .	Somers free public library
Southington . . .	Southington public library
Stratford . . .	Stratford library association
Suffield . . .	Kent library
Thomaston . . .	Thomaston public library
Thompson . . .	Thompson public library
Vernon . . .	Rockville public library
Wallingford . . .	Wallingford public library
Westbrook . . .	Westbrook public library
Winchester . . .	Beardsley library
Woodbury . . .	Woodbury public library

STATE AND TOWN APPROPRIATION

The amounts given by the several towns for annual maintenance and increase and the amounts of the state grant are as follows

TABLE I

Town	Town appropriation	State grant	Town	Town appropriation	State grant
Andover	\$ 50.00	\$ 50.00	Ellington	\$ 450.00	\$ 100.00
Ansonia	500.00	100.00	Enfield	600.00	100.00
Berlin	100.00	100.00	Farmington	100.00	100.00
Bethlehem	34.50	34.50	Glastonbury	100.00	100.00

Town	Town appropriation	State grant	Town	Town appropriation	State grant
Bloomfield	\$200.00	\$100.00	Goshen	\$100.00	\$100.00
Bridgewater	250.00	100.00	Granby	100.00	100.00
Bristol	3,000.00	100.00	Hampton	50.00	50.00
Brooklyn	100.00	100.00	Hebron	100.00	100.00
Burlington	50.00	50.00	Huntington	1,700.00	100.00
Chaplin	73.02	73.02	Killingly	400.00	100.00
Chatham	150.00	100.00	Lebanon	100.00	100.00
Cheshire	100.00	100.00	Madison	100.00	100.00
Chester	100.00	100.00	Manchester	500.00	100.00
Colchester	300.00	100.00	Meriden	4,000.00	100.00
Columbia	100.00	100.00	Middlebury	25.00	25.00
Darien	200.00	100.00	Middlefield	100.00	100.00
Derby	3,100.00	100.00	Milford	1,000.00	100.00
Durham	200.00	100.00	Morris	50.00	50.00
East Haddam	300.00	100.00	New Britain	4,000.00	100.00
East Hartford	300.00	100.00	New Canaan	290.00	100.00
Eastford	100.00	100.00	New Fairfield	25.00	25.00
Newington	150.00	100.00	South Windsor	150.00	100.00
North Canaan	100.00	100.00	Southington	1,200.00	100.00
North Haven	150.00	100.00	Stratford	800.00	100.00
Old Saybrook	200.00	100.00	Suffield	1,000.00	100.00
Plainville	200.00	100.00	Thomaston	300.00	100.00
Plymouth	75.00	75.00	Thompson	100.00	100.00
Portland	300.00	100.00	Tolland	100.00	100.00
Prospect	100.00	100.00	Union	90.00	90.00
Putnam	600.00	100.00	Vernon	500.00	100.00
Roxbury	50.00	50.00	Wallingford	977.92	100.00
Salisbury	200.00	100.00	West Hartford	325.00	100.00
Saybrook	200.00	100.00	Westbrook	250.00	100.00
Scotland	58.24	58.24	Wethersfield	300.00	100.00
Seymour	500.00	100.00	Winchester	1,475.00	100.00
Somers	207.84	100.00	Windsor	200.00	100.00
Southbury	86.00	86.00	Woodbury	100.00	100.00

STATE GRANTS

TABLE II

The amount paid by the state for books in each fiscal year since the law was passed is shown by the following table

Year ending	September 30,	1893		
" "	" "	1894	.	\$ 564.13
" "	" "	1895	.	1,333.33
" "	" "	1896	.	3,731.44
" "	" "	1897	.	4,896.24
" "	" "	1898	.	3,186.39
" "	" "	1899	.	4,880.52

STATISTICAL TABLES

School year ended July 14 1905

The following tables are compiled from the returns which the law requires school visitors to make to the board of education.

By way of explanation it may be said: —

1 The grand list of each town is taken from the books of the comptroller's office.

2 The per cent of taxable property appropriated for public schools is based upon the total amount received for school purposes diminished by the amounts received from school fund, etc, town deposit fund, and local funds.

3 The amount paid for each enumerated scholar is found by dividing the total amount expended, less amount paid for new buildings, by number enumerated.

4 As has been the custom for a number of years past, the number "registered in winter" is found by combining the number returned for fall *and* winter terms, taking the highest number found in either.

5 The "average attendance in winter" is found in the same manner.

6 The "per cent who have attended some part of the year" compares the "different scholars" with the "enumeration." The large per cents attained by some small towns are explained by the attendance of scholars not enumerated.

7. *Regularity of attendance* and efficiency in this direction are indicated by the "per cent of attendance on basis of registration."

8 The "per cent of attendance on basis of enumeration" is found by dividing the average attendance for the year by the enumeration.

9 The number who "attended normal school" is not complete.

10 By "schools" is intended the number of public schools in each town; and

11 By "departments" the number of departments in the public schools, counting each room of a graded school as one department.

12 The public libraries mentioned are not all free libraries.

13 The indebtedness incurred on account of schools is probably much larger than the amount reported. In towns where the districts have been consolidated and in some other towns it is made a part of the general indebtedness of the town and is not separately reported to this office.

14 Interest upon school district indebtedness, and expenditures of money for rent of school buildings, are included in the sums used in computing the cost per scholar upon basis of enumeration and also upon basis of average attendance.

STATISTICAL TABLES.

Scheme of State examinations

LAW

The law under which state examinations are held was passed in 1884, and runs as follows:

"The state board of education may, upon public examination in such branches and upon such terms as it may prescribe, grant a certificate of qualification to teach in any public school in this state, and may revoke the same. The certificate of qualification issued under this section shall be accepted by boards of school visitors, boards of education, and town school committees in lieu of any other examination." Gen Stat § 2246.

SCHEME

The following scheme has been adopted by the board:

I

CERTIFICATES

Hereafter, in the administration of the law providing for the examination of teachers by this board, the following forms of certificate shall be used:

STATUTORY CERTIFICATE

The State Board of Education having, in accordance with section 2246 of the General Statutes, caused _____ of _____ to be publicly examined in the studies enumerated in sections 2130 and 2245 of the General Statutes as follows: Reading, Spelling, Writing, Arithmetic, English, Grammar, the rudiments of Geography and United States History, Physiology, and Duties of Citizenship,

Hereby certifies that _____ has been found to have the academic knowledge which meets the minimum requirement of said sections in each of the enumerated subjects.

This certificate may be accepted by the school officers of the town of _____ and is limited to said town and expires _____ unless a renewal is endorsed hereon. Renewal will be granted only upon evidence that the holder has taught and managed successfully.

ELEMENTARY CERTIFICATE

The State Board of Education having, in accordance with section 2246 of the General Statutes, caused _____ of _____ to be publicly examined in Writing, in English (including Reading, Spelling, and Grammar), in Arithmetic,

in Elementary Science (including Physiology), in Geography, and in History and Civil Government, hereby certifies that has been found to have elementary knowledge and special preparation for teaching in each of the foregoing subjects, and to that extent is qualified to teach in the public schools of the State.

This certificate is good only for one year from date, unless a renewal is endorsed hereon. Renewal will be granted only upon evidence that the holder has taught and managed successfully.

HONOR CERTIFICATE

The State Board of Education having, in accordance with section 2246 of the General Statutes, caused to be publicly examined in Writing, in English (including Reading, Spelling, and Grammar), in Arithmetic, in Elementary Science (including Physiology), in Geography, in History and Civil Government, and in the Art of Teaching, hereby certifies that has passed such examination with honor, and is well qualified by knowledge, professional preparation, and skill, to teach in the public schools of this State.

This certificate is good only for one year from date, unless a renewal is endorsed hereon.

CERTIFICATE OF SPECIAL EXCELLENCE

The State Board of Education having previously examined and granted an honor certificate to of and having now caused to be more searchingly examined in hereby certifies that has passed such examination with great honor, and is exceptionally well qualified to teach said subject in the public schools of this State.

This certificate is good only for one year from date, unless a renewal is endorsed hereon.

CERTIFICATE OF SPECIAL PREPARATION

The State Board of Education having examined in accordance with section 2246 of the General Statutes, in certifies that has passed such examination and is qualified in respect of knowledge [professional preparation and skill] to teach said subject.

KINDERGARTEN CERTIFICATES

I

The State Board of Education having, in accordance with section 2246 of the General Statutes, caused to be publicly examined in English (including Reading, Spelling, Grammar, and English Literature), in Penmanship, in Elementary Science (including Physiology), in History, Music, Drawing, and the Kindergarten gifts and occupations hereby certifies that has been found to have elementary knowledge and special preparation in each of the foregoing subjects, and to that extent is qualified to teach in a public kindergarten in this State.

This certificate is good only for one year from date unless a renewal is endorsed hereon. Renewal will be granted only upon evidence that the holder has managed and taught successfully in a kindergarten.

2

HONOR CERTIFICATE

The State Board of Education having, in accordance with section 2246 of the General Statutes, caused to be publicly examined in Penmanship, in English (including Reading, Spelling, and Grammar), in Arithmetic, in Elementary Science (including Physiology), in History, in the Kindergarten gifts and occupations, and in the Art of Teaching, hereby certifies that has passed such examination with honor, and is well qualified by knowledge, professional preparation, and skill to teach in a public Kindergarten in this State.

This certificate is good only for one year from date, unless a renewal is endorsed hereon. Renewal will be granted only upon evidence that the holder managed and taught successfully in a Kindergarten.

SUPERVISORS CERTIFICATES

I

The state board of education approves of as a supervisor under the provisions of chapter 195 of the public acts of 1903.

2

The state board of education having examined of certifies that has passed such examination with and is qualified to be a supervisor in the public schools of this state. This certificate is good for from date unless extended by renewal endorsed hereon.

II

CONDITIONS

The statutory certificate shall be granted to those whose examinations show a tolerable academic acquaintance with the subjects prescribed in sections 2130 and 2245 of the General Statutes, revision of 1902.

* These sections read as follows:

SECTION 2130 Public schools shall be maintained for at least thirty-six weeks in each year in every town and school district. No town shall receive any money from the state treasurer for any district unless the school therein has been kept during the time herein required; but no school need be maintained in any district in which the average attendance at the school in said district during the preceding year, ending the fourteenth day of July, was less than eight. In said schools shall be taught, by teachers found duly qualified, reading, spelling, writing, English grammar, geography, arithmetic, and United States history, and such other studies, including elementary science and training in manual arts, as may be prescribed by the board of school visitors, or town

The elementary certificate shall be granted to all persons whose preliminary papers and examination prove their possession of that knowledge and minimum professional preparation without which it is impossible to teach the subjects which ought to be taught in all schools.

The honor certificate shall be granted to those persons who in the public examination shall have proved their possession of sound elementary knowledge and professional training in all the subjects enumerated in the certificate, and who shall also by actual exercises in teaching children prove their possession of professional skill.

Those who have obtained the honor certificate and others approved by the board may be admitted to the examination for certificates of special excellence. The examination shall always include actual exercises in teaching. In order to obtain this certificate, skill in teaching the subjects as well as accurate knowledge must be shown by the candidate.

Those who have made preparation to teach special subjects not included in the requirements for elementary and honor certificates may be admitted to examination for certificate of special preparation. This examination may include actual exercises in teaching. Professional training and skill in teaching, if exhibited by the candidate in the teaching exercises, will be noted on the certificate.

school committee. The public schools of every town and district shall be open to children over five years of age without discrimination on account of race or color, but school visitors, town school committees, and boards of education, may, by vote at a meeting duly called, admit to any school children over four years of age.

SECTION 2245 School visitors, town school committees, or boards of education shall, as a board, or by a committee by them appointed, examine all persons desiring to teach in the public schools; and give to those with whose moral character and ability they are satisfied, if found qualified to teach reading, writing, arithmetic, and grammar, the rudiments of geography and history, and the rudiments of drawing if required, a certificate authorizing the holder to teach in any public school in the town or district so long as desired, without further examination unless specially ordered; such certificate may limit the authority to teach to a specified time or in a specified school. No certificate to teach in grades above the third in graded schools nor in classes corresponding to such grades in ungraded schools shall be granted to any person who

The kindergarten certificate will be granted to those who in the public examination and in the preliminary papers have shown acquaintance with the subjects enumerated in the certificate and have furnished evidence of ability to conduct and teach children who attend the kindergarten.

For supervisor's certificate see page —.

III

STATUTORY CERTIFICATES

Candidates for the statutory certificate must pass an examination in the rudiments of the subjects enumerated in section 2130 and 2245 of the General Statutes.

These subjects are

Reading	Geography	Physiology
Writing	Arithmetic	Spelling
English grammar	United States history	Duties of citizenship

A certificate will be granted for a year, and will be valid only in the town written upon its face. It may be accepted in lieu of an examination by town or district school officers. Renewal will be granted only upon evidence that the holder has taught and managed successfully.

A candidate for this certificate will be examined at any time, but the certificate will not be issued until the candidate has made an engagement to teach.

This certificate is not evidence that the holder can teach or manage or has any professional skill. It shows that an academic examination has been passed in the subjects required by sections 2130 and 2245, and that the holder has given some attention to methods of teaching the two subjects,—reading and writing.

has not passed a satisfactory examination in hygiene, including the effects of alcohol and narcotics on health and character. If a person is examined and found qualified to teach branches other than those required in all cases, such branches shall be named in his certificate. Said certificate shall be signed by a majority of the board or committee or by all the members of the committee appointed to examine. They may revoke the certificates of such teachers as shall at any time be found incompetent to teach or to manage a school, or fail to conform to their requirements.

Candidates for this certificate wishing to obtain later the elementary certificate [page 9] may receive credit toward the elementary certificate in the subjects which they pass with especial excellence.

A re-examination may be required at the end of a year.

EDUCATION REQUIREMENTS

To receive a statutory certificate candidates must on examination satisfy the following requirements:

Reading They must furnish evidence that they can teach the beginnings of reading and also instruct scholars who have learned to read.

The following books contain suggestions on teaching the beginnings of reading:

Robbins, *Phonics* B H Sanborn Boston Mass

Farnham, *The sentence method of teaching reading, writing, and spelling* C W Bardeen Syracuse N Y

Suggestive questions found in state documents will be sent on application.

Penmanship They should be able to write so well that all their written work may be imitated by children; they should also furnish some evidence that they know how to teach writing.

A small chart containing small and capital letters, and printed suggestions, will be sent to all who wish to practice.

The references and topics on page 13 will suggest course of preparation, and the questions hitherto used will be sent.

English They must be able

- 1 To pronounce and spell common words
- 2 To show a good knowledge of capital letters and other English forms
- 3 To write and address a letter
- 4 To state clearly in their own language the substance of any short selection
- 5 To write briefly on a topic found on the examination paper
- 6 To answer a few simple questions in grammar

An outline for preparation will be sent on application.

Arithmetic They must be able to figure accurately and to work simple practical problems under the subjects usually found in arithmetic See page 15

Geography They must be able

1 To locate the principal divisions of land and water in the United States and in the world

2 To locate the chief political divisions of the United States and in the world

3 To draw a map of Connecticut and locate counties, principal rivers, and cities

4 To describe the important physical features of North America and of Europe

In the following elementary books will be found the topics upon which questions may be expected:

Grove, <i>Science primer</i>	<i>Geography</i>	American Book Co.
------------------------------	------------------	-------------------

Geikie, <i>Science primer</i>	<i>Physical geography</i>	" " "
-------------------------------	---------------------------	-------

Tarr, <i>North America</i>		Macmillan
----------------------------	--	-----------

These books will be loaned on application.

Physiology They must be able to do the work required of teachers in the text-book on physiology prepared by Dr J K Thacher and A B Morrill.

This book will be sent on application.

History They should show good knowledge of certain topics of history usually found in history text-books.

Suggestive topics will be sent on application.

The questions used in previous examinations will be useful in preparation.

Duties of citizenship The topics in civil government will be sent on application

IV

ELEMENTARY CERTIFICATE

PRELIMINARY PAPERS

Candidates shall not be admitted to examination for an elementary certificate unless, on or before the day to be announced in advance, they have sent to the secretary of this board satisfactory papers giving evidence of professional study.

In preparing these papers candidates are urged to make use of every available help, and the language of books may be copied, provided the matter quoted is indicated. They must, however, expect to be examined with especial strictness on the subject-matter of their papers, and must be prepared to show that all which they have written represents knowledge which

they can readily use in teaching. These papers may be short, but they have great weight in determining the fitness of the candidates. They may be questioned orally upon the subject-matter of these papers.

The following papers must be presented:

English 1 A paper describing the candidate's method of teaching children to read.

This paper must be divided into three parts: (1) Giving a plan of teaching *beginners*; (2) a plan for teaching those who can use books; (3) the special uses of oral and silent reading.

2 A paper describing the candidate's method of teaching children to express themselves easily and clearly, both in speaking and in writing.

The use to be made of (1) *copying*, (2) *dictation*, (3) *oral statement* and (4) *composition* should be given.

3 A paper giving a few books with which the candidate is familiar under the following heads:

- | | |
|----------------------------|-----------|
| 1 Books for young children | 4 History |
| 2 Poetry | 5 Science |
| 3 Biography | 6 Fiction |

A summary of one of the books may be required.

[The author, title, and publisher of each book must be given.]

4 (1) A list of useful school reference books.

(2) A list of not more than twenty books which ought to be in a school library.

[The author, title, and publisher of each book must be given.]

5 A paper describing the kind of literature which should be used (1) in teaching children the beginnings of reading, with selections or references to books; (2) the kind of literature to be used in the later practice of reading.

This paper should also describe the extent to which the teacher would go in studying English literature with children, and in particular give a list of books

- 1 *which should be read in school, and*
- 2 *which young children should be induced to read to themselves.*

The lists should be carefully selected, but may be very brief.

If possible, these books should be arranged for the stages of school progress.

6 A paper giving

- 1 A list of important points of English usage on which children need special drill.
the correct forms of expression and the incorrect forms to be avoided should be given.
- 2 A method of teaching punctuation and the written forms of the language may be here included.
- 3 In this paper candidates should also state and illustrate what elements of English grammar can be used in securing correct written and spoken language.

7 A paper describing the candidate's method of teaching spelling.

Penmanship A paper describing the candidate's plan of teaching children to write.

This paper must include the small and capital letters as they would be taught to children.

Small charts containing small and capital letters will be sent.

Arithmetic 1 One paper giving the facts of number to and including 10.

2 One paper describing the candidate's plan of oral and written work under all topics mentioned on pages 14-15, especially showing how children may be taught to work practical problems with facility.

See Peck, *Our new arithmetic*. A Lovel & Co.

Elementary science Two papers, each describing the candidate's plan of a lesson to be given to children.

It is recommended that one paper shall describe a lesson in Chemistry and one a lesson in Physics, Geology, or Botany.

Each paper must give:

- 1 Age of children for whom the lesson is intended
- 2 Purpose of giving the lesson
- 3 Concise description of apparatus, experiments, or object of observation—supplemented by any necessary diagrams or drawings
- 4 Method of teaching the lesson

The following topics suggest some of the more important subjects with which the candidates must be familiar:

Air	Three states of matter
Oxygen	Pressure in solids, liquids, and
Nitrogen	gases
Hydrogen	Transmission of pressure
Candle flame	Expansion
Carbon dioxide	Circulation of water—of air
Gravitation	Winds and currents

Evaporation	Telegraph
Condensation	Electric lamp
Melting	Steam engine
Freezing	Sound
Rain, snow	Common minerals
Dew, frost	Rock disintegration
Fog, cloud	Soil formation
Vapor and climate	Soil transportation
Conduction	Work of rain, rivers, and ice
Sources of heat	Organic rock
Cohesion	Sedimentary rock
Magnetism	Fossils

Geography 1 One paper describing a plan of lesson for young children.

2 One paper giving topics of lesson for older scholars, and suggestions as to the way in which the scholars should prepare such a lesson.

3 A list of books which children may profitably read in connection with this subject.

4 A short list of reference books useful for a teacher.
[The author, title, and publisher of each book must be given.]

Physiology 1 One paper giving parts of the subjects most important for school children and the object of teaching each.

2 One paper describing a plan for a single lesson, stating:
1 Age of children
2 Purpose of the lesson

History, civil government, and duties of citizenship 1 One paper giving the object and uses of studying history in public schools.

2 One paper giving a list of books which may be read by children in connection with this subject.

[The author, title, and publisher of each book must be given.]

3 One paper describing a plan of a single lesson in history.

4 A paper describing a plan of a single lesson in civil government and the duties of citizenship.

School management 1 A paper suggesting principles and rules for grouping and classing scholars.

2 A paper describing clearly the method of keeping registers of attendance. The candidate will fill out a register for

three terms of twelve weeks each, using not less than five names. The register should be complete, and the method of obtaining the average attendance should be indicated for each term. All the work performed in obtaining averages for each term should be left on the proper page of the register.

State register containing directions will be sent on application.

3 A paper showing acquaintance with the laws of the state relating to instruction, attendance, employment of children, and the duties of teachers.

The laws relating to schools will be sent on application.

PRELIMINARY REQUIREMENTS FOR ADVANCED CERTIFICATES

Candidates for certificates of especial excellence and of special preparation may be required to send to the secretary of the board, before they are admitted to examination, a thesis on the special subject of examination.

GENERAL DIRECTIONS FOR PREPARING PRELIMINARY PAPERS

- i 1 Write from the standpoint of a teacher
- 2 Give references if any matter has been copied from books
- ii Blank books will be sent upon application. If these books are used write on both sides of the paper
- iii If loose sheets of paper are used
 - 1 use paper of "letter" size
 - 2 write on one side only
 - 3 leave margin at left
 - 4 leave first sheet of each set of papers blank, on which write
 - a subject
 - b name of writer
 - c address
 - d date
 - 5 write subject and your name at head of each page
 - 6 do not fold or roll the papers
 - 7 fasten the sheets securely together
- iv Carefully separate the different papers on the same subjects, *e g*, English i English ii etc.

EXAMINATIONS

[FOR ELEMENTARY CERTIFICATE]

Preliminary papers Candidates must show a thorough practical understanding of all that they have written in the papers presented before the examination. They may be questioned orally upon the subject-matter of these papers.

In order to pass the examinations and receive an elementary certificate, candidates must satisfy all the following requirements:

Penmanship They must furnish evidence that they can teach penmanship.

One test will be making on the blackboard or on paper the small and capital letters as they should be made in teaching children.

The following are references on subject of penmanship:

Parker, *Talks on teaching*, pages 75-79

Farnham, *Sentence method*, read entire book

Prince, *Courses and methods*, pages 66-73

Fitch, *Lectures on teaching*, pages 205-208

Suggestive questions will be found in state documents, which will be sent on application.

The following are a few topics to which preparation may profitably be directed :

- | | | | |
|---|---------------------|----|--------------------|
| 1 | What is penmanship | 6 | Correct position |
| 2 | Purpose in teaching | 7 | Form teaching |
| 3 | Time for beginning | 8 | Classification |
| 4 | Tracing | 9 | Drill |
| 5 | Penholding | 10 | Movement exercises |
| | | 11 | Criticism |

Reading Candidates must furnish evidence that they can teach reading. Mere ability to read is not sufficient. A definite method of procedure with beginners and with those who can read books will be required. Candidates must also be ready to answer questions upon books which they themselves have read.

The following are references on the subject of reading:

Farnham, *The sentence method of teaching reading, writing, and spelling*

Hall, *How to teach reading and what to read in schools*

Parker, *Talks on teaching*, pages 26-66

School document No 12, 1904, *Report on the study of English language and literature in elementary and secondary schools*

Suggestive questions will be found in state documents, which will be sent on application.

Spelling They must be able to spell and pronounce common words.

Under this subject will be given questions relating to pronunciation, the use of the dictionary, abbreviations, and diacritical marks.

English 1 They must show a good knowledge of punctuation and capital letters.

2 They must be able to write and properly address a letter of any ordinary nature.

3 They must be able to state clearly in their own language the substance of any short selection, and to write briefly on a subject given in the examination.

4 They must show a good knowledge of the elements of English grammar.

English literature They must have studied some simple topics in English literature, and be able to write intelligently, in correct English, in answer to one or more easy questions upon this topic.

The topics will be sent on application.

Arithmetic They must be able both to figure and to work out simple practical problems in the following subjects ordinarily taught as parts of arithmetic:

Addition

Subtraction

Multiplication

Division

Common and decimal fractions

Percentage (including among its applications simple interest, stocks, commissions, and profit and loss)

Common weights and measures and their applications

The metric system

Mensuration of plane surfaces and of rectangular solids

Ratio and proportion

Square and cube root

They must also know how to keep a cash account and make out bills and receipts.

Elementary science They must have a good elementary knowledge of the subjects chosen for their preliminary papers in science. See page 11.

Reference is made to the following school documents, which will be sent on application:

School Document No 17, 1902, *Observation lessons in science*, by A B Morrill

School Document No 12, 1903, *Lessons on plants*, by H N Loomis

See also the following books:

Huxley, <i>Science primer Introductory</i>	American Book Co
Roscoe, <i>Science primer Chemistry</i>	" " "
Stewart, <i>Science primer Physics</i>	" " "
Bower, <i>Science applied to work</i>	Cassell

These books will be loaned upon application.

Geography They must

1 Understand the elements of mathematical geography
2 Be able to locate the principal divisions of land and water of the world.

3 Be able to locate the chief political divisions of the world and the states and territories of the United States.

4 Be able to describe the important physical features of North America and of Europe.

5 Show a good knowledge of certain topics ordinarily taught as a part of geography. These topics will be sent on application.

The following books are suggested:

Grove, <i>Science primer, Geography</i>	American Book Co
Geikie, <i>Science primer, Physical geography</i>	" " "
Shaler, <i>The story of our continent</i>	Ginn & Co
Shaler, <i>First book of geology [with teacher's pamphlet]</i>	D C Heath & Co
Brigham, <i>Geographic influences in American history</i>	Ginn & Co

These books will be loaned on application.

Physiology 1 They must be able to do (at least sufficiently for some elementary instruction) the work required of teachers in the text-book on physiology prepared by Dr J K Thacher and A B Morrill.

This book and charts will be sent to those who wish to prepare themselves on this subject.

2 They must be acquainted with the law relating to the teaching of physiology and hygiene.

The law is found in General Statutes, §§ 2162, 2163, 2245. The laws relating to schools will be sent on application.

History and duties of citizenship They must be able to show a good knowledge of certain topics in history and the duties of citizenship. These topics will be sent on application.

See

Hart, *Suggestions on history and government of United States*
Cambridge

Gordy & Twitchell, *Pathfinder of American history* Lee & Shepard
 Atkinson, *On history and the study of history* Little, Brown & Co
 Atkinson, *The study of politics* " " "
 Semple, *American history and its geographic conditions*

Houghton, Mifflin & Co

Fisk, *Civil Government*

" " " "

These books will be loaned on application.

Vocal music and drawing are not now required except for kindergarten certificate. If satisfactory evidence of ability to teach these branches be furnished, they will be noted on the certificate.

V

HONOR CERTIFICATE

Candidates for honor certificates should notify the secretary of their willingness to show by actual exercises in teaching children that they can both teach and manage.

VI

KINDERGARTEN CERTIFICATE

PRELIMINARY PAPERS

Candidates cannot be admitted to examination for a kindergarten certificate unless on or before a day to be announced in advance they have sent to the secretary of the state board satisfactory papers giving evidence of professional study.

Kindergarten 1 A paper showing an acquaintance with the Froebelian gifts and occupations and their educational value

2 A paper showing an acquaintance with Froebel's Education of man and the principles and laws therein set out.

3 A paper stating and illustrating the method of control in the kindergarten.

4 A paper giving a kindergarten program covering a month

5 A paper giving a short list of songs and plays and the purpose of each

English 1 A paper showing the candidate's method of teaching beginners to read

2 A paper showing the candidate's method of teaching children to speak easily and correctly

3 Same as English 3 on page 10

4 A paper describing the kind of literature including

stories which should be presented to children in the kindergarten

5 A story in the form in which it would be told to children

Penmanship Same as penmanship, page 11

Arithmetic 1 A paper giving the facts of number to 10

2 A paper outlining the extent to which arithmetic can be taught in the kindergarten

Elementary science Same as elementary science on page 11

Physiology Same as physiology on page 12

History 1 One paper giving the object and uses of studying history

2 One paper describing the uses of history and biography in the kindergarten

School management Same as school management on page 12

EXAMINATIONS

Certificates will not be issued until the candidate has demonstrated ability by actual exercises in teaching

Kindergarten 1 Candidates must furnish evidence of acquaintance with the Education of man by Froebel. The translation by W N Hailman is recommended.

2 Candidates must be prepared to answer questions upon the gifts and occupations.

The following is recommended as containing what is essential:

Bates, Lois, *Kindergarten guide*

Other books which can be recommended are

Wiggin, K D *Kindergarten principles and practice*

Buckland, Anna, *Use of stories in the kindergarten*

Kindergarten and child culture, see pages 71-74, 84-88, 161-281, 465-473, 625-640

Reading Candidates must furnish evidence that they can teach primary reading. Mere ability to read is not accepted. A definite method of procedure with beginners will be required. See references for reading, page 14

Spelling Same as spelling on page 14

English Same as English on page 8

English literature Same as English literature on page 15

Penmanship Same as penmanship on page 8

Arithmetic Same as arithmetic on page 8

Physiology Same as physiology on page 9

History Same as history on page 9

Elementary science Same as elementary science on page 15

Music Vocal music is required and the candidate must furnish evidence of ability to play sufficiently to conduct kindergarten exercises

Drawing Examination is required

VII

SUPERVISION

SUPERVISOR'S CERTIFICATE OF APPROVAL

In the administration of the laws relating to supervision, supervisors' certificates of approval may be granted and the following method of procedure is prescribed:

1 A supervisor's certificate may be issued by special vote of this board to persons who have successfully supervised not less than six schools for five consecutive years in this state and during these five years have given their whole time to supervision.

2 Supervisor's certificate 2 may be granted to all persons who in a public examination have proved their possession of that knowledge, professional training, and qualifications for supervision, which are necessary to the organization and management of schools, the instruction of teachers and the proper progress and advancement of children in the several grades.

CONDITIONS

Candidates for certificate 2 must pass examination in the subjects outlined in the scheme for elementary certificates, but graduates of colleges, universities and normal schools, holders of state elementary or honor certificates, will not be required to pass such examination. Candidates having a high school education and who have had five years' successful experience as supervisors giving their whole time to supervision or to both supervision and teaching at the same time, shall not be required to pass an academic examination.

EXAMINATIONS

All candidates must in examination satisfy the following requirements:

1 *Laws of the state relating to schools* They must furnish evidence that they are acquainted with the laws of the state relating to schools, especially the sections relating to attendance, required subjects of study, duties of supervisors and qualifications and duties of teachers.

2 *Organization of public schools* They must show acquaintance with the organization of good schools and the principles and rules of grouping and classifying children.

3 *Courses of study* They must furnish evidence that they understand the uses of a course of study and the essential subjects to be comprised in a course of study.

4 *History of education in Connecticut* They must be acquainted with the history of education in Connecticut and the relation of this history to existing schools.

5 *Supervision* Candidates must in particular be able to state clearly the duties pertaining to the office of superintendent both in relation to teachers, the community and to children.

6 *Qualifications of teachers* Candidates must furnish evidence that they understand the qualifications and duties of teachers.

Books and references will be supplied on application to the State board of education, Hartford.

VIII

BOOKS

The secretary will furnish a list of books which can be read or studied in connection with each of the subjects upon which examination is required. A few books will be loaned to those who are preparing for examination.

IX

CLASSES FOR TEACHERS

A certificate showing that the candidate has in any subject met the requirements of the correspondence courses at the Wilimantic or the Danbury normal school will be accepted in lieu of the preliminary papers and examinations of this scheme.

X

MISCELLANEOUS

1 Preliminary papers should be sent at least one week before examination.

2 Examinations will be held in and for any town upon invitation of the town school officers. Successful candidates will receive the statutory or elementary certificates to which they may be entitled, and the record of all, whether successful or not, who are intending to teach in the town will be given to the examining committee.

3 Candidates are allowed to divide their examinations. At least two subjects must be taken at the first examinations, viz.: English (including Reading, Grammar, and Spelling) and Arithmetic.

4 A candidate will not be examined upon the same subject more than four times in one school year.

5 Candidates must obtain the required standing for a certificate within two years after their first examination.

6 Persons wishing to take partial examinations should present themselves at the hours designated in the program on page — or, in advance, make a special arrangement by correspondence.

7 In most cases, certificates will not be granted for longer than one year and all certificates expire July 1.

8 Certificates which have expired will be renewed upon evidence showing that holder has taught and managed successfully.

9 Certificates will not be renewed for persons teaching outside this state.

10 Certificates may be revoked at any time.

XI

Program for elementary certificate

<i>First day</i>		<i>Second day</i>

STATE BOARD OF EDUCATION
HARTFORD CONN

QUESTIONS USED AT STATE EXAMINATIONS 1906 and 1907

READING

I

- 1 What is reading?
- 2 What is meant by teaching reading?
(a) to beginners? (b) to those who have learned to read?
- 3 What method of teaching reading to beginners do you prefer?
Why?
- 4 State very carefully what means of securing a habit of reading good books you intend to use in your school.
- 5 Give the titles of two books that children ought to read in school and be familiar with and tell the reason for your choice.
- 6 State the difference between teaching reading and teaching enunciation and pronunciation.
- 7 If you could select the reading of children for the first and second years what books would you choose?
- 8 Mention two books that you have read carefully.

II

- 1 What is reading?
- 2 What foundation for learning to read has a child when he enters school at the age of five?
- 3 Distinguish between *oral* and *silent* reading. What is the value of each? How would you conduct an exercise in silent reading?
- 4 Write a plan for teaching a first lesson in reading. Choose your own subject matter.
- 5 What is the value of work in phonics? What should be emphasized in teaching phonics?
- 6 What is meant by expression? How do you cultivate expression in teaching reading?
- 7 Mention two books (not reading books) suitable for children to read in each year of school life.

III

- 1 What is reading?
- 2 Why do we teach reading?
- 3 Compare oral and silent reading.
- 4 What is meant by alphabet method?

phonic	"	}	of teaching reading?
sentence	"		
word	"		
phonetic	"		

Which method do you use and why?

- 5 What is meant by teaching reading? What preparation should a teacher make for a lesson given to beginners?
- 6 Give the titles of six books not text-books which are suitable for children ten to twelve years old to read.

IV

- 1 What is reading?
- 2 What is meant by expression? emphasis? pronunciation?
- 3 Distinguish phonics and phonetics from reading. State clearly the use of phonics.
- 4 Name three poems adapted to beginners in reading. Give reasons for your choice.
- 5 How does reading compare in importance with arithmetic as a school subject.

V

- 1 What is reading?
- 2 What are the objects of teaching reading in the public schools?
- 3 What is the difference between reading and elocution?
- 4 Describe your method of teaching reading to
 - (a) beginners
 - (b) those who can use books.
- 5 What is meant by supplementary reading?
- 6 Give titles of five books you have read (not text-books or fiction).
- 7 Give titles of five books — not text-books or fiction — that children under fourteen can profitably read.

VI

- 1 What is reading?
- 2 Distinguish between oral and silent reading. Which of the two is more important? Why?
- 3 What is meant by teaching reading?
- 4 What is the
 - (a) alphabet method?
 - (b) sentence method?
 - (c) phonic method?
- 5 What is the use of punctuation marks?
- 6 Give titles of four books you have read (not fiction, Indian stories, fairy tales or myths) and state briefly the main points of one.
- 7 Give a list of five books (not fiction, Indian stories, fairy tales, myths or text-books) suitable for children to read in each of the several years of school.

VII

- 1 What is reading?
- 2 What is meant by

alphabet method	}	of teaching reading?
phonic		
word		
sentence		
phonetic		

Which method would you use and why?

- 3 What is expression? What means will you take to secure good expression? How will you remedy bad habits like, monotone, wrong sounds of vowel, dropping of g's, etc.?
- 4 Outline preparation a teacher should make to teach the first line of the following:

"I have a little shadow
That goes in and out with me
And what can be the use of him
Is more than I can see."
- 5 What is a text-book in reading? What is its use? What should be its character?

PENMANSHIP

I

- 1 What is penmanship?
- 2 Why is penmanship taught in public schools?
- 3 Give definite directions for holding the pen.
- 4 Would you have larger writing for young than for older children? Give reasons for answer.
- 5 Give four of the common defects in children's handwriting and state how each can be corrected.
- 6 Give such definite directions as will show children how to make such letters as m, n, h, and a.
- 7 Make the small letters in script.
- 8 " " " " " print.
- 9 Make the capital letters in script.
- 10 " " " " " print.

II

- 1 What is penmanship?
- 2 What is the object of teaching penmanship?
- 3 State what you will do to secure correct position; penholding.
- 4 Give examples of "movement exercises."
- 5 Make the small and capital letters in script and print.

III

- 1 What is penmanship?
- 2 Why is it taught in public schools?
- 3 Make in script and print all the small and capital letters.
- 4 In teaching beginners, which is best, unruled paper, staff ruled paper or paper ruled with base line only? Give reasons for your answer.
- 5 When should children begin to learn to write and why?
- 6 In teaching penmanship in what ways would you use the black-board?
- 7 Copy in your best handwriting the following:
 "I have but one lamp by which my feet are guided
 And that is the lamp of experience."

IV

- 1 What is penmanship?
- 2 Why is writing taught in the public schools?
- 3 When should children begin to write?
- 4 What relation has penmanship to other studies?
- 5 In teaching penmanship, in what ways would you use a black-board?
- 6 Write a receipt.
- 7 Make all small and capital letters in print.
- 8 Make all small and capital letters in script.

V

- 1 Write in your best handwriting the following:
 "Thrice is he armed that hath his quarrel just."
- 2 (a) Make the small letters in script.
 (b) Make the small letters in print.
- 3 (a) Make the capital letters in script.
 (b) Make the capital letters in print.
- 4 What is the object in teaching writing?
- 5 How would you teach the letter O to beginners?
- 6 What is your standard of good penmanship?
- 7 Mention three or more common faults in penmanship and state the means you will use to correct each.
- 8 How can the proper size of letters be taught by means of copies on the board?

VI

- 1 (a) What is penmanship?
 (b) Why is it taught in public schools?
 (c) How does it compare in importance with reading?
- 2 (a) Make the small letters in script.
 (b) " " " " " print.
 (c) " " capital letters in script.
 (d) " " " " " print.

- 3 Why are the letters connected in script?
- 4 (a) In improving the regular written lessons in language, spelling, etc, which is the more valuable instruction — that which improves separate letters or that which improves an entire page of writing? Why?
(b) Give examples of both kinds of instruction.
- 5 (a) Write five copies you would give to beginners.
(b) On what should beginners write?
- 6 (a) In penholding should the thumb be bent or straight?
(b) Which should be nearer the pen — and how much nearer — the end of the thumb or the end of the first finger?
(c) What part of the hand, if any, should touch the paper?
- 7 Write in your best handwriting
"Another course may look easier and more attractive, but pursuing duty for duty's sake is always sure and safe and honorable."

SPELLING

I

- 1 What is spelling?
- 2 Why is spelling taught in public schools?
- 3 Write the words for which the following are abbreviations:

Mass	D C
Miss	A D
P I	Mrs
- 4 Place a sign (thus ') on the syllable which must be accented in the following words:

details	idea	finance
characterize	military	increase

Tell the meaning of the word increase.
- 5 Describe your method of teaching children to spell.
- 6 Dictated words

renown	vacuum	irresistible
necessitate	anonymous	declaim
appendix	phaeton	declamation
marauder	bazaar	planet
atom	ostensible	memorize
mischievous	authenticity	herring
accelerate	chrysalis	peninsula
precipice	soliloquy	psalm
nutritious	accrue	enigma
caricature	cyclone	schedule
gorgeous	etiquette	Mediterranean
myrtle	reciprocity	naphtha
vengeance	jurist	almighty
acidity	weird	sanitary
languor	credibility	counterfeit
impolitic	senator	suffocate
falcon	idiom	

II

- 1 What is spelling?
- 2 What is the object of teaching spelling in public schools?
- 3 What are diacritical marks? What is their use? Illustrate by three words.
- 4 What is a dictionary? How will you teach children to use a dictionary?
- 5 How will you use a spelling book?
- 6 Write in full the following abbreviations and tell what each means:

ult	mss	Dr
i e	Messrs	acct

Write sentences containing the foregoing abbreviations.

7 Dictated words

penitentiary	asparagus	chloroform
aghast	scoundrel	vicissitude
gesture	smuggle	surreptitious
charity	sculpture	raspberry
rhubarb	omission	Napoleon
Chesapeake	malaria	benign
exhilarate	acquainted	phonograph
consistent	cemetery	reminiscence
accomplice	inseparable	avaricious
weird	suspicious	grotesque
allegory	dilapidate	tragedian
oxygen	surfeit	plea
chronic	precipice	coincidence
instrument	niche	aquarium
pavilion	alibi	insensible
souvenir	assiduous	donkey
precaution	catarrh	

III

- 1 What is spelling?
- 2 Why is spelling taught?
- 3 What is a syllable?
- Divide into syllables the following words:
 - recommendation
 - temperature
 - convenience
 - extraordinary
- 4 What are diacritical marks? Give four. Illustrate their use.
- 5 What is the use of an abbreviation? Give four useful illustrations.
- 6 Dictated words

sculpture	catechise	supersede
raspberry	criticise	infinite
prairie	scissors	militia
plateau	celery	plainness
crevice	venison	coincidence
avenue	allegory	plea
enterprise	oxygen	asparagus

league	grotesque	souvenir
precipice	phonograph	cemetery
myriad	Mediterranean	malign
pallid	caterpillar	inseparable
iceberg	perseverance	Carlyle
luxury	cocoon	ogre
physics	alibi	manageable
mucilage	poultry	scientific
sonnet	robin	mountainous
tragedy	tenacious	

IV

- 1 What is spelling?
- 2 Why do we teach spelling?
- 3 State one method of teaching common difficult words.
- 4 Outline your own preparation for teaching the following words:

whose to too two

separate gone

business sugar

(town in which you live)

- 5 Write the proper abbreviations for the following:

last month

pages

in the year of our Lord

debtor

for example

creditor

namely -

pounds

ounces

6 Dictated words

poultry	suavity	nullify
enterprise	malign	parliament
parallel	discipline	alligator
grievous	grammar	inauguration
tragedy	scallop	changeable
mathematics	magnetize	extraordinary
atmosphere	psychology	embarrass
civilize	monitor	inseparable
vacuum	docile	efficient
society	isthmus	valley
schedule	scientific	irritate
perspiration	retrieve	filial
scissors	yacht	discern
biography	kerosene	coincidence
sketch	excusable	precede
applause	stationery	solemn
irregularity	Wednesday	

V

- 1 What is spelling?
- 2 Why do we teach spelling?
- 3 Write the words here abbreviated

lb Jr AD ie os

4 Copy each of the following sentences, using the correct word selected from the words in the parentheses:

(a) The (*leaf lief*) supplies food for the (*bury berry*)

(b) Nearly (*all awl*) the men able to (*bare bear*) arms had (*bin been*) (*draft draught*) ed into service

(c) Members of the cat tribe (*climb clime*) by means of their (*clause claws*)

(d) (*Feint faint*) (*hart heart*) ne'er (*one won*) (*fair fare*) lady

(e) The women are (*wringing ringing*) (*their there*) hands

5 What distinction do you make between the preparation of the spelling lesson and the spelling exercise?

6 What is a dictionary? How will you teach children its use?

7 Write the dictated words

I

malady	crocus	lightning
condescend	offered	burial
scheme	hammock	mattress
surfeit	angle	bleak
nutritious	leather	laundry
eulogy	fickle	volley
macaroni	deter	replenish
perquisite	acquaint	integrity
niche	fragile	Japanese
negotiable	anchor	accommodation
infection	birch	solitaire
elixir	awning	trellis
intricacy	traffic	cancellation
intrigue	bluish	felicity
annihilate	chalk	piteous
despatch	prize	coral
melon	surprise	

2

irritate	surpass	aghast
answerable	imbecile	niche
currency	omission	hosiery
precede	mortgage	grammar
Pacific	niche	belief
stationery	bicycle	autumn
isthmus	dandelion	schooner
villain	permanence	testimony
precise	postscript	signature
psalm	embalm	athlete
idol	fascinate	synonym
misspell	chargeable	cocoon
sunbeam	crystal	chorus
malice	immense	confectionery
gracious	sapphire	pyramid
luxury	soliloquy	typhoid
noticeable	hyphen	

VI

- 1 What is spelling?
- 2 What is the object of teaching spelling?
- 3 Will you give more time to written or oral spelling? Why?
- 4 Using the following words as a lesson, tell what instruction you would give:

*caterpillar**pigeon**Connecticut**separate**whose**business**detail**psalm**coral*

- 5 Give five useful abbreviations using each in a sentence.

- 6 (a) What is a dictionary?

What use will you make of a dictionary in school?

- (b) What are diacritical marks?

- 7 Arrange the words in questions 1, 2, 3, 4, alphabetically

- 8 Write dictated words

laughter

strategy

vaccinate

sternness

waltz

phonograph

forcible

frontier

sassafras

umbrella

knapsack

anonymous

pretence

bayonet

hypocrisy

axle

studious

catastrophe

deceive

emerald

assassin

assent

amiability

bazaar

senator

subsequent

labyrinth

missionary

acquiesce

hygiene

grieve

satchel

filigree

technical

parse

caricature

recurrence

terrace

nausea

pyramid

erroneous

macaroni

subtle

advisable

codicil

benign

velocity

massacre

ARITHMETIC

I

- 1 Find the sum of the following quotients:

$$.95 \div 10$$

$$200000 \div 20$$

$$3.65 \div 100$$

$$100 \div 1000$$

$$6 \div 60$$

- 2 A city was taxed for school purposes \$73,500 on property valued at \$24,500.00. What was the tax on one dollar?

- 3 (a) What is a ratio? A proportion?

(b) Give reasons why scholars should form and solve proportions and analyze problems giving rise to proportions.

(c) The extremes of a proportion are $\frac{3}{4}$ and .075; one of the means is $\frac{1}{4}$, what is the other mean?

- 4 Find the square root of 1,5129. Find the cube root of 19683.
- 5 Make out and receipt bill for the following:
- | | |
|-------------------|-----|
| 18 pounds steak @ | 24c |
| 4½ doz eggs | 36c |
| 3 quarts molasses | 18c |
| 1 bushel potatoes | 75c |
| 5 pounds sugar | 3½c |
- 6 (a) Find the exact interest on \$50 for 63 days at 3½ per cent.
 (b) Find the interest on \$387.84 from September 18, 1890, to April 3, 1892, at 8 per cent.
- 7 (a) Write the table of liquid measure.
 (b) How many square inches in a block 10 inches long, 6 inches wide and 4 inches thick?
 (c) Find the cost of a block of granite 4 ft long, 3 ft wide and 2.5 ft thick at \$2.50 per cubic foot.
- 8 Find the sum of

1.07
 247.89
 1.01
 127.69
 824.74
 237.29
 1238.23

- 9 A pupil who attended school 75 days during a term was marked 85 per cent for attendance. How many days was he absent?
- 10 A merchant bought a bill of goods amounting to \$1,250 subject to a discount of 10%, 5% and 2% off. What was the amount which he paid?

II

- 1 (a) Express 87½% as a common fraction; as a decimal.
 (b) Add 5.83, seventy-two thousandths, and 13 and 16 ten-thousandths. Multiply this sum by 13½ and divide the product by 5.25.

- 2 Add the columns down and across

6	12	7	51	5	2
14	41	15	13	8	17
23	6	22	4	12	21
8	13	10	9	16	63
9	4	3	25	7	42
15	2	26	11	19	3
—	—	—	—	—	—

- 3 A room is 18 feet by 15 feet. What will be the total cost of carpeting the room with carpet 27 inches wide at \$2 a yard if 5 cents a yard is charged for laying it?

- 4 A merchant sells goods to the amount of \$4,200. If he allows a discount of 10% off for wholesale and later another discount of 5% for cash, what does he receive?

- 5 Make out a receipted bill for the following:

26 yards silk @ \$1.29
 5 " lining @ .15

- $2\frac{1}{2}$ yards lining @ .20
- 7 " muslin @ $.12\frac{1}{2}$
- 2 doz buttons @ .25
- 12 yds flannel @ .38
- 5 " cotton @ .14
- 2 pr kid gloves @ \$1.25
- $3\frac{1}{2}$ yds ribbon @ .42
- 1 silk handkerchief \$1.25
- $6\frac{1}{2}$ yds embroidery @ .36
- $\frac{1}{2}$ doz handkerchiefs @ \$1.75 a doz.

6 A man owns a triangular lot fronting 50 rods on the street. The other boundary lines meet at a right angle, one being 30 rods long. How many acres does the lot contain? Draw diagram.

7 In order to build a new schoolhouse a tax of \$13,500 must be raised; the assessed value of property is \$1,080,000. What must be the rate of taxation?

8 If you found that a majority of your pupils did not clearly understand a subject and were losing interest, what would you do?

III

- 1 Multiply 299 by 49000.
Multiply 8.001 by .0625 and divide the product by 14.1.
- 2 Write the table of square measure. Write the table of liquid measure.
- 3 (a) What sum of money invested at 4 per cent interest will yield an annual income of \$450?
(b) Find the exact interest of \$45 for sixty days at four per cent.
- 4 Find the square root of 32000.
Find the cube root of 325000.
- 5 What is cancellation? Divide, using cancellation: —
 $15 \times 80 \times 27 \times 28$ by $7 \times 20 \times 8$
Solve by cancellation: —
 $20 \times 38/40 \times 2/3 \times 45$
- 6 A cubical bin is 100 inches long. How many cubic feet does it contain?
- 7 (a) What is ratio? Write a ratio.
(b) What is a proportion? Write a proportion.
(c) The extremes of a proportion are $\frac{7}{8}$ and .025. One of the means is $\frac{1}{4}$; what is the other?
- 8 A company published a book which sold for \$2.50. The author received ten per cent of the selling price. The agent received forty per cent of the selling price. The cost of printing and binding was \$.60 a copy and the cost of advertising was .15 a copy. How much did the publisher clear on the first 2,500 copies? What per cent of the selling price was the profit?
- 9 Make and receipt a bill: A R Brown bought of G G Johnson, 8 gallons oil at $12\frac{1}{2}$ cents, 14 brooms at 20 cents, 1 package gold dust 25 cents, 3 cakes soap at $8\frac{1}{4}$ cents, 5 gallons gasoline at 10 cents, 16 pounds sugar at $6\frac{1}{4}$ cents, 300 lemons at $1\frac{1}{4}$ cents, 2 pineapples at 35

cents. Credit the bill with \$5 60 paid on account and show the balance due.

IV

- 1 (a) Multiply 109 400 by 10 100.
 (b) Divide 540 000 by 25 000.
 (c) 1.16 divided by 11.06 = ?
 (d) Write $\frac{3}{100}$ in another form.
- 2 How many cubic inches are there in a solid four inches long, three inches wide, two inches thick? How many edges has this solid? How many corners? How many faces or sides? How many square inches of surface on such a solid?
- 3 (a) Write the table of avoirdupois weight.
 (b) Find the number of days from October 15, 1904, to February 3, 1905.
 (c) How many inches in a rod?
 (d) Simplify by cancellation $\frac{1}{5} \times \frac{6}{7} \times \frac{5}{2} \times \frac{7}{2} \times \frac{2}{3}$
- 4 (a) Just before Christmas a jeweler increased by 10% the selling prices of the following articles:

	selling price
Waltham silver watches	\$25 00
Gold watch chains	10 00
Small clocks	2 50

What did the selling prices then become?

 (b) After Christmas he lowered the new selling prices by 10%; what did the selling prices then become?
- 5 Make out a receipted bill for the following purchases:—

10½ rolls of paper	@ 50c
3 " " frieze	@ 75c
56 feet of moulding	@ 8c
Hanging 11 rolls of paper	@ 37½c
" 3 " " frieze	@ 37½c
Hanging 56 feet of moulding	@ 3c
Taking off paper	\$2 00
Car fares	48c
- 6 (a) What is meant by exact interest?
 (b) Find exact interest of \$100 for forty-two days at 4%.
 (c) Find interest on \$35 for 15 days at 6%.
- 7 Which buys coal cheaper—one who pays \$6 50 for a short ton, or one who pays \$7 for a long ton? How much? What per cent?
- 8 What is a ratio? What is a proportion? Write a ratio; a proportion. Express the ratio of 6 to 4; of 4 to 6.
- 9 Find the square root of 984 676.
 Find the cube root of 91 125

V

- 1 (a) Multiply 2 001 by 24 000.
 (b) Divide .044 by .0011.
 (c) Add $\frac{7}{8}$ and $\frac{6}{34}$. From the sum subtract $\frac{1}{4}$ and $\frac{1}{8}$. Multiply the difference by $\frac{3}{4}$ and divide the product by $\frac{7}{8}$. Express the final result decimally.

2 Fill out the following:

- 12 in = yds
 3 pts = qts
 250 lbs = cwt
 10 000 lbs = tons
 32 qts = bu

3. (a) How many cubic inches are there in a solid four inches long, three inches wide and two inches thick?
 (b) How many square inches of paper would be needed to cover the outside of this solid?
 (c) How many edges has a cube? How many corners? How many faces or sides?
- 4 (a) If the number of candidates at an examination is 42 and 12 answer all the questions on this paper correctly, what will be the per cent answering correctly?
 (b) What is the difference on a bill of \$425 between a discount of 50% and a discount of 40% and 10%?
- 5 (a) Solve by cancellation the following:
 $\frac{3}{4} \times \frac{4}{5} \times 3\frac{1}{2} \times 45 \times \frac{2}{3} =$
 (b) What four equal numbers make six?
 (c) How are fractions added?
- 6 (a) Find 5% of 2; 150% of 2; $\frac{1}{2}$ of 1% of 100.
 (b) What is the fractional equivalent of $\frac{1}{2}\%$; 150%; $12\frac{1}{2}\%$; $33\frac{1}{3}\%$?
- 7 (a) Find the interest on a note running from January 2 to February 23, interest 4%.
 (b) Find exact interest of \$40 for 93 days at 5%.
- 8 (a) What is ratio? Write a ratio.
 (b) What is proportion? Write a proportion.
 (c) What are the terms of a proportion called?
 (d) Write this proportion: $2\frac{1}{2} : 5 :: x : 7$ Find "x"
- 9 (a) Find the square root of 984 676.
 (b) Find the cube root of 91 125.
- 10 Make out and receipt bill for
- | | | |
|--------------------------------|---------------------|-----------|
| 7 doz and 4 eggs | @ 18c | per dozen |
| 19 lbs of soap | @ 11c | per pound |
| 18 lbs of butter | @ 28c | per pound |
| 13 $\frac{1}{2}$ lbs of cheese | @ 15c | per pound |
| $\frac{1}{2}$ lb of pepper | @ 2 $\frac{1}{2}$ c | per ounce |

 $1,460.01$
- 2 A cubical bin is 100 inches long How many cubic feet does it contain?
- 3 A lot of land rectangular in shape is 180 ft long and 151 ft wide. What is its value at \$10.25 a square foot?
- 4 The extremes of a proportion are $\frac{7}{8}$ and .025. One of the means is $\frac{1}{4}$: what is the other?
- 5 (a) Find the square root of 927 369.
 (b) Find the cube root of 4 330 747.
- 6 A merchant sells goods to the amount of \$1,600. He allows a wholesale discount of 10% and a cash discount of 5%. What does he receive? How much more or less would he receive if the discount was straight 15%?
- 7 Make out and receipt bill of L Gilbert to James Jones
 50 lbs sugar @ $7\frac{3}{4}c$
 10 lbs coffee @ $35c$
 4 lbs oatmeal @ $5c$
 $8\frac{1}{4}$ doz eggs @ $21c$
 50 lbs butter @ $31c$
 $4\frac{1}{2}$ lbs tea @ $62\frac{1}{2}c$
 $2\frac{3}{4}$ doz lemons @ $30c$
- 8 (a) Find the exact interest of \$50 for sixty days at 5%.
 (b) What sum of money invested at 4% will yield \$450 annually?
- 9 (a) Express decimally $\frac{1}{6}\%$; (b) Find $66\frac{2}{3}\%$ of 2; (c) What is the fractional equivalent of $66\frac{2}{3}\%$? (d) What per cent of 64 is 16?
 (e) Solve by cancellation $\frac{1}{6} \times 17\frac{1}{2} \times \frac{11}{22} \times 2$?
- 10 (a) Write table of square measure.
 (b) Write table of liquid measure.
 (c) How many edges has a cube? How many corners? How many faces or sides?
 (d) 4 is what decimal part of a yard?

VII

- 1 (a) Change to decimal fractions the following common fractions:
 $\frac{2}{6}$ $\frac{4}{5}$
 (b) Change to common fractions in the lowest terms the following decimals: $3\frac{1}{3}$, .875
 (c) Divide 1.11 by .0111.
 (d) Change 8 to a fraction whose denomination is 5.
 (e) Add the following:
 $\frac{1}{6}$ $\frac{1}{8}$.25
 Express answer both in common and decimal fractions.

- 2 (a) Bought paper at \$2.40 a ream and sold it at 15c. a quire. How much was gained on three reams?
- (b) The state of Connecticut is about 90 miles long and about 50 wide. How many inches long and how many inches wide must a map be drawn upon a scale of 10 miles to the inch?
- (c) A house rents for \$32 a month. What is the rent for 1 year and 5 months?
- (d) Three feet and six inches are what decimal part of a rod?
- 3 The list price of shoes is \$3.00 a pair. What is the price if they are sold at "20 and 10 off"? What would the difference per pair be if they were sold at 30 off?
- 4 2 tons : 8 tons :: 11.60 : J find J
Read 4 : 2 = 18 : 9
What are 4 and 9 called?
What are 2 and 18 called?
- 5 Make out and receipt the following bill:

July 30, 1904.

Mr R Yates

	Bought	C T Jones & Company Dr
June 1 : 15 lbs sugar		@ .04½
" 2 : 5½ lbs raisins		@ .07
" 5 : 2 2/4 lbs cheese		@ .18
" 15 : ½ bu potatoes		@ .60
" : 5 lbs coffee		@ .35
" 15 : 10 doz eggs		@ .35
" : 130 lbs fence wire		@ .02½

6 If a train of cars moves at the rate of 26.4 miles an hour in how many hours will it move 37.48 miles?

7 The number of scholars in a school was 41. The school was in session 40 days.

(a) If there was no absence what would be the number of days attendance or aggregate attendance?

There were 40½ days of absence.

(b) What was the per cent of absence?

(c) What was the aggregate attendance?

(d) What was the per cent of attendance?

8 A house and lot was valued by the assessors at \$1,600. The taxes upon the property were:

Town tax	6 mills on a dollar
District tax	½ mill on a dollar
Borough tax	3 mills on a dollar

What was the amount of the taxes on this property?

9 The amount raised in a town by tax was \$6,400.

35 per cent is used for schools,
40 per cent for roads and bridges,
10 per cent for paupers,
5 per cent to pay interest on debt,
and the remainder for general purposes.

How much was used for each purpose?

- 10 Change 4 ounces to the decimal of a pound.
If a rectangular piece of ground is 25 rods long, how wide must it be to contain 2 acres?

VIII

- 1 (a) Two square yards are how many square feet?
1296 inches are how many square feet?
(b) $2\frac{1}{4}$ cubic feet are (1) how many cubic inches? (2) what decimal part of a cubic yard?
- 2 (a) When the sun rises at 4.58 and sets at 6.57 what is the length from sunrise to sunset?
(b) At \$8.50 per M how much will 123,000 bricks cost?
- 3 (a) The workmen in a factory are to have their wages increased $12\frac{1}{2}\%$. The following were the old wages:
A \$80 a month C \$13 a week E \$6 a week
B \$18 a week D \$1.75 a day
- How much did each receive after the increase?
(b) After the increase the following were the wages:
F \$69 a month H \$17.28 a week J \$1.60 a day
G \$50 a month I \$2.76 a day
- How much did each receive before the increase?
- 4 A \$5.00 money order costs 5c; above this, not exceeding \$10, 8c; above this, not exceeding \$20, 10c. What will be the entire amount necessary to purchase two orders for \$15.75 each, one for \$12.60, one for \$20.00, and one for \$5.85?
- 5 The population of Connecticut in 1900 was 908,420. During this year there were 155,228 pupils registered in elementary and secondary schools of the state. What per cent of the population was in elementary and secondary schools during this year?
- 6 (a) Find the square root of 401 956.
(b) Find the cube root of 8 869 743.
- 7 Make out and receipt bill, using the following items:—
- | | |
|--------------------|--------------------|
| 150 lbs screws | @ \$ 4.87 per cwt. |
| 30 kegs nails | @ 2.75 |
| 12 ranges | @ 29.50 |
| 15 base burners | @ 27.75 |
| 19 bales barb wire | @ 2.15 |
- 8 (a) Multiply 24000 by 63000.
(b) Divide 2.14 by .00214.
(c) Find the difference of $\frac{9}{20}$ and $\frac{9}{30}$.
(d) $\frac{5}{10} \times \frac{48}{14} \times \frac{28}{9} = ?$ (Cancel).
- 9 (a) What is the interest of \$50 for 53 days at $3\frac{1}{2}$ per cent?
(b) Find the exact interest on \$75 from December 14, 1904, to February 13, 1905.
- 10 (a) What is ratio? Write a ratio.
(b) What is a proportion? Write a proportion.
(c) The extremes of a proportion are $\frac{7}{8}$ and .025. One of the means is $\frac{3}{4}$; what is the other?

ENGLISH

I

- 1 Write a letter to a superintendent of schools applying for a position and stating your experience and other qualifications.
- 2 A boy will leave school when he is 14 years old. What training in language should he receive?
- 3 Give sentences illustrating the use of the following verbs in the third person singular, present and past:—lie, lay, do, see, be, read, sit.
- 4 By examples show the difference between complex and compound sentences.
- 5 Insert the proper form of pronoun in each blank and give the reason for your choice:
Between you and —, the conditions seemed easy.
Would you stay if you were — ?
The older man was supposed to be —.
I knew that it was —.
— are you going to send that to?
— do men think me to be?
— am I supposed to be?
— do you think will be chosen?
- 6 How is the plural of English nouns regularly formed? Give the singular and plural of each of six nouns which depart from this rule.
- 7 Give five points of English usage on which children need special drill. Illustrate each by a sentence giving incorrect and correct forms.
- 8 Give uses, not less than three, of the passive voice and illustrate by one example in each.
- 9 What are the distinctions in the use of *would* and *should*, and *can* and *may*?

II

- 1 What is meant by inflection in grammar?
- 2 What parts of speech are inflected in English? Give examples.
- 3 On what grounds has English been called a "grammarless tongue"?
- 4 With what is the study of English grammar concerned?
- 5 Correct errors in the following and explain your corrections:
(a) Everybody brought their books.
(b) He would not let John and I go.
(c) I know whom it was.
(d) The sun don't set so late as it did.
- 6 Give the past and perfect tenses of *run*, *do*, *go*, *come*, *freeze*, *sit*, *lie*, *lay*.
- 7 The Japanese discovered last evening that the Russians had evacuated Liao-Yang, and at eleven o'clock they sent scouting parties to the southern and western walls of the city. What kind of a sentence is the above? Select and tell kinds of clauses.
- 8 What are the subjects and predicates of the clauses?

9 Give the construction of the underlined portions of the above sentence (in 7).

10 Give the construction of the underlined portions of the following sentences; also of the last clause.

The Russian losses in the fighting around Liao-Yang are estimated at ten per cent of the number of troops engaged. The Japanese make the assertion that their losses were very heavy.

III

1 Define grammar, clause, antecedent, participle, syntax, subject, predicate.

2 Write (1) a simple sentence

(2) " complex "

(3) " compound "

3 Using the proper form of the verb *to be* for a predicate, write

(1) a sentence having two singular subjects connected by *and*

(2) " " " " " " " " " " *or*

(3) " " " a singular and a plural subject.

Using the proper form of *be* for predicate use the following words for subjects: committee, politics, people, physics, phenomena.

4 Give all the forms singular and plural of — who, she, man, calf, Charles.

5 Write a sentence containing (1) a relative pronoun

" " " " (2) an abstract noun

" " " " (3) a transitive verb

" " " " (4) a verb in the passive voice

" " " " (5) a personal pronoun

6 Give five points of English usage on which children need especial drill.

Illustrate each by a sentence giving correct and incorrect form.

7 Write a letter to a superintendent or committee applying for a position. State your qualifications.

8 Give in your own language the substance of the following selection :

When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

IV

1 What is language?

2 Give at least five illustrations of changes of form in words. Tell the part of speech and indicate the change.

3 Illustrate by words in sentences use of capitals in

(a) names of persons

(b) days

(c) months

(d) places

(e) rivers, mountains

4 Write sentences containing (a) a collective noun in the possessive case; (b) an appositive in the plural

5 Write

(1) Simple sentences with modified object.

(2) A complex sentence.

6 "The young mother who wishes to fix a sentence permanently in a child's mind need not bid him commit it to memory, since in spite of such precautions it may be forgotten. Let her, on the contrary, find it in a printed book, then paste over the words a thick strip of paper to conceal them; then let the book be entrusted to the child's own care and sooner or later the sentence will be brought to light."

Arrange the first fifty words in the foregoing selection alphabetically. After each word thus arranged indicate part of speech to which it belongs.

7 Write not less than one page on any subject you may choose—or on one of the following:

(1) State examinations.

(2) The characteristics of a good teacher.

(3) Why I enjoy (giving title of book).

8 Write a letter applying for position; indicate the several parts of the letter.

V

1 (a) Write a compound sentence of three clauses.

(b) Write a complex sentence of three clauses.

1 Use in sentences the possessive singular and possessive plural of each of the following:

calf	king	prince
child	lady	princess
deer	mouse	wolf
fox	ox	

3 What are the principal parts of the following verbs:

lie lay sit set do write begin ride
drink go come swim sleep dream fly flow

4 Use in sentences the past indicative of lie, drink, swim, begin, lay.

5 Write a letter to a school visitor applying for a school.

6 Write a brief description of some place you have seen.

Arrangement, punctuation, spelling, sentence construction, paragraphing should represent your best work.

7 (a) Outline your method of correcting errors in oral English.

(b) Give your reasons for using this method.

8 (a) What should be the object of a dictation lesson?

(b) Mention four things the teacher should keep in mind in giving a dictation exercise.

VI

1 (a) Write a receipt for \$20.00

(b) Write the titles of two books, giving author and publisher.

2 Write a letter applying for a position to teach. Direct the envelope.

3 (a) What is meant by comparison of adjectives?

(b) Compare as many of the following adjectives as permit of comparison.

better	round
worse	magnificent
square	

(c) Use each comparative which you have written in a sentence.

4 Which of the following sentences are incorrect, and why?

- (1) The poor should not try to act like the rich do.
- (2) Every man and woman needs friends.
- (3) Do not leave the room without you have permission.
- (4) Neither the robin nor the blue-bird remain in their northern home during the winter.
- (5) Have you seen the picture what Rosa Bonheur painted?
- (6) Whom did she invite, he or I?

5 *Whenever* the snow *lies* long and *deep* upon the ground, a flock of cedar birds *comes* in midwinter *to eat* the berries on *my* hawthorns.

- (a) What kind of a sentence?
- (b) What are the different clauses?
- (c) Point out the different adjective phrases.

6 Write a sentence containing the possessive singular and possessive plural of the following:

boy	lady
woman	fly
fish	he
ox	mouse
wharf	Charles

7 Write (a) two sentences each containing transitive verbs; (b) two containing intransitive verbs; (c) two containing verbs in the active voice; (d) two containing verbs in the passive voice; (e) one containing verb in the indicative mode; (f) one containing verb in the conjunctive mode.

8 Use the following words in sentences which will show the meaning of the words:

<i>healthful</i>	<i>well</i>
<i>healthy</i>	<i>good</i>
<i>majority</i>	<i>provision</i>
<i>plurality</i>	<i>address</i>

9 Arrange the words of the following selection in columns according to their parts of speech.

"A taste for reading will always take us into the best company, and enable us to converse with men who will instruct us by their wisdom, and charm us by their wit; who will soothe us when fretted and refresh us when weary."

10 What grammar or language text-books have you studied? State two things which you learned and show their application by sentences.

VII

- 1 (a) Thou hast taught me, Silent River,
Many a lesson, deep and long.
(b) He that would honor win
Must not fear dying.
(c) He read few books, but mastered all he read.
 - i Arrange in columns the parts of speech in the foregoing selection.
 - ii Write each sentence by itself.
 - iii Write the subject and predicate of each sentence.
 - iv Tell what each subject consists of.
 - v Tell what each predicate consists of.
- 2
- 3 Write a sentence containing
 - (a) Phrase modifying a verb.
 - (b) A phrase modifying the object of a verb.
 - (c) A clause modifying the subject of a verb.
- 4 (a) Copy the following nouns and opposite each write the plural:

<i>volcano</i>	<i>thief</i>
<i>solo</i>	<i>tooth</i>
<i>veto</i>	<i>half</i>

 (b) Write sentences using the following nouns as subjects of verbs:
measles wages spectacles people twos
- 5 (a) Write sentences using the following words as subjects of verbs:
speeches tree compass

 (b) Write sentences containing the passive forms of the following verbs:
forget win speak

 (c) Write sentences using the following verbs to express conditional or doubtful assertions:
be see hear
- 6 (a) Use the proper noun in the following sentences:
 - i _____ is coming
 - ii To _____ did you give the flower?
 - iii _____ do you see on the hill?
 - iv With whom _____ were you playing?
 (b) Supply the proper word in the following sentences:
 - i John _____ I take your pencil? Certainly, you _____
 - ii I should like to go home now; _____ I
 - iii I _____ jump across the brook. _____ I do so.
 (c) Correct the sentence, "I should like to have worked for Sir Joseph"
- 7 Write a letter to a committee applying for a position to teach.
- 8 Write a sentence containing
 - (a) a *relative* pronoun
 - (b) an *abstract* noun
 - (c) an adjective in the *comparative* degree
 - (d) a *transitive* verb
 - (e) two singular subjects connected by *and*
 - (f) two singular subjects connected by *or*

- 9 Write briefly on one of the following subjects:
 State examinations.
 The characteristics of a good teacher.
 Why I enjoy (giving title of book).

VIII

- 1 Give the singular and plural forms of the
 (a) personal pronouns
 (b) relative pronouns
- 2 Write sentences illustrating three uses of the nominative case.
 Correct the following sentences and give reasons for correction:
 I intended to have written.
 I don't hardly think I shall go.
- 3 Write in clear language the substance of the selection
 "Children's hour."
- 4 Insert *am*, *is* or *are* in each blank below and give reason for your choice.

The jury discharged.

My friend and benefactor here.

Neither the child nor his parent present.

Every man, woman, and child glad.

The committee invited.

Manual and physical training now required.

Either you or I at fault.

- 5 How many forms of a verb denote past time?
 Write five illustrative sentences containing five different forms.
- 6 i Be noble! and the nobleness that lies
 In other men, sleeping, but not dead,
 Will rise in majesty to meet thine own.
- ii Be a hero in the strife.
- iii She of her jewelry hath cast in all that she had.
- iv We are bound together by a thousand ties.
- (a) Write the complex sentences and the clauses that make them complex.
- (b) Point out one verb in the passive voice and show how it is formed.
- (c) Point out the simple subjects and predicates.
- (d) Arrange the parts of speech in i and ii in columns.
- (e) Tell which of the verbs are transitive and which intransitive.
- 7 Write a letter to a committee or superintendent applying for a position to teach.

IX

- 1 What is meant by comparison of adjectives or adverbs?
 What are the forms of comparison?
 (a) Write the comparison of the adjectives in the following list:
 (b) Use in sentences the comparatives of the first three in the list.

- (c) Use in sentences the superlatives of the last three.

<i>dangerous</i>	<i>robust</i>	<i>marshy</i>
<i>many</i>	<i>complete</i>	<i>far</i>
<i>late</i>	<i>impressive</i>	<i>old</i>

- 2 Tell the use of each word in the following sentences:

Evil communications corrupt good manners.

Beautiful dwellings stood there formerly.

- 3 Write (1) two sentences, each containing a pronoun used to designate the speaker; (2) two sentences, each containing a pronoun used to designate a person addressed; (3) three sentences, each containing a pronoun used for the name of a person or thing spoken of.

- 4 (a) Tell which verbs in the following sentences are regular and which irregular and why.

- (b) Give their three principal parts.

- (c) Rewrite the sentences changing the tense of each verb from present to past or the reverse.

- 1 The sun withdraws his rays.
- 2 Clouds of smoke fill the air.
- 3 James strove for excellence.
- 4 Mrs Gray chose the smaller volume.
- 5 The plowboy drove his team afield.
- 6 Those grapes grew by the Hudson.
- 7 The sergeant told us his adventure.
- 8 Father reads aloud each evening.

- 5 (a) Classify the following sentences as simple, complex, or compound.

- (b) Point out the clauses.

- (c) Put the subjects in one column and the predicates in another.

- 1 Knowledge comes, but wisdom lingers.
- 2 Virtue is clad in flesh and blood.
- 3 'Tis winter now, but spring will blossom soon,
And flowers will lean to the embracing air.
- 4 The mouse that hath but one hole is quickly taken.
- 5 I am dreaming of the firelight, and the rain is slowly falling.

The roses are a regal troop,
And modest folk the daisies;
But, Bluebells of New England,
To you I give my praises,—

To you, fair phantoms of the sun,
Whom merry spring discovers,
With bluebirds for your laureates
And honeybees for lovers.

- 7 Write a letter applying for a position to teach. This letter should be clear, concise, and in proper form. Direct and leave in book the envelope.

8 Select from the following the incorrect sentences and rewrite in correct form, giving the reason for each correction:

- 1 There come three boys home from school.
- 2 The book was given to John and I.
- 3 He had just laid down when you came.
- 4 Both you and he may go if it is pleasant.
- 5 She told me who to expect.
- 6 Every pupil brought their contribution.
- 7 Does either of these books belong to you?
- 8 Where will I find the crayon?
- 9 (a) Write two sentences each containing a transitive verb.
 (b) " " " " " an intransitive verb.
 (c) " " " " " a verb in passive voice.
- 10 Arrange the words of the selection in question 6 in columns according to their parts of speech.

GEOGRAPHY.

- 1 What is the effect of mountains upon rainfall?
Give two illustrations.
- 2 What is meant by climate?
What are the causes of variations in climate?
- 3 Locate definitely

Port Arthur	Venezuela
Madagascar	Tangier
San Domingo	Uruguay
Nome	
- 4 Give government, religion, largest cities, rivers, and boundaries of Mexico.
- 5 Give capitals of states that touch the Mississippi River.
- 6 Locate definitely (giving latitude and longitude) the Philippine Islands and the Sandwich Islands. When and how were they acquired?
- 7 What is the latitude of a place?
- 8 What causes day and night?

II

- 1 Why are the days in this state longest in June and shortest in December?
- 2 Define the terms archipelago — peninsula — trade wind — water shed — delta. Name and locate one of each.
- 3 Which of the United States produce the most lumber — coal — iron — copper — cotton? From what countries do we import tea — coffee — rice?
- 4 What rivers flow into the Gulf of Mexico? Describe the course of one.
- 5 Which of the United States border on the Pacific Ocean? Tell what you can of the climate and productions of one.
- 6 Locate and tell something about Korea — Manchuria — Port Arthur — Formosa — Madagascar.

7 Write in a column the names of the following cities in order of latitude, beginning with the most northern:

London	New York	Paris
San Francisco	St. Petersburg	New Orleans

8 What events do the following places suggest:

Jamestown	Saybrook	St. Augustine
Waterloo	Moscow	Quebec

9 Why do we teach geography? Of what use is a text-book in geography to a pupil?

III

1 Give the approximate latitude of New York city, New Haven, Hartford, Boston, and London.

2 Are the majority of European cities farther north or farther south than Hartford?

3 What and where are these: Balkans? The Deccan? Mukden? Port Arthur? Manila?

4 (a) In going from Hartford to New York by rail what cities would you pass through? (b) In going by boat what difference as to the cities would pass?

5 Mention the largest river

- (a) of Asia that flows into the Pacific;
- (b) of the United States that flows into the Pacific;
- (c) of Europe that flows into the Black sea;
- (d) of Africa that flows into the Atlantic;
- (e) of South America that flows into the Atlantic.

6 In what region of the United States does each of the following occur: anthracite coal, bituminous coal, iron ore, wheat, natural gas, cotton, corn, rice, silver, petroleum.

7 Name two books suitable for supplementary reading in this subject and state their points of excellence.

IV

1 Name four of the most useful minerals and tell where in the United States each is found.

2 Draw a circle to represent a hemisphere. Indicate upon it the tropic of Cancer, the tropic of Capricorn, the equator, Arctic circle, and Antarctic circle.

3 What and where are the following:

San Domingo	Sitka
Port Arthur	Ceylon
Luzon	Vesuvius
Honolulu	Hatteras

4 Locate and connect with some historical event the following:

Valley Forge	New Orleans
Detroit	St. Augustine

Ticonderoga

- 5 In what states is each of the following produced:
- | | |
|-----------|---------|
| wheat | cotton |
| copper | iron |
| petroleum | maize |
| lumber | coal |
| oranges | tobacco |
- 6 Mention the largest river
- of Asia that flows into the Pacific;
 - of the United States that flows into the Pacific;
 - of Europe that flows into the Black Sea;
 - of Africa that flows into the Atlantic;
 - of South America that flows into the Atlantic.
- 7 What is a map? What is a globe? How would you teach a child the meaning of a map? Of a globe? Should pupils draw maps? Why?
- 8 Name five principal mountain ranges of Europe. Where is each?
- 9 In going from Hartford to New York by rail what cities would you pass through? In going by boat what difference as to the cities you would pass?

V

- 1 Locate the following cities: State for what each is noted (a) St Paul, (b) Hong Kong, (c) Rome, (d) Savannah, (e) Athens, (f) Hamburg.
- 2 Account for the climate of the following places: (a) Siberia, (b) Utah, (c) Sahara, (d) Connecticut, (e) What is the latitude of Connecticut?
- 3 What is (a) latitude? (b) longitude? (c) When are day and night equal in length and why?
- 4 Name the countries that border on the Mediterranean.
- 5 What and where is Oklahoma, Mukden, Liverpool, Manitoba, Cincinnati, Odessa, Glasgow, Tokyo, Luzon, New Zealand?
- 6 From what localities of the United States are the following products obtained: (a) wheat, (b) petroleum, (c) lumber, (d) iron, (e) corn, (f) coal, (g) copper, (h) cotton, (i) salt, (j) gold, (k) sugar.
- 7 Define and give one example, locating each: (a) glacier, (b) volcano, (c) river system, (d) isthmus, (e) cape.
- 8 What is a map? A globe? What use will you make of each in teaching?
- 9 What state is directly west of New England? What part of Europe is directly east of New England?
- 10 Name two books suitable for supplementary reading in this subject and state their points of excellence.

VI

- 1 Draw a circle to represent a hemisphere. Indicate upon it the tropic of Cancer, the tropic of Capricorn, the Arctic circle, the Antarctic circle. Explain how the widths of the respective zones are obtained. What countries of North America are crossed by the tropic of Cancer?

- 2 Define and give one example of each

<i>geyser</i>	<i>glacier</i>	<i>delta</i>
<i>volcano</i>	<i>archipelago</i>	
- 3 What is a map? A globe? How will you teach the meaning of a map? Of a globe? Should children draw maps? Why?
- 4 In what part of the United States does each of the following occur: anthracite coal, bituminous coal, iron ore, wheat, cotton, corn, rice, silver, petroleum.
- 5 Where is the Panama Canal to be built? What will be its value? Where is the Suez Canal? What is its value?
- 6 Locate definitely

Venice	Singapore	Hamburg	Odessa
Bombay	Hong Kong	Manila	Denver
Milwaukee	Atlanta		
- 7 Locate the following rivers:

Rhine	Nile	St Lawrence	Columbia	Amur
-------	------	-------------	----------	------
- 8 What is the chief commercial river of

Scotland	Portugal	Egypt	England	Austria
----------	----------	-------	---------	---------

Give the largest city upon each.
- 9 Locate and describe the Philippine Islands. To what country do they belong and how were they acquired?
- 10 In what direction from Hartford are the following:

St Louis	London	New Orleans
Venezuela	St. Petersburg	Tokyo
	Washington	

HISTORY

I

- 1 Connecticut: When and where first settlement? What were the western claims? Tell what you can about the charter and constitution.
- 2 Write not more than a page about each of the following:

Jefferson	Hamilton	Jackson
-----------	----------	---------
- 3 What English support did the colonies have in the war for independence?
- 4 What influence has each of the following inventions had upon the history of the United States?
 - 1 cotton gin
 - 2 telegraph
 - 3 railroad
 - 4 steamboat
- 5 State briefly causes of the war for the Union.
- 6 Name three books—not text books—that are useful in teaching United States history.

II

- 1 Why were Georgia and Rhode Island settled? Where was the first settlement in each? Give a brief account of the early history of one of these colonies.

- 2 Show with a map or by words
 - (a) The extent of the United States in 1783.
 - (b) The addition acquired in 1803.
 - (c) The addition acquired in 1819.
 - (d) The acquisition as the result of the Mexican war.
 - (e) The acquisition at the end of the Spanish-American war.
- 3 Give the main facts regarding the Dred Scott decision.
- 4 Connect with American history the following names:

Wolfe	Clay
Burr	Webster
Sumner	
- 5 What was the cause of the recent war with Spain?
- 6 Name five men who you think were most useful to this country during the 19th century. State reasons for your opinion.
- 7 Name five men who are prominent in political life at the present time. What state is each from? What official position if any does each hold?

III

- 1 Name two English, two French, and two Spanish explorers.
- 2 Connect with United States history the following names: Sebastian Cabot; La Salle; Edmund Burke; Nathaniel Greene; Stephen A. Douglas; James Buchanan.
- 3 Give an account of the settlement and early history of Hartford.
- 4 What were the principles of the Free Soil party? Who were its presidential candidates in 1848?
- 5 What influence have each of the following inventions had upon the history of the United States:
 - (a) cotton gin
 - (b) telegraph
 - (c) railroad
 - (d) steamship
 - (e) Name four inventors and tell what each invented.
- 6 How and when were Hawaii, Porto Rico, and the Philippines acquired?

What are the arguments for and against "expansion" of territory?
- 7 What is meant by protection? free trade? a trust? regulation of railroad rates?
- 8 What is the object of teaching history?

IV

- 1 (a) Make a list of five general reference histories in United States history for a school library.
- (b) Recommend five biographies for study of the struggle about slavery.
- 2 (a) Contrast Massachusetts and Virginia as typical New England and southern colonies.
- (b) What was Connecticut's influence in the adoption of the Federal Constitution?
- (c) Mention ten illustrious men of Connecticut.

- 3 What is meant by the following:
The stamp act; state rights; The spoils system; Ordinance of 1787; The Lewis and Clark expedition.
- 4 Discuss the topic (a) (b) or (c)
 - (a) What were the main features of the struggle for spread of slavery in the territories?
 - (b) What were the main features of the Reconstruction period?
 - (c) Give a chronological outline of the annexation of territory to the United States.
- 5 How have the following men been prominent in the history of the United States:
Alexander Hamilton, Nathan Hale, Eli Whitney, Robert E Lee, Henry Clay.

V

- 1 In what parts of North America were the earliest settlements made by Spanish, French, English, and Dutch respectively?
- 2 When and how did France lose its possessions in North America?
- 3 Give an account of the settlement and early history of New Haven?
- 4 (a) How was the northwest territory ceded to the United States?
(b) Title of act which established the government.
(c) What states at present.
- 5 (a) How long did the civil war last?
(b) How were the slaves set free?
(c) How were the seceded states restored to their former position in the Union?
- 6 Write briefly on Jefferson, Jackson, Jefferson Davis.
- 7 Name five men who have been prominent in public life during the present administration. From what state is each? What official position if any does each hold?
- 8 What is meant by the president's cabinet?
" " " veto power?

VI

- 1 In what parts of North America were the earliest settlements made by the Spanish, French, English, and Dutch respectively?
- 2 What was the special work of each of the following:
Samuel Adams
Jefferson
Robert Fulton
John Paul Jones
Henry Barnard
William Lloyd Garrison
John Brown.
- 3 (a) When did the civil war begin?
(b) During whose administration?
(c) How long did it last?
(d) How were the seceded states restored to the Union?

- 4 (a) Under what forms of government has Connecticut been governed since the coming of Thomas Hooker?
- (b) Who are the national senators of Connecticut?
- (c) How many representatives does Connecticut have in the lower house of congress?
- 5 What very important questions arose during Jackson's presidency?
- 6 What is meant by
 - Resumption of specie payment.
 - Emancipation proclamation.
 - Navigation acts.
 - Civil service reform.
 - Protective tariff.
- 7 Name four inventions which have greatly aided in the development of our country and state in what ways.
- 8 How did Alaska, Porto Rico, and Hawaii become parts of the United States?

VII

- 1 Name two English, two French, and two Spanish explorers.
- 2 Tell what you can of the settlement of Connecticut.
- 3 When and how did the United States acquire California?
- 4 In what way have the following men served their country: Thomas Hooker, Samuel Adams?
- 5 How and when were Porto Rico, Hawaii, and the Philippines acquired?
- 6 Mention an event with which each of the following were connected: Nathan Hale, Ethan Allen, Paul Jones, Major Andrè, Israel Putnam.
- 7 Locate the following and connect each with an important event: Quebec, Saratoga, New Orleans, St. Augustine, Saybrook, Manila.
- 8 Name four important inventions and tell the influence of each upon the history of the United States.
- 9 What is meant by the following: (a) The stamp act, (b) State-rights, (c) The spoils system, (d) Ordinance of 1787, (e) Lewis and Clark expedition.

VIII

- 1 When and where was the United States constitution formed?
- 2 Under what circumstances was the settlement of
 - (a) Virginia
 - (b) Hartford
 - (c) Florida
 - (d) Pennsylvania
- 3 For what are the following men noted in American history?

John Cabot	John Quincy Adams	Jefferson Davis
William Pitt	Vespucius	
- 4 Name two political parties of the United States before 1860 and mention two famous men of each party.
- 5 Give the significance of the following:

"Fundamental orders"	Free silver
Monroe doctrine	Lexington
- 6 Why are the Hudson and Potomac rivers important in United States history.

- 7 How did the United States acquire the territory between the Mississippi River and the Pacific?
- 8 (a) What relation did the Missouri compromise have to the civil war?
(b) What is meant by the Reconstruction period?

DUTIES OF CITIZENSHIP.

I

- 1 What is a constitution?
- 2 How are town taxes laid and collected?
- 3 What right has a town to lay taxes to maintain schools?
- 4 What are the departments into which government is usually divided?
- 5 What are the legal duties of teachers?
- 6 What is the law relating to attendance at school?
- 7 What is a will?
- 8 Draw a map of Connecticut.
Locate counties
rivers
county seats
cities

II

- 1 How is the governor of Connecticut elected?
- 2 How is the president of the United States elected?
- 3 How can the constitution of Connecticut be changed?
- 4 What is the justification for taking the people's money to build roads and maintain schools?
- 5 What are the executive officers of a town?
- 6 Mention four duties of a citizen.
- 7 State substance of law relating to attendance of children at school.
- 8 Draw map of Connecticut; locate counties, cities, rivers, and capital.

III

- 1 (a) What is a constitution?
(b) How can the constitution of Connecticut be changed?
- 2 Define quorum, plurality, majority.
- 3 What right has the state to tax the people to support schools?
- 4 What is meant by the legislature? How is it chosen? Where does it meet?
- 5 How are taxes laid and collected in your town and for what purpose is the money spent?
- 6 What is the law relating to the attendance at school and employment of children?
- 7 Draw a map of Connecticut; locate and name rivers, cities, counties.

IV

1 What is a law? How are laws made? How can you find out what laws are?

2 What is a tax? If the taxable property of a town is \$150,000 and the amount to be raised is \$6,000, what will be the rate of taxation in mills? How can a taxpayer find out what his tax is? What will happen if he does not pay?

3 (a) What is the law relating to attendance at school? Where is this to be found?

(b) What is a truant? If a parent does not send his child to school what is the duty of the teacher?

4 State the legal duties of teachers. Where can they be found?

5 (a) What town officers are connected with schools? State one duty of each.

(b) State the meaning of each of the following words:

town	nation
state	majority
	government

6 Draw a map of Connecticut. Locate counties

rivers
county seats
cities

V

1 How are taxes laid and collected in your town and for what purpose is the money expended?

2 What is meant by "representative government"?

3 What is the legislature? How chosen? Where does it meet? What is the meaning of the expression "the bill passed both houses by a small majority, but was vetoed by the governor"?

4 Define *nomination*, *citizen*, *elector*, *law*, *constitution*.

5 What is the Connecticut law relating to attendance? To child labor? To the keeping of registers? To the examination of teachers?

6 Draw a map of Connecticut locating counties, cities, rivers.

PHYSIOLOGY.

I

1 Define five of the following: pepsin, thorax, synovia, ptomaine, antiseptic, metabolism, rennin.

2 Describe the spinal column—Explain how its structure is adapted to protect the brain and spinal cord.

3 Mention three principal muscles of the limbs and state function of each.

4 Describe the structure and state the function of the mucous membrane.

5 State the chief use of carbohydrates to the body. Mention foods that contain carbohydrates.

6 State the effect of continuous use of alcoholic drinks on blood.

- 7 What is meant by vaso-motor regulation of the circulation?
- 8 Describe the process of digestion, absorption, and assimilation of starchy food.
- 9 What is the law relating to the teaching of physiology and hygiene in the public schools?

II

- 1 How does oxygen find its way to the blood?
- 2 Draw a diagram of the alimentary canal, indicating its parts.
- 3 What is impure air? Describe the process by which impure air affects the brain.
- 4 Describe the process of changing food to energy in the human system.
- 5 What is the law relating to the teaching of physiology in the public schools?
- 6 What kind of gymnastics will be useful in the public schools?
- 7 What is a stimulant? a narcotic? What is the effect of each?

III

- 1 Give a description of the brain and tell its uses. Draw a figure.
- 2 Describe the process of breathing. Why is pure air essential to health?
- 3 Describe the organs of speech.
- 4 What physiological rules can you apply to seating children in school?
- 5 To what extent are teachers responsible for the health of school children?
- 6 What is a stimulant? a narcotic? Illustrate the effects of each.
- 7 What is the legal duty of teachers in relation to the subject of physiology?

IV

- 1 State how and why digestion is influenced by each of the following:
 - (a) overeating.
 - (b) insufficient mastication.
 - (c) unusual excitement.
 - (d) fatigue.
- 2 Mention a function of each of the following:
 - (a) medulla oblongata.
 - (b) red corpuscles.
 - (c) periosteum.
- 3 What is meant by reflex action? Give illustrations. What is the use of automatic and reflex centers?
- 4 What are the purposes of cooking food?
- 5 (a) What is the strongest reason for avoiding alcoholic drinks?
(b) What is the law relating to the teaching of physiology in the public schools?
- 6 Explain how oxygen finds its way to the blood.

V

- 1 Describe the process of breathing.
Why is pure air essential to health?
- 2 What is exercise?
Why should we take exercise?
- 3 What guides have we as to what we should eat?
Give a general rule as to when we should eat.
What is the object of cooking food?
- 4 What are the principal parts of the nervous system?
State function of each. Why should a teacher understand this system?
- 5 What is a stimulant? What is a narcotic? State the effect of each.
- 6 What is the law relating to teaching physiology in the public schools?

VI

1. Write about respiration under the following heads:
 - (a) Purpose of breathing.
 - (b) Organs of breathing.
 - (c) Hygiene of breathing.
- 2 What is the law relating to the teaching of physiology in the public schools?
- 3 Mention three classes of foods. To which class does lean meat belong? eggs? oat meal? Illustrate the use of each.
- 4 What is meant by exercise? oxidation? animal heat? perspiration? saliva?
- 5 Describe the process of breathing, drawing a diagram.
- 6 What will you teach about narcotics and stimulants?
- 7 What is reflex action? Illustrate by examples. How is habit related to reflex action?

VII

- 1 State how and why digestion is influenced by (a) overeating, (b) insufficient mastication, (c) unusual excitement, (d) fatigue.
- 2 Describe the process of breathing. Why is pure air essential to health?
- 3 What is the law relating to the teaching of physiology in the public schools?
- 4 How does a stimulant act? a narcotic? Mention two stimulants; two narcotics. Outline a lesson on stimulants which you would give to children eight years and older. That outline should be brief, clear, and give the point to be impressed.
- 5 What is meant by (a) cerebrum, (b) red corpuscles, (c) diaphragm, (d) thorax, (e) vein, (f) oxidation, (g) pepsin
- 6 How does oxygen find its way to the blood?
- 7 How is habit related to reflex action?

VIII

- 1 (a) For what purpose do we need food?
 (b) Of what use to the body are
 starch
 sugar
 fats
 (c) With what does albumen furnish the body?
 (d) What is the use of
 fruit
 vegetables
 (e) What are the purposes of cooking?
 (f) Why is plain food more healthful than rich?
- 2 (a) How does the blood get oxygen from the lungs?
 (b) What does the blood do with the oxygen it gets from the lungs?
 (c) Why should we keep our mouths shut except when talking and eating?
 (d) What are the purposes of ventilation?
- 3 (a) What is a muscle?
 (b) How is a muscle contracted?
 (c) What are the best kinds of exercise?
- 4 (a) What is the difference between a stimulant and a narcotic?
 (b) What are the reasons for avoiding alcoholic drinks?
 (c) What is the state law relating to teaching of physiology in public schools?
- 5 (a) What is the brain?
 Its parts?
 (b) How does the brain get a knowledge of the world?
 (c) What is reflex action?
 How related to habit?

LITERATURE

I

1

- 1 What is your purpose in teaching literature?
- 2 What standards do you use in selecting literature for children?

2

Whittier.

- 1 Write one paragraph containing a brief sketch of his life.
- 2 State the poems you would use in teaching children.
- 3 "Snow bound."
 (a) Give the general idea of the poem.
 (b) State its value as character study.
 (c) Mention its chief points to be emphasized.

3

Emerson.

- 1 Of what value is Emerson to teachers?
- 2 Give some of the main thoughts contained in the essay Self-reliance.

4

Take one of the following groups, A or B: -

A Hawthorne.

- 1 Mention stories you would give to children for reading.
- 2 State the characteristics of Hawthorne's style.

B Longfellow.

- 1 What points are to be emphasized in his *Hiawatha*?
- 2 What poem can be used as historical supplementary reading?

II

Answer the questions in two of the three groups.

Group I.

- 1 Compare and contrast the home life given in *Snow bound* with that given in the *Cotter's Saturday night*.
- 2 Characterize by three appropriate adjectives Burns' father, Burns' mother, Whittier's father, Whittier's mother, and the schoolmaster in *Snow bound*.
- 3 Name six poems in the *Child's garden of verses*.
What qualities make the *Child's garden of verses* appropriate for school use.

Group II.

- 1 What is the historical setting of the *Talisman*?
- 2 Write a short character sketch of your favorite character in the *Talisman*.
- 3 Name six poems in the *Tent on the beach*. What was Whittier's idea of heaven as expressed in the *Brother of mercy*?

Group III.

- 1 What four questions does Huxley answer in his essay on the Educational value of the natural history sciences? Give his answers.
- 2 (a) Show clearly what Mr. Emerson means by "manners."
(b) What does he consider the power of manners?
(c) What is the basis of good manners?
(d) What one topic is forbidden to well-bred people?
(e) What one precept does Emerson give to aid us in acquiring good manners?
- 3 Give five thoughts from Emerson's essay on *Courage*.
- 4 Give the picture of 16th century Scottish life suggested to you by the *Lady of the lake*.

III

- 1 Write the plot, *in story form*, of one of Shakespeare's plays suitable for an eighth grade.

- 2 Name two poems by each of the following authors:

Field	Lowell
Stevenson	Wordsworth
Browning	Whittier
Longfellow	Shelley

3 Name a work by each of the following authors suitable for school work:

Dickens	Eliot
Irving	Burroughs
Scott	Emerson

4 Write a sketch of one of the following characters and tell in what work the character is found.

Antony	Silas Marner
Brutus	Cassius
Sir Kenneth	Portia

5 (a) Outline the thought of one of the following:

(b) Who wrote each one?

Herve Riel.
 Sir Launfal.
 The solitary reaper.
 The skylark.
 The idyls of the king.
 My star.
 The great stone face.
 The chambered nautilus.

IV

1 What is your aim in giving literature to children? What is your plan for teaching it?

2 Whittier's "Barefoot boy."

Give the lesson that this poem has for children.

State the worth of the poem for description of country life.

To what grade is it especially suited?

3 Name two poems by each of the following authors:

Field	Stevenson	Browning	Longfellow
Lowell	Wordsworth	Whittier	Shelley

4 Write a sketch of one of the following characters and tell in what work the character is found:

Antony	Brutus
Sir Kenneth	Silas Marner
Cassius	Portia

5 (a) Outline the thought of one of the following:

(b) Who wrote each one?

Herve Riel.
 Sir Launfal.
 The solitary reaper.
 The skylark.
 The idyls of the king.
 My star.
 The great stone face.
 The chambered nautilus.

V

1 Select one work of each of the following authors suitable for grammar grades:

Scott	Irving
Dickens	Lowell
Browning	Whittier

2 Write briefly the plot of one of the following:

Julius Caesar
Merchant of Venice
Talisman

3 Write a brief sketch of one of the characters in any one of the following books:

Ivanhoe
Rip Van Winkle
Julius Caesar
David Copperfield
As you like it

4 (a) Give names of six poems that could be used in grades I—III.

(b) Give names of six poems that could be used in grades IV—VII.

5 Name works you would advise children to read in which the interest centers in

- (a) character development.
- (b) love of nature.
- (c) historical setting.
- (d) adventures.
- (e) life of the times.

VI

1 A Write a paragraph on the topics:

- (a) The value of good literature for children.
- (b) The advantage of American works for reading.

B Give in order of importance twelve poems from American authors, which are suitable for reading in school. Give reasons for arrangement.

2 Whittier.

A Compare Whittier and Longfellow in life of men, in style.

B (a) What descriptions in particular from Snow bound shall you try to have children enjoy?
(b) What are the moral teachings of Snow bound?

3 Emerson.

A Write a paragraph on Emerson's life.

B (a) What descriptions in particular from Snow bound shall What does a teacher gain morally from reading Emerson?

4 Write on these topics:

Hawthorne.

A Mention suitable stories for children to read. Give reasons for choice.

- B Discuss his "English."
Eugene Field.
- C What is the value of Eugene Field to teachers?
Illustrate by examples of poems.
Longfellow.
- D What is his value as a children's poet? Illustrate by examples
of poems.

VII

Answer the questions in two of the three groups.

Group I

- 1 Name six poems in the Child's garden of verses which you consider appropriate for primary grades.
- 2 Compare and contrast fully the home life in Snow bound with that given in the Cotter's Saturday night.

Group II

- 1 Give briefly the plot of the Talisman.
- 2 Characterize briefly the hero; the heroine.
- 3 Name six poems in the Tent on the beach.
- 4 Give the story of Abraham Davenport.

Group III

- 1 Give the four stages in the Scientific method and illustrate their application by reference to the establishment of the circulation of the blood.
- 2 What is the practical value of the physiological sciences?
- 3 At what period may they best be made a branch of education?
- 4 Give five thoughts from Emerson's Essay on behavior.
- 5 Give five thoughts from Emerson's Essay on courage.
- 6 Give briefly the argument of the Lady of the lake.
- 7 Why is this poem used in grade work?

VIII

- 1 Give the names of six poems every child should know.
- 2 Name six stories you think every child should read before leaving school.
- 3 Name a poem by each of these authors:
Longfellow Whittier Field Stevenson Riley
suitable for (a) primary grades.
(b) grammar grades.
- 4 Name a story or a poem you could use to teach
(a) love of country.
(b) kindness to animals.
(c) courage.
(d) manliness.
- 5 Name four characters in literature you admire and tell briefly for what you admire each one.
- 6 Write a story on
The value of story-telling in a child's education.

IX

Write upon any six of the following:

- 1 "The vision of Sir Launfal" and "Grandfather's chair" represent what two groups of reading matter suitable for children? Contrast both your purpose in teaching them and your plan of work.
- 2 Hawthorne and Irving. (a) Make lists of the works of each you would use. (b) Contrast these writers: (1) The public for whom they wrote. (2) Their purpose in writing. (3) Their value for children.
- 3 Make and classify lists of reading matter for children in lowest grades. Point out the special value of each group.
- 4 Why have children study poems? Explain by reference to *The chambered nautilus*, *The cloud*, *The sugar plum tree*, *My bed is a boat*, *The village blacksmith*.
- 5 What fiction would you use in intermediate grades? Why?
- 6 What American literature, prose, and poetry, would you use in connection with (a) Colonial history study, (b) Revolutionary period? What is the value of such literature in this connection?
- 7 *Hiawatha*. Give an abstract (not more than ten lines). Why have children study this poem? What difference would you make in presenting this poem in high and low grades?
- 8 What is Carlyle's estimate of Burns as a poet? Illustrate from Burns' poems.
- 9 Mention reading matter you would select from British literature of the (a) age of Elizabeth, (b) time of Cromwell, (c) age of Queen Anne, (d) latter part of the 18th century.
- 10 State your reasons for using any one of the above productions.

ELEMENTARY SCIENCE

I

Physics

- 1 What value do you assign to science in a common school? Give your reasons.
- 2 Give some experiment you could perform showing that air is matter.
- 3 What principle of electricity is involved in the telegraph, telephone, trolley car, arc light?
- 4 Make a drawing of a suction pump and briefly explain how it operates.
- 5 How would you find the specific gravity of an irregular stone?
- 6 What effect does heat have upon solids or gases?
- 7 What is the hottest part of a room and why? Should a room be ventilated from top or bottom? Why?
- 8 Explain why different substances in the same room appear to have different temperature when you touch them.
- 9 What are some of the sources of heat?

Geology

- 1 What minerals are contained in granite? What mineral is most abundant in sandstone? Of what mineral or minerals is marble made?
- 2 What is an igneous rock, a sedimentary rock, a metamorphic rock? Name two of each kind.
- 3 What is a flood-plain, a river terrace, a canyon, an ox-bow lake?
- 4 What is meant by the term soil? How does the soil of New England differ in its origin from the soil of Virginia or other southern states?
- 5 What are the characteristics of a young river valley? Of an old river valley?

Chemistry

- 1 Name three liquids which do not normally contain water.
- 2 What difference in the result in these cases of evaporation?
(a) a solution of a gas in water? (b) a solution of a solid in water?
- 3 What do the ashes left after burning wood represent?
- 4 What can chemistry do?
- 5 What is "hard water"? Why is rain water not "hard"?
- 6 What two elements are contained in all organic matter?
- 7 Describe these two elements in their ordinary condition by themselves.
- 8 Select the elements from this list: Sulphur, copper, iron, carbon, carbon dioxide, sandstone, wood, oxygen, radium, potassium, quartz, salt.
- 9 Name three gases other than nitrogen, hydrogen, and oxygen, and state whether they are elements, compounds or mixtures.
- 10 Name two elements in every nitrate; in every sulphate; in every carbonate.
Name one element in every chloride.

Botany

- 1 What are the stomata of a leaf for? What change goes on in the leaf as a result of their presence?
- 2 What is cross-fertilization? What use do men make of it in breeding plants?
- 3 What are the two great classes of stems and how do they differ?
- 4 Of what use are roots to plants? Why do beets and carrots require different tillage than corn and beans?
- 5 What effect does depriving a plant of sunshine have on its growth? What do you know about the substance that is responsible for all the food in the world?
- 6 What would you teach a child about germination?

II

Chemistry

- 1 It is claimed that machinery at Panama rusts so fast that it falls to pieces in a year or so.
Point out the conditions that bring about this chemical change.

2 Tell something about the chemical changes that occur when one of the following substances is obtained:

iron from iron ore
charcoal from wood
zinc from zinc oxide
chlorine from hydrochloric acid
lime from limestone
illuminating gas from water

3 What is cream of tartar put with in making biscuit and what occurs?

4 If you mix H with O and bring a flame near, what will follow?
How can the elements be again set free?

5 Tell of an experiment that you can do with the following substances:
ammonia
nitric acid
charcoal
phosphorus

Physics

1 Does the magnet always point due north?

What would its position be at the magnetic pole?

2 What is the reason that ice doesn't fill up the bed of rivers in winter?

When do water pipes burst—when the water freezes or when the ice melts, and why?

3 Were you to pump the air out of a bottle would it weigh any less?
Why don't they make balloons by using empty cylinders?

4 What is an electro magnet?
What use is made of it in daily life?

5 Describe a lesson you are prepared to give on liquids.

Geology

1 Travelers in the Himalaya mountains report that while the sun is shining the stillness of the night is broken by the continual snapping and falling of rocks.

Discuss the cause of the change in the rocks.

2 Are deserts "sandy wastes"?

What would change New England into a desert?
Give reasons for your conclusions.

3 What are dunes and where are they found?
Are they troublesome?

4 Tell something of the effect of wind, water, and ice on the earth.

5 What evidence have we that the earth's crust is not stationary?

Botany

1 How does the plant life of deserts differ from that of other regions?

2 From what do plants get their food?

From which source does the greater amount come?

- 3 What do you know about nitrogen-fixing bacteria?
- 4 What is the object of
 - thinning out plants
 - selecting seeds
 - preparing the soil
 - pruning vines
 - budding
- 5 Group the following plants in the order of their advancing structure:

violet	pine	fern
yeast	cone	moss

III

Chemistry

- 1 Describe the preparation of oxygen.
- 2 Compare oxygen and nitrogen.
- 3 What is the test for carbon dioxide?
- 4 Describe any simple lesson with fire.
- 5 How would you illustrate with an experiment the formation of coal?

Physics

- 1 Describe an experiment with air.
- 2 Describe a lesson with the pendulum.
- 3 What can be taught with boiling water?
- 4 How could you make a compass?
- 5 Describe a simple cell of a battery.

Geology

- 1 What minerals are contained in granite?
What mineral is most abundant in sandstone?
Of what mineral or minerals is marble made up?
- 2 What is an igneous rock, a sedimentary rock, a metamorphic rock?
Name two of each kind.
- 3 What kind is a flood-plain, a river terrace, a canyon, an ox-bow lake?
- 4 What is meant by the term soil? How does the soil of New England differ in its origin from the soil of Virginia or other southern states?
- 5 What are the characteristics of a young river valley? Of an old river valley?

IV

Physics

- 1 State your purpose in giving observation lessons in physics.
- 2 How would you illustrate the flattening of the earth at the poles?
- 3 What observation lessons could be given to illustrate the principle of springs?
- 4 Why does mercury rise in a thermometer?
- 5 What force is concerned in weighing? Give the law.
- 6 How is dew formed?

Chemistry

- 1 Describe a lesson with the candle flame.
- 2 How is oxygen prepared?
- 3 Describe an experiment illustrating the formation of coal.
- 4 How is carbon dioxide prepared?
- 5 What experiment can be made with a bottle of hydrogen?
- 6 What is a chemical change? Illustrate.

Geology

- 1 Name two kinds of rock, and tell what you can of their origin.
- 2 Name, and briefly describe, three minerals that are found in rocks.
- 3 What is meant by the "weathering" of rocks? In what ways is it accomplished?
- 4 In what ways are loose rock materials spread over the surface?
- 5 In what ways are mountains made?
- 6 Describe and explain flood-plain and delta.

V

Chemistry

- 1 (a) What is an oxide? a dioxide? a nitrate? a sulphate? a chloride? (b) Which of the preceding contain no oxygen?
- 2 Name three common substances which are oxides; a common chloride; a common carbonate.
- 3 What is the composition of these substances? salt, baking soda, ammonia, iron rust, chalk?
- 4 (a) If iron be strongly heated exposed to dry air what change takes place? (b) If exposed to moist air? (c) What difference in the two cases?
- 5 (a) What substance forms when carbon burns with insufficient supply of air? (b) What, with full supply of air?
- 6 Name some different forms of carbon and state their uses other than as fuel.
- 7 Explain how you would show two of the elements in wood and name the elements. (b) Two of the elements in air, also naming them.
- 8 Why do certain substances effervesce when put with an acid?

Physics

- 1 Name all the ways in which water may be used to do work.
- 2 How many cubic feet of water would a cubic foot of gold need to displace in order to float? (b) Which would have the greater volume as changed to float, a cubic foot of gold or of aluminum? (Specific gravity of gold 19, of aluminum 2.6).
- 3 Diagram a common pump and describe its construction.
- 4 How long would the tube of a barometer, using water as the liquid, need to be? Explain how you get the result.
- 5 A cubic foot of air at an ordinary pressure is compressed to half a cubic foot. What is its pressure now?

6 If the original volume of air were expanded in a proper vessel to two cubic feet what would its pressure be? (b) If an opening were made in this vessel what would happen and why?

7 Explain (a) how a soap bubble can remain suspended in the air; (b) why the air does not crush it.

8 Explain the production of light in (a) a candle, (b) the calcium light, (c) the incandescent electric light.

VI

Chemistry

1 Why is an old apple shriveled?

2 What are the chief agents in the decay of organic substances?

3 What relation do acids and alkalies bear toward each other?

4 What is the difference between an oxide and a hydroxide?

A chloride and a chlorate?

5 Name a common chloride; carbonate; oxide; silicate; sulphate.

6 How does the blackening of a silver compound exposed to the light differ from the blackening of silver exposed to the air?

7 If calcium carbonate (Ca CO_3) be strongly heated what will result?

(b) Removing the oxygen from this what will be left?

(c) Combining this remainder with SO_4 what substance is formed?

8 By what means is the carbon dioxide released from baking powder when used in dough?

9 In a pound of water how much is oxygen? (b) In a pound of sugar ($\text{C}_{12}\text{H}_{22}\text{O}_{11}$) how much is charcoal? (c) In a pound of red hematite ore (Fe_2O_3) how much is iron? ($\text{O} = 16$ $\text{C} = 12$ $\text{Fe} = 56$).

10 What relation has chemistry to mineralogy? botany? physiology?

Botany

1 State the function of each of the following appendages of plants: silk of corn, spur of the violet, spathe of jack-in-the-pulpit, anther of a flower, wings of the elm fruit.

2 Mention two special adaptations of flowers that seem to facilitate the visits of insects.

3 Give the leading characteristics of monocotyledonous plants and mention the families of this class.

4 Give four methods by which plants may be propagated.

5 Draw a typical flower, designating each part. Give use or function of each part.

6 Describe the physiological changes that take place in leaves causing the brilliant autumnal foliage.

VI

Physics

1 What is the essential use of the barometer? of the thermometer? of a hydrometer? of a galvanometer? of a meter stick?

2 On what principle is the barometer constructed? the thermometer? the hydrometer?

- 3 How much less does a stone weigh in water than in air? Reason?
- 4 Water when first drawn from a faucet sometimes looks milky, but presently clears. Explain the cause of the milkiness.
- 5 Distinguish evaporation, distillation, condensation.
- 6 Give directions, with a drawing, for making a simple hydrometer.
- 7 Name the pieces of physical apparatus which you have made. Tell something you learned in the making.
- 8 Knowing that glass is likely to crack on being heated what precaution would you observe in heating it?
- 9 What is the distinction between melting and dissolving?
- 10 Which of the following are commonly melted for use and which dissolved: salt, iron, ice, sugar, sealing wax?

VII

Chemistry

- 1 Name some elements that are found in the following substances: sugar, salt, mortar (fresh), mortar (old), white paint, washing soda, bones.
- 2 How is soap made? baking powder? What is yeast?
- 3 Tell how to make one of the following gases:
O H CO₂ giving tests that may be applied.
- 4 Name the gases and liquids in the following list:
NH₃ H₂O HCL H₂S I NaHCO₃ C₆H₁₂O₆.
- 5 For what are the following men noted?
Dalton Priestly Wohler
- 6 Write briefly on the cycle of carbon in nature.
- 7 What is meant by valence? Law of proportion, hard water, acid, base, monad?

Geology

- 1 Discuss at some length the different ways rocks are broken.
- 2 How does a stream deepen its bed? Why does it ever stop lowering its bed, and why does it not choke up its mouth?
- 3 State the outcome of a mountainous island that is beat upon by rain.
- 4 What are the characteristics of water-laid rock? Give a list of the most common ones and a brief description of each.
- 5 Give drawings showing the present positions of water-laid rocks, and give the evidence that they are of water origin.
- 6 What is metamorphism; its factors; where it occurs, and the conditions under which it occurs? Name a half dozen rocks that are of this origin.
- 7 Give and describe the local evidences of the glacial age.
- 8 What are fossils and under what conditions are they produced?
- 9 Give a list of lessons you think you can give, in every case based on an object. Plan a lesson on one of the objects.

Physics

- 1 Tell how you would teach a lesson on one of the following topics: Pendulum, lever, pressure of the atmosphere.
- 2 Define molecule, mixture, physical change.
- 3 Do you think physics ought to be taught in the common schools? State your reasons.
- 4 Name some business in which a knowledge of physics would be beneficial.
- 5 Give three ways in which the electro-magnet is used.
- 6 The long arm of a lever is 20 feet; the short arm 1 foot; 100 pounds is applied on the long arm. How much may be lifted on the short arm? Explain.

MUSIC

I

- 1 State your idea as to the best methods to use to interest young children in the study of music.
- 2 Write an exercise of four measures, key of E, four-four time, suitable for teaching a first grade class.
- 3 Give a method for teaching the introduction of sharp four and flat seven.
- 4 State what form of systematic daily drill you would use for remembering key signatures.
- 5 Write the following signatures on the staff, giving the key in both major and minor for each: 2 flats, 3 sharps, 5 flats, 4 sharps, 1 flat, 1 sharp.
- 6 On what degree of the major scale does the relative minor scale begin? State why called "relative" minor.
- 7 Write on the staff from memory the notes and one stanza of a short easy school song you have learned, giving title of same.

II

- 1 Define a major scale.
- 2 Write the signature of the following major keys:
B $\flat$ D E B D $\flat$
- 3 Illustrate the following intervals:
Major second
Fifth
Minor third
Augmented second
Octave
- 4 How would you teach a rote song?
- 5 Write a simple two-phrase melody in quadruple time, key of A, suitable for second or third grade.
- 6 Transpose the melody you have written to the key of A flat.
- 7 Write the melodic form of F minor.

III

- 1 Write a short exercise in any key suitable for teaching second grade.
- 2 State your idea of the compass or range of young children's voices.

3 Write the signatures of the following keys, indicating the position of key note:

$B\flat$ D E $A\flat$ B

4 Write the diatonic scales of D and $E\flat$ without expressing the signature.

5 Define a time signature. Example $3/2$.

6 Write a single note for $3/4 - 3/8 - 3/2$ which receives a beat and a half.

7 Give titles of five good school songs.

DRAWING

I

1 Make a constructive drawing showing the ground plan of a school-room containing the ordinary furniture of such a room.

2 Make a free-hand perspective drawing of a table or desk in this room.

3 Make a "working drawing" of the desk or table at which you are writing. Show the top, front, and end views.

4 In definite nature study, what drawings could you make of a tree and its parts at successive seasons of the year?

5 Make a book cover design, with roman lettering for title, etc., for "American history."

II

1 What is the purpose of teaching drawing and color to children?

2 Draw a still-life group.

3 Place a flight of steps in scientific perspective.

4 Make a working drawing of a piece of furniture.

III

1 Make a pattern of a paper box (in one piece) including the necessary laps for pasting it together.

2 Develop the surface of a two-inch cube.

3 Make a working drawing of a piece of furniture in this room.

Give "scale" of your drawing and figure the drawing properly.

4 Make a very simple railroad map of Connecticut, showing only the principal cities and their connections.

5 Draw without a ruler the corner of this room.

6 Draw the main lines of a house including door, window, chimney, and steps.

7 Draw the following leaves: maple, oak, horse-chestnut, apple.

8 Make a (botanically) correct sketch of any plant, branch, or other nature subject.

9 Draw the roman capitals A, B, and E, using double lines as in modern printing.

10 Make sketches of four things which you could draw upon your blackboard and which children would like to receive for Christmas.
